Subject: Vaccination direction choice Option 1

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Wiley Eugene and Sandra Lynn Hill, as residents of Kitsap County, prefer Option 1, let the current situation play out.

Our reasons follow:

- We are against any government taking away our personal choice on medical treatment per the Fourteenth Amendment.
- Data shows the vaccine does not prevent the propagation of Covid-19 and therefore cannot achieve Herd Immunity which can be accomplished through natural immunity.
- Regeneron treatment of the vulnerable infected and the Dr. Bartlette protocol which has achieved Zero fatalities should be used to stop the spike in deaths in Kitsap County.

Thank you

Subject: No vaccine mandates

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

My name is Lisa Turek. I was born and raised here in Kitsap county. I went to Silverdale Elementary, CK junior high and high school.

I am 50 years old, a widow, mother of three grown children, grandmother to four gran babies. And I'm ticked off.

I have lived through decades of devastating viruses. Never, ever have we been forced to wear masks or be vaccinated. Ever.

The fact that mandated vaccinations is being discussed is absolutely shocking. This should not be.

Medical privacy is not just a right and a privilege but it's actually a law. It's nobody's business but mine and my doctors. It's not yours or restaurants or my employer.

There should be no mandate to vaccinate. It's a medical choice adults get to make for themselves and families.

This is a gross misstep. So do not vote to mandate vaccines. Be courageous and follow the States that are what is now being called free States. No vaccine mandates.

Do not continue the destructive abuse of power that is plaguing Washington State. Wake up!

The facts and science do not support the need for mandated vaccines. Those who want it should take it. Those who don't, should not have to.

If the vaccines work, then vaccinated people don't need to worry about unvaccinated people. The vaccine protects them correct?

Also, healthy people should not have to wear masks either. None of this makes sense and is irrational at best. There is no consistency to the mandates and "rules" that are being forced upon us.

Kids have to sit all day long mask while adults can sit in a bar and drink unmasked? What adults are at more risk of being sick from the virus than children. Wake up! Enough is enough! Stop the madness. Stop it now.

Best,
Lisa Turek

Subject: No Vaccine Mandates!

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Mr. Grellner,

I am opposed to proof of vaccine mandates. I would like to start off by saying that I am a vaccinated resident of Kitsap County. Kitsap is unique in that the majority of residents are either members of the military, medical field or in education. Most people are vaccinated. The businesses in Kitsap County have suffered enough since the Covid restrictions. I am hearing that the Kitsap County Health Department is planning on imposing vaccine mandates on any business in Kitsap County. This means having to show proof of having been vaccinated. Please reject this mandate. I'm afraid Kitsap County businesses as well as it's residents will further suffer from a mandate.

Thank you for your time,
Suzanne Bell

To All Meeting Attendees And All Whom This May Concern-
Good Day,

I am writing in earnest with the fervent hope and prayer that this nightmare we've all been enduring not be further exacerbated. The sole legal option (listed as #1 on your meeting agenda) is to leave the residents of Kitsap County, Washington to our own good common sense and allow everything to reach a conclusion, organically, as it will. There is no acceptable alternative. Any alternate choice would be a patent violation of the Rule of Law, The Constitution of The United States and The Nuremberg Code. The remainder of listed "options" are nothing short of tyrannical, and inhumane.

We are Citizens of The United States of America. We have a God-given right to our freedom and it is legally secured in our Constitution. Along with multitudes of concerned Kitsap County residents, I/we implore you to consider the only one option which is lawful and right under the United States Constitution and to respect each and every one of us and the freedoms we all share.

Thank you for your time and thoughtful consideration.
Sincerely and Respectfully,

Susan Unser
Resident of Kitsap County, Washington

Subject: Please do not require vaccine "passports" or other restrictive measures

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Please do not allow the Kitsap Board of Health or any other arm of county government to require citizens to show proof of vaccination for work, for entry into restaurants and other places of business, to participate in events, or for any other activities. A blanket one-size-fits-all rule often ends up fitting no one.

There are many rational reasons that people do not get vaccinated. Foremost, many people have already had the SARS Covid 2 infection and have acquired far better immunity than a vaccine could convey.

The least vaccinated racial group is African Americans, for understandable reasons. A vaccine "passport" requirement would recreate a society of racial discrimination. Many African Americans would not be able to eat at restaurants, go to events, or even work at their jobs. Of course this would also apply to people of any race. It is un-American to create categories, and then separate citizens into those who can receive privileges and those who cannot.

Many people have religious reasons for not being vaccinated. Currently, the government is being extremely restrictive in allowing people to have a religious exemption. This goes against the free exercise of religion guaranteed to us in our State and Federal Constitutions.

Many people have medical reasons for not being vaccinated; however the government has intimidated doctors and has made them hesitant to sign off on medical exemptions for patients. Furthermore, citizens are capable of knowing their own personal health limitations and should be able to decline the vaccine without a doctor's certification.

Rather than becoming more strict, please allow for more options. Allow businesses to creatively find safe accommodations for their clients and employees. Allow more therapeutic medications to be available if citizens should become ill from SARS COVID 2. Allow more commerce not less.

Vaccine Passports and more lock down measures are destructive and never-ending. Please do not resort to those measures.

Sincerely,
Joyce Fiess
Kingston, WA

Subject: Against the Passport

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

It has come to my attention that the Kitsap County Health district wants to jump on the passport train, I am wholly against proof of vaccination cards to enter facilities in Kitsap County. It is divisive, unscientific, highly discriminatory - all that defines King county, not Kitsap.

A shot card mandate would create two tiers of local society. To do so further divides our country and county. Many of us already have had families and friendships ripped apart due to disagreements because of the government mismanagement of this. Or is this perfectly managed to get the population to divide amongst themselves? Do you really want to contribute to that?

Local boards and governments have a responsibility to to promote community harmony, not divisive mandates separating individuals. Not to use experimental shots on the population and treat them as guinea pigs, we are human beings.

A mandate like this does not take into account any natural immunity, which gives better protection than the shot. Look at Isreal - people who have taken the shot are very capable of getting AND spreading the virus.

The country with the most shots given also has the highest Covid numbers. Isreal coerced their population to take the shot and now they are looking at numbers higher than before the shot was administered. What good was that?

The survival rate of C19 is on average 98.2%! This takes into account all of the elderly and those with co-morbidities, who account for the vast majority of fatalities. This cannot be ignored. Disrupting society, and our county, for a fatality rate slightly higher then the seasonal flu flies in the face of common sense.

Please for the love of God, don't take away more freedom from the people of Kitsap county and promote the use of showing papers to get into a business.

Reject proof of vaccination cards.

Subject: Say "Yes" to equality, Say "No" to Segregation

[CAUTION]: This email originated from outside Kitsap Public Health District. Do not click links or open attachments unless you are expecting this email. If you are unsure please contact IT.

Mr. Grellner,

I urge you to not take our county into the territory of segregation practiced long ago which failed miserably.

Segregation has been decided to be a terrible evil. It opposed the constitution by saying some people are more important than others. I beg you not to fall into the same trap. Segregating a society leads to many ills, don't let it occur in this generation that prides itself on equality. Segregation is the opposite of equality.

Likewise, it is wrong to oppress those whose ideas differ from your own. By punishing those who exercise their free will, you are being extremely intolerant. Studies have shown those who have recovered from COVID to have strong natural immunity. Studies from Israel show that natural immunity prevents covid infection at a much higher rate than vaccine generated immunity. Studies have also shown that those who are vaccinated are still susceptible to COVID and can still spread it. Therefore, judging if someone is likely to transmit Covid purely on their vaccination status is not logical. In addition, the long term effects of the vaccine remain unknown.

Small businesses in the area have been struggling with all the restrictions that have been placed on them in the last 18 months. Those who have survived, should not have to face yet another hurdle. Kids and teens have lost social skills after being out of school for so long. By limiting their ability to go to other venues, you further hinder their social development and can damage their mental health.

I beg you to keep Kitsap thriving. Don't cause more small businesses to have to close. Don't force people to stay in their homes (think of those in domestic abuse situations). Allow people to do what they are supposed to do, to interact with one another.

Sincerely,
Jennifer Thornton

Subject: Concerned about Vaccine Mandate

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Good Evening Mr. Grellner,

I am writing to say that I oppose allowing the Kitsap County Health Department to impose vaccine mandates on any business in Kitsap County and I urge you to likewise oppose this. I am a registered nurse who left active duty Naval service about three months ago after serving honorably for just shy of eight years. As a healthcare provider I have many concerns about the vaccine, but as a citizen hearing about the proposed mandates, I am concerned for our freedoms as well.

It is widely believed and publicized that the vaccines are totally safe and if they were such, I would not be in opposition to getting it myself. What I find disturbing is the lack of integrity of so many medical and public health officials since few to none will admit that there is absolutely no way to be certain if these vaccines are safe due to the limited number of studies and the appallingly short time they have been studied. I understand it would be impossible to have studies of any length at this point in time, but that is my point. No one can know the long-term effects of these vaccines because we need more data and to mandate them on the level the Kitsap County Health Department desires is dangerous to our freedoms and potentially our health as well. Indeed, there have been vaccines recalled many years after their approval was first given due to adverse events unknown at the time they got their stamp of approval. Being that no one can claim these are safe, I have many concerns with requiring everyone to get them or making it so difficult for people to live their lives unless they have it. Government has no right to force people to get anything that violates their conscience or convictions. The level of control a mandate like this would give the government is a serious violation of our liberties.

Very Respectfully,
Carolyn Hess

Subject: NO covid passport

[CAUTION]: This email originated from outside Kitsap Public Health District. Do not click links or open attachments unless you are expecting this email. If you are unsure please contact IT.

Do Not implement a covid passport. Besides the obvious reason that this is a MASSIVE overreach by government, the covid “vaccines” DO NOT stop the spread of the virus. So requiring that only the “vaccinated” can participate in society in order to stop the spread is UTTERLY RIDICULOUS!!! This is basic logic. The vaccinated are still getting and spreading covid. The vaccine does not stop covid. It’s simple. And it appears that covid has become worse since people started taking the vaccines. Not to mention that the vaccines are having major negative affects on people. You claim to be a Health Board. We’ll see if you actually are or if you’re bureaucrats pushing the same nonsense that clearly does nothing to help this community. DO NOT Implement a covid passport or any similar restriction. The people of this county are fed up! It’s time to actually do whats right. We will accept nothing less.

Sincerely,

Ryan Sage

Subject: No to Vaccine restrictions in Kitsap County, PLEASE READ

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Dear Mr. Grellner,

Our family has lived in Kitsap County for over 20 years. We own 3 homes in the county, and we have always enjoyed living here and have appreciated working with the department of public health over the years. I am confused and dismayed that Public Health is now considering imposing requirements of businesses in our area regarding a vaccine. Please consider the following:

- Government, whether federal, state or local, has no authority to make health decisions for citizens, even in "emergencies".
-
- Government has no authority to impose requirements on businesses in relation to its customers, especially if it is a business that is open to the public.
-
- Any such requirement is unconstitutional according to the United States and Washington State constitutions, and is discriminatory at its core. Our federal and state constitutions protect our rights and freedoms and this will bear out in a court of law.
- Federal law prohibits privately owned facilities including retail establishments, medical offices and those that offer food, lodging, gasoline or entertainment to the public from discriminating on the basis of race, color, religion, medical condition, disability or national origin, among others.
- PLEASE NOTE: A Notice of Discrimination will be issued by those well-informed citizens for each barred entrance to a business in our county, starting with the large, nationwide chain stores first, and this will be forwarded to the **Civil Division of the Department of Justice** for further investigation.
- Any requirements imposed on such businesses will also result civil lawsuits against the businesses, **large national chains first**.

We know our rights under the law of the State of Washington and the United States of America. We will stand up for those that can either not get the vaccine for age or medical reasons, or those that feel that it is compliance with their religion or better judgement to wait or to decline the vaccination.

Please also consider the following in making your decision:

- The recovery rate according to the CDC is over 98% in healthy individuals. There is no emergency. - WebMD, CDC
- Other valid and effective treatment options for Sars-Cov2 exist. -Oxford

- All AVAILABLE mRNA "vaccines" are currently experimental use only; mandates are unlawful.
- Comirnaty, a legally distinct product and the only FDA approved "vaccine", is not available to the public. -Pfizer
- Any Requirements imposed on businesses to coerce citizens will violate the Nuremburg Code* by proxy. -various attys at law

*Nuremburg Code: "...the person involved should have legal capacity to give consent; should be so situated as to be able to exercise free power of choice, **without the intervention of any element of force, fraud, deceit, duress, over-reaching, or other ulterior form of constraint or coercion...**" -National Institutes of Health (NIH)

See Resources below. My family and our neighbors respectfully request that you decline and forego any requirements on businesses or organizations in Kitsap County.

Thank you,
Christopher and Holly Hunt

Subject: NO to vaccine req for public entry

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Dear Mr. Grellner,

I predict that I will write this message in vain and that it will fall on deaf ears, but I will write it all the same. As per the Declaration of Independence, one of our nation's founding documents, it is said that our right to life, liberty, and the pursuit of happiness is self-evident. Not that these rights are granted by a piece of paper, not that any state or federal government grants us these rights, but that they are granted to us by our creator from the moment we are born until the day we die.

The governing body of Kitsap County, Washington possesses no legal authority by which they may restrict the rights of these free people to frequent any privately owned business for any reason. Nor does this governing body possess any legal authority by which they may create or enforce any set of draconian rules, mandates, ordinances, or laws that would restrict or deny the rights of these people on any conditional basis.

Furthermore, it is transparent that this proposed mandate is clearly an alternative strategy for forcing all citizens to receive a vaccine for an illness with a 0.02% death rate, without any consideration for natural immunity, pre-existing health conditions, or religious exemptions. I don't know what else to call it except tyranny, when a legislative body decides that it may govern by its own pleasure without consent or consideration of the people.

It would do well for the governing body of Kitsap County to remember your oaths of office, and to remember that it is not the people that answer to the body politic but it is you that is beholden to the people.

Sincerely,

Caleb Shaw
(A lifelong Kitsap County Resident)

Dear Mr. Grellner

I'm writing in regards to vaccine passports in Kitsap county. I oppose vaccine passports and believe these will cause further divide in our community when life is hard enough as it is. Small business's are already struggling to make it due to the lockdowns and covid restrictions.

We need to unite as a community and not cause further economic hardships to people trying to feed their families. Discrimination based on a medical decision is not how we should handle this. There are different ways as a community to handle things and vaccine passports are not the answer.

Thank you for your time,

Britney Cramer

Subject: FORCED Mandate

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Good Evening,

My name is Angela Miller, I have lived in Kitsap County for 45 years. I have raised two older children that still live in this County as well as my 8 year old son that is in 3rd grade at South Colby. I have many friends that are business owners and work hard to make ends meet for their families. I am 4th generation in this County, I have worked at PSNS, driven School buses for South Kitsap and worked at small business establishments. I coach Little League and am now raising my son. When Covid hit it broke families, it created a fear that some could not provide for their families. I had to find full daycare for my son, and continue to work. Kitsap County has no right to force a mandate on everyone. People with the vaccine are still getting Covid. People who get the vaccine are dying, of course no one is talking about that. There are families in this County that have owned their business for over 50 years and now you are going to mandate them... how dare you play god... because that is what you are trying to do. You are trying to go behind the backs of our community and make decisions you feel are necessary. There are 4 methods of decision making.

1. Command-One person decides
2. Consult-A person given the power to make a decision first consults widely before making a decision.
3. Vote-the group votes
4. Consensus- we negotiate a position that everyone can agree to.

So my question to you Kitsap County Health Board, where do you get off making the decision for 275,867 people? People will stand up to you, teachers will quit, government employees will quit and small businesses will close their doors. And with that people will take their families and move out of state, which is what I am currently planning on doing if this mandate happens. You will no longer receive my tax money.

If any of you still have a human heart I ask that you throw out this mandate, do not destroy our community.

Requiring this vaccine or proof of it is unconstitutional, unethical and goes against our medical freedom. Do not create a war.

Do the Right thing!!

Angela Miller

Subject: "Shot" card requirement.

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Recommended Action:

While the Health District recognizes that vaccination requirements are a complex and controversial topic to some, we hope to receive direction from the Health Board on how you would like to proceed with respect to the following, or other, options:

1. Take no action and allow the current situation to play out.
2. Make a formal Health Board recommendation/resolution for all local governmental agencies to require vaccination for their employees.
3. Make a formal Health Board recommendation/resolution for all private businesses to require vaccination for their employees and/or require proof of vaccination for entry into indoor public places.
4. Issue a formal Health Board / Health Officer order under the authority of RCW 70.05 to require employee vaccinations at governmental agencies.
5. Issue a formal Health Board / Health Officer order under RCW 70.05 to require all business open to the public, or indoor venues open to the public, to require proof of vaccination for entry.

As to your points above – the governor has already given a “Shots or Fired” proclamation, for all state employees – including school districts and higher ed. Which takes out your action points 2 and 4.

Points 3 and 5 will hurt all other businesses, I for one feel it's no one's business, NO ONE whether I've been vaccinated or not. ANY business that wants to see my shot card will lose me as a customer.

And at that same thought does that mean I won't be able to go grocery shopping, feed my family, what about getting gas for my car if I pay cash.

And how long is this going to last? Over a year ago we were told MASKS & GLOVES will stop the spread, then it was MASKS only, then if you want to get rid of the masks get VACCINATED. Now it's get, vaccinated and stay masked, and get vaccinated or get fired.

IF vaccinations are the answer, why have I read that the White House staff is exempt, Congress and Senate staffs are exempt.

How long is it going to be, before, I will not be able to cross the state lines without “PROPER PAPERS”. The government is taking away our rights to make a living, support my family, to make a decision on what's best for me / my family. Whether they can go to college. Do you require a meningitis shot for all students? “Normal” flu shots?

I urge the Kitsap Public Health Board to follow the **facts** and decide that requiring additional vaccine requirements in Kitsap County is unnecessary.

The top local employers already require vaccines

- Department of Defense
- All Contractors who work at/for department of defense
- Olympic College (staff and students)
- Hospitals
- School Districts
- All other state and federal agencies
- All businesses that employ 100+ employees

What percentage of Kitsap County needs to be vaccinated for it to be enough?

Small businesses which have already been disproportionately effected by the restrictions, requirements and mandates, will now be impacted by these new mandates the most. Our hospitals may be at high capacity but the **fact** is our commercial real estate is not. The hospitality industry in particular has been hard hit. Restaurants are already struggling to hire enough staff. Adding additional requirements for employment and then requiring those establishments to limit their business opportunities based on the vaccination status of their patrons is excessive.

The vaccine is not the answer as demonstrated by the current state of affairs. We can assume that if the majority of employers already require vaccinations, then the majority of people who are patronizing local businesses are vaccinated. Breakthrough cases are everywhere with symptomatic and asymptomatic fully vaccinated individuals given carte blanche to move freely about all social events and businesses spreading disease as if it doesn't occur. The **fact** is that as per the CDC 08/03/2021 and confirmed by public statement of the Director of the CDC, Dr. Rachel Walensky, MD MPH regarding vaccine benefits, "...what they can't do anymore is prevent transmission". The **fact** is, as infection and transmission of and by fully vaccinated and unvaccinated individuals alike is commonly understood and accepted, a vaccine mandate which treats the two groups differently is clearly ineffective, inappropriate and discriminatory.

While "Health officials" sound the alarm about health care systems being overwhelmed, the **fact** is many times in the past (prior to COVID) our hospital (Harrison, at the time) has been at or beyond at capacity. Most times due to traditional medical issues in combination community infectious disease outbreaks (commonly, influenza). Patients (as now) have waited for a bed, in the ER. ICU's have been at capacity with patients triaged and prematurely moved into step down units (sometimes in

beds in the halls of those units) to make room for more critically ill. Our schools and businesses as well, have been affected by these same infection outbreaks. Yet, time proven and effective vaccines were never “mandated”. “Health officials” know this is true. If denied that it has occurred as such this is a blatant lie. Why now, are we trying to mandate rushed, less than effective vaccines that as a **fact** have the highest level of VAERS reports in history?

Informal reports by local health care workers have also revealed the **fact** that along with the unvaccinated COVID positive, many individuals in the hospital are vaccinated or partially vaccinated and many as a consequence of the vaccines. Something that is not spoken of or recorded in the statistics provided to the public and policy makers. Statistics that are clearly massaged and counted in such a way as to support a narrative.

If the current situation devolves into “crisis standards of care” the **fact** is this will be in part because of the lack of staffing due to the lay off of unvaccinated health care workers. The same workers who have persevered (unvaccinated) through the entirety of the pandemic. Now, without any significant evidence that they are causing any greater level of exposure and infectious risk than any other source, they are being discharged from their positions at our community's time of greatest need of their services. How again are vaccine mandates helping our "health crisis"?

The **fact** is CDC is very clear that vaccinated individuals can still contract and spread COVID. Does requiring vaccines to work or enter businesses REALLY make people safer? or does it just make them FEEL safer? or is it about MAKING people get vaccinated against their will to continue to be able to work, move about and function in society? What is the Health Board's objective? Safety? A perception of safety? Control? I hope that our county will decide that additional mandates, additional stress on individuals, institutions and business owners, additional red tape, etc is superfluous.

In closing the Health Board should defer to the current State and Federal mandates already in effect. Let these mandates/requirements be sufficient. The federal government has chosen to make their requirements for businesses over 100+ employees for a reason. DO NOT make more restrictive recommendations for Kitsap county.

Thank You,
Buck Hartford

To: Kitsap Public Health Board

I have read and reviewed the material for the special session tomorrow on 9/28. I am a resident of Port Orchard and work here in Kitsap County. The businesses and the people of this county are fatigued after ~20 months of covid restrictions and loss of freedoms. Everywhere you look, businesses are seeking more employees and putting up staff shortage signs apologizing for delays and lack of service. Dr. Morrow even stated that within the healthcare industry there are personnel shortages leading to problems. There is not sufficient capacity remaining to handle more imposed stressors on the economy of this county. Employers can't staff their business as is let alone additional "policing" of vaccination status of patrons and customers. Additional employees will quit if forced to get a shot to stay at that place of employment.

Imposing additional measures requiring vaccinations to do business in this county will not only be directly harmful to businesses, it will further divide citizens living and working here. People who wish to get the vaccine can already get the vaccine. Trying to force people to get an injection for which the long term health effects are unknown is not in the best interest of their health especially for demographics of healthy people that, even unvaccinated, have a very very low risk of serious infection. The mRNA treatment is not a one size fits all answer for everyone and it should not be treated as such. Vaccinated individuals are spreading the variants of covid as well and the virus will likely continue to mutate and reduce vaccine effectiveness.

I urge the Kitsap Public Health Board not to impose additional restrictions to require vaccinations of customers or staff of local businesses.

Thank you,
Seth Froyum

Subject: Kitsap County - NO Vaccine Mandates

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Please vote NO vaccine mandates for Kitsap County. This is a really bad idea for many reasons:

1. The current COVID-19 vaccines are not sterilizing vaccines. They are "leaky" vaccines and don't stop people who have been vaccinated from getting and spreading SARS-CoV-2. People who have been vaccinated have been shown to have reduced severity of illness but can still spread the disease so their symptoms will be reduced but they won't know they are sick which will cause them to go out into the county and spread the illness. This allows for the vaccinated to be the true super-spreaders.
2. Businesses do NOT want to police the people entering their establishments to check and verify their vaccination status. Local businesses are currently struggling to hire enough employees as it is, let alone having to worry about checking medical records of their patrons.
3. This would be an unprecedented move toward an authoritarian government and is unconstitutional.

Once again, I implore you to vote NO on vaccine mandates. Thank you.

Subject: Comments for 9/28/21 Kitsap Public Health Board Meeting

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

To Whom it concerns:

In your meeting agenda it is proposed the following:

Recommended Action

While the Health District recognizes that vaccination requirements are a complex and controversial topic to some, we hope to receive direction from the Health Board on how you would like to proceed with respect to the following, or other, options:

1. Take no action and allow the current situation to play out.
2. Make a formal Health Board recommendation/resolution for all local governmental agencies to require vaccination for their employees.
3. Make a formal Health Board recommendation/resolution for all private businesses to require vaccination for their employees and/or require proof of vaccination for entry into indoor public places.
4. Issue a formal Health Board / Health Officer order under the authority of RCW 70.05 to require employee vaccinations at governmental agencies.
5. Issue a formal Health Board / Health Officer order under RCW 70.05 to require all business open to the public, or indoor venues open to the public, to require proof of vaccination for entry.

Given the recent dashboard data shows Kitsap county covid-19 cases summary metrics (from September 24, 2021; link below) the Weekly Cases and the Rolling Incidence Rate are both on the downward trend, at this time I recommend and encourage option #1. This current downward data shows the other options are not warranted.

Respectfully yours,
Chuck Rodman

Dear Mr. Grellner,

I'm writing to strongly encourage you to support a course of action to allow the current situation to play out and NOT take any actions to require vaccination for public/private employees or require any proof of vaccination to enter any public indoor place.

Any of these restrictions is coercive in nature, anti-freedom, and discriminatory.

Kitsap county should follow the lead of countries like Sweden and [Norway](#) which are already returning to normal by embracing natural immunity and focusing on early treatment for those [most at risk](#) due to age and comorbidities.

Please keep Kitsap open and free!

Regards,

Michael Helland

Please do not stop the unvaccinated from entering buildings and businesses. This is discrimination. We are a community that needs to stand together and support each other. Stopping people from entering buildings will not make them get the vaccine but destroy our community. People will leave Kitsap county. Please think about the effects this will have. As a member of this community I am against this discrimination. Please do not allow this. I am disappointed we are even having this discussion.

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

I am contacting you to express my opinion regarding some of the possible actions that might be mandated regarding Covid vaccinations. It is my opinion that private businesses and venues should be left to make the choice of whether or not they require vaccination proof in order for people to enter into their facility. To have government mandate this requirement is an overreach.

Thank you
James Christiansen (Kitsap county resident)

Subject: Vaccine Mandates

[CAUTION]: This email originated from outside Kitsap Public Health District. Do not click links or open attachments unless you are expecting this email. If you are unsure please contact IT.

Hello,

I'm writing to express my concern that the Kitsap County DOH may be considering the idea of instituting COVID vaccine passport mandates similar to those passed in other Washington counties. As a citizen of Washington State and nearby Gig Harbor, and as someone who firmly believes all people have rights given by our creator and not the government, I want to make clear what a breach of those rights such a mandate would be. All humans have a right to sovereignty over their bodies and to participate in the marketplace without molestation by their government. This includes the right to operate their businesses and exchange with businesses without a requirement to divulge personal medical information or to be coerced into injecting any substance into their bodies.

The government's job is to protect our inalienable, God given, and constitutional liberties, not to constrain or abolish those liberties. Please uphold our rights under the Constitution of Washington and the Constitution of the United States. Vaccines passports, or any similar implementations, along with masking requirements, COVID testing requirements, temperature checks, and tracking of individuals all violate our God given and constitutional rights.

Please keep Kitsap County free from medical and surveillance tyranny. Our founding fathers were well-acquainted with pestilence and disease and made no provisions for the government to eliminate or constrain our liberties when outbreaks occur. Freedom is costly and our founders were firmly aware of this fact as are countless citizens and soldiers who have died or been maimed to protect those freedoms. Tyranny for the purpose of the "Greater Good" has always resulted in a significantly reduced quality of life for a nation's people wherever it has been tried. These are not new concepts and the evidence is in.

Instead, I urge you to allow all businesses and individuals to operate freely with no restrictions related to vaccine or mask mandates.

Thanks for considering these positions.

May you act in wisdom,
Linda Ader

[CAUTION]: This email originated from outside Kitsap Public Health District. Do not click links or open attachments unless you are expecting this email. If you are unsure please contact IT.

I am writing to voice my opinion on the upcoming KCHB discussion regarding vaccine mandates in Kitsap County. As a 42-year business owner in Kitsap County I strongly urge the Health Board to take no new action regarding vaccine mandates either for employees or for services/shopping.

Based on my own reading of many highly qualified experts in the fields of immunology, virology, and pathology, not only from the US, but across the globe, the only conclusion I can draw is that the science is far from settled regarding both efficacy and safety of these vaccines. There are obviously no long term studies for this untried new technology. The FDA has violated all of its own protocols and standards in order to rush through approvals. Based on their own record of necessary recalls of previously approved "safe" pharmaceuticals, their stamp of approval on the Pfizer vaccine Comirnaty (which is not currently in production or available) means nothing. I have no confidence in their approvals. On the other hand, VAERS statistics prove the COVID "vaccines" have killed more innocent victims than all vaccines combined over the last twenty years. Their safety cannot be reasonably assured, yet the companies risk no liability.

On the basis of safety alone, it is not an employer's right to insist anyone else accept that risk. Every person should have the right, with the guidance of their personal physician, to determine their own best course of action.

Those who choose to take an injection in the hopes it will protect them from COVID should have the freedom to do so. However, based on the CDC's own statements, those who get the "vaccines" can still get the virus and can still spread the virus. So how does proof of vaccination assure protection from others who are vaccinated any more than from unvaccinated?

In my opinion, though, the overriding fact is that it is unconstitutional to mandate a medical treatment, even if it were "approved", which I would argue does not apply to the available "vaccines". Fully informed consent is necessary, which requires that all ingredients be readily identified. That has also not been the case. Current mandates violate both our constitutional rights and the Nuremberg code. Surely further mandates only make that violation more egregious.

I strongly urge you to make no additional requirements in our county. Don't create mandates that will further encourage the segregation among our population. Every American has the inalienable freedom to weigh the risks and make informed decisions for their own health.

Respectfully,
Debra Florian

Statement of Informed Consent and Medical Sovereignty

September 27, 2021

To: Gib Morrow Health Officer, Kirsten Hytopoulos Deputy Mayor At Large Bainbridge Island, Becky Erickson Mayor of Poulsbo, Charlotte Garrido Kitsap County Commissioner District 2, Robert Gelder Kitsap County Commissioner District 1, Greg Wheeler Mayor of Bremerton, Rob Putaansuu Mayor of Port Orchard, Ed Wolfe Kitsap County Commissioner District 3, Keith Grellner RS Administrator

From: Valerie Orlowski

Re: Statement Regarding Informed Consent and Medical Sovereignty

1. We are against medical experimentation without verifiable and full informed consent on all potential side effects of said treatment with an unconditional free will choice to refuse the medical experiment on untested or unsafe medical interventions, such as a faulty use of a PCR test or government illegal mandates regarding the COVID-19 experimental vaccine.
2. We assert that no government individual, agency or other corporate representatives have been granted authority over the "PEOPLE'S" private health decisions and we maintain our sovereign control over our bodies in unconditional terms, regardless of a so called "State of Emergency".
3. We assert it is against State, Federal and International Laws that exist regardless of a declared State of Emergency (particularly, unlawfully prolonged ones), to mandate the FDA's (Food and Drug Administration) EUA (Emergency Use Authorization) for COVID-19 "vaccines" or any product or procedures, whether EUA or not, without full informed consent of all ingredients and potential side effects; and to institute illegal mandates such as vaccine passports for access to schools, workplaces, restaurants, etc., is completely unconstitutional and scientifically unsound.
4. We assert that to allow and worse, to facilitate the coercing, shaming, bribing or otherwise forcing citizens into being a test subject in any experiment without full informed consent in order to keep their employment, attend schools, or participate within their communities, is to participate in crimes against humanity.
5. We assert that until such time as the United States of America and its Constitution and the Bill of Rights are dissolved, all citizens as "We the People," citizens, are protected by that Constitution and Bill of Rights along with the Federal and State Health statutes that are codified in the Nuremberg Code. Violations of the Nuremberg code and Bill of Rights is against all the "We the People's" inherent and Constitutional Rights.

6. We assert that none of the 10 codes of Medical Ethics in the Nuremberg document are being honored in these experimental COVID-19 vaccines...None. And without full disclosure as to the ingredients of these gene therapies (i.e., mRNA vaccines), and due to secret proprietary ingredients maintained by the pharmaceutical corporations in question, the basic requirement of informed consent is not possible. See the following link:

<https://nam11.safelinks.protection.outlook.com/?url=http%3A%2F%2Fwww.cirp.org%2Flibrary%2Fethics%2Fnuremberg&data=04%7C01%7Ckeith.grellner%40kitsappublichealth.org%7C6add36e77c54433bf03b08d982227b94%7C63ea23e1c6c043fe8754515c89aa179a%7C1%7C1%7C637683906908382948%7CUnknown%7CTWFpbGZsb3d8eyJWljoIMC4wLjAwMDAiLCJQIjoiV2luMzliLCJBTiI6IklhaWwiLCJXVCi6Mn0%3D%7C3000&data=1azivI03A9h90VwkaMAsPLULPhwU7IyEDZfmZ9h3GeY%3D&reserved=0>

7. We assert that “We the People” have the right by law to refuse any products including all EUA drugs technologies, vaccines, EUA tests, masks or medical procedures, EUA investigational products, population genomics programs, EUA healthcare data tracking and surveillance platforms. A lawful application of the terms of a lawful Emergency Use Authorization includes the right to informed consent and the option to refuse. The FDA can only issue an EUA if there are no other cures, treatments or prophylactics available. The FDA has therefore breached this regulation, when it issued the EUA, as they were informed prior to that issuance of alternative and successful treatments such as Ivermectin, Hydroxychloroquine, Zinc, vitamins B, D and C. So, for the FDA to continue asserting that “COVID vaccines” are the only way to “get back to normal” is entirely fraudulent!

8. We assert if any individual representing any business/corporation that chooses to enforce any illegal mandates such as a medical procedure (the PCR test) or medical therapy (the COVID-19 vaccine) on healthy employees, vendors, or sales representatives by strongly suggesting these tests and treatments are necessary, should be offered on an absolutely voluntary basis without any recriminations whatsoever. Otherwise, these corporate individuals may be held liable for any damages, injuries or loss of employment due to refusing the illegal mandates. For employers to threaten employees, vendors or sales representatives to adhere to unlawful dictates is to participate directly in harm being carried out on employees, vendors and sales representatives, and as such these employers may be liable for damages of said harm.

9. We assert that the First Amendment to the United States Constitution prevents the government from making laws which regulate or abridge the freedom religion, the freedom of speech, the freedom of the press, the freedom of assembly, or the right to petition the government for redress of grievances. Since our “We the People” freedoms have obviously been profoundly and unlawfully eroded during this alleged “pandemic” because of unjustified and disastrous lockdown mandates. “We the People”, having all political power, never granted authority to any one, whether a lawmaker, government official, law enforcement official, employer, doctor or nurse to force any medical intervention upon us through their opinions, policies, programs or mandates being falsely presented as law. On the contrary, “We the People,” maintain adherence to the laws that were in place before this virus or any of its variants emerged.

10. We recognize other foreign and domestic agendas at play that are repugnant to the Constitution and Statutes designed to protect us and so we firmly denounce them and their influence on our Representatives. We demand an immediate investigation into the fraudulent nature of this, “pandemic” and the unsustainable claim of a “State of Emergency.”

11. We affirm that “We the People” are not feeling protected, but suffocated by arbitrary restrictions based on inaccurate data and unsubstantiated fears. This coupled with unprecedented levels of censorship and fake news based on misleading and ever-changing data, reveals a “public servants” lack of comprehension and memory regarding the oaths “public servants” took to uphold the Constitution of the United States of America. Due to this breach of duty to protect our First Amendment Rights and Trust, the Affiants demand that each of you rectify this breach immediately, regardless of any State of Emergency, whether or not such a state, in fact exists.

12. We demand that you prove that there is in fact, justification for a State of Emergency based on an actually isolated virus called Sars Cov2 or any variant thereof. Claiming justification for the “Emergency Powers and EUA,” that are based on the rising “Case Numbers” from the Drosten’s PCR test, a version of Nobel Prize laureate Dr. Kary Mullis’ invention of the PCR test, it will not hold up in court, legally or medically, having been proven to be inaccurate and fraudulent in citing rising case numbers. The Affiants also demand that you provide full disclosure of new laws (not mandates) that grant you authority to exercise this force against your constituents, as no laws exist at this time.

13. We demand you respond to we the people and hear our demands. If you fail to respond to us, within the week, you will have acknowledged trespassing against the Constitutional and God-given Rights of the People that you have sworn to protect as well as participating in the crimes mentioned herein. You further agree, that if you do not respond showing Constitutional Provisions authorizing the before mentioned breaches within seven business days, you will have agreed to the facts herein, that no court shall re-examine this matter as you will have thereby agreed to accept the above-mentioned terms of truth and law. This letter authored by two Citizens of the United States of America and residents in Washington State, in Kitsap County, stands as a Notice of Liability and will be used as evidence of wrongdoing, if needed. In the meantime, the Citizens also demand that you cease and desist coercing the “We the People” into surrendering their right to opt out of PCR testing and dangerous mRNA experiments, gene therapies, vaccines or any medical mandates whatsoever.

The Citizens present this statement, on 27th day of September in the year of our Lord Two Thousand Twenty-one by Valerie Orlowski.

I would like to comment to the Kitsap Public Health Board regarding the special meeting scheduled for 09/28/2021:

I oppose any vaccine mandates as the vaccine does not prevent recipient infection from the virus it supposed to vaccinate against.

My mother received the vaccine on 2/9/2021 and died 3/9/2021 after three stroke-like episodes. She did not survive the third stroke-like event.

I share her genetic composition and believe the greater risk to me is the vaccine.

Thank you.

Hello Keith,

I have been informed of a special meeting to discuss whether or not businesses in Kitsap County will require patrons to provide a vaccine passport.

I would like to express that I DO NOT agree with this in any way. I ask that you vote NO to this. The mandate is in violation of the Washington State Constitution and, more importantly, the US Constitution. Not to mention that studies are revealing that both, vaccinated and unvaccinated, can spread the virus.

Thank you for your time.

Kelly McCartney

Dear Mr. Grellner,

As a resident of Kitsap County, I am appalled that a vaccine passport would even be considered. Not only is it discriminatory, it creates no certainty of safety. In fact, it can have the opposite effect of causing the vaccinated to lower their guard when the risk of contracting COVID-19 is still a very real possibility.

Many fully vaccinated people are still contracting COVID. Both my parents were vaccinated, but came down with COVID anyway. Being in a location with all supposedly vaccinated people does not mean you have any guarantee of not getting the virus and you can still pass it on to others.

Furthermore, the vaccine passport is an end run to attempt to force individuals to inject a substance into themselves and their children that they have refused. Or does 'my body, my choice' only a mantra for those who advocate abortions? Funny that it can be used to justify killing innocent infants, but is not accepted as an argument for those who want to protect themselves from possible side effects of a new vaccine.

Thank you for your time,
Kristen Black

Please do not impose a vaccine Passport.

Anyone who has not already been vaccinated by now will never consent to be vaccinated under any circumstances.

Be one of the enlightened public officials who recognizes that the serious damage that will certainly be caused to businesses and relationships among citizens will vastly outweigh any possible incremental benefits in promoting vaccinations or reducing Covid deaths.

Dear Keith,

I plead with you to stop the forcing of vaccinations in a free country and specifically in our county. You have a choice: to follow the politics or trust in the constitution and protect the freedoms of your fellow citizens you serve. It is absolutely wrong and against everything the country was founded upon to force this vaccination on fellow citizens.

In addition, to force free businesses to take this political stance and potentially hurt their opportunity, income and our local economy is ultimately shameful and wrong.

Choose the right path. Stand up for freedom and for the rights of every individual, including those who believe it is in their best interest to not get the vaccine now and/or in the future.

As a Christian, I want you to know that I am praying for you. May God give you His wisdom for this and every future decision.

Thank you for your service

To ALL voting Members,

Please do not vote for businesses in Kitsap County to require vaccinations for their employees. You were elected to represent all residents of Kitsap County and make decisions on our behalf. To require these vaccination against Covid is overstepping and violating our rights and freedoms. Let employers decide if they need to take drastic steps with their employees, We have a right to choose what we put into our own bodies and what not to put into them.

This is about the abuse of power and money.

Please do not let this requirement pass. Please let us keep our freedoms. Please let perfectly good employees keep their jobs.

Thank you for the work you put in to represent us.

Hello,

I am a citizen of Kitsap county and it has come to my attention that Kitsap Public Health is thinking about implementing a discriminatory policy of trying to require people to divulge private health status every single time they go into a public space such as a restaurant or movie theatre. I am appalled that our elected officials are even considering such a measure of gross government overstep and trampling of basic human rights. This goes so much further then 'two weeks to change the curve' or 'mask up' that I am at a loss for words. I will be praying for our all elected officials and all humankind. I am hoping that you will be able to reassure me that we are not walking toward tyranny in Kitsap County and I look forward to hearing how you plan to respect all basic human rights at a local level.

Best Regards,
Victoria

Subject: vaccine passports in order to access businesses

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Keith Grellner,

As a concerned citizen of Washington State I am writing to express my opposition to any and all vaccine status documentation requirements that are under consideration by Kitsap County.

Asking business owners to refuse goods or services, or refuse to allow admission to a customer is discrimination against the customer and infringes on the rights of private businesses. A vaccine passport violates our freedom of movement. A vaccine passport violates our rights to healthcare privacy. A vaccine passport will not stop the spread of Covid-19.

Becoming vaccinated is a personal decision made by each sovereign individual based on their own medical history, state of health, and discussions with their medical care provider. A governmental agency does not have the ability to know the circumstances and intricacies of each human, therefore it is unclear as to how a blanket mandate can take into account each individual's situation. A vaccine passport amongst an entire population results in clear discrimination and segregation amongst certain populations.

The available covid vaccines have not been fully tested and have not proven their efficacy. Are you aware of VAERS? -it is the Vaccine Adverse Event Reporting System.

<https://openvaers.com/index.php>

There can be complications with any vaccine, however the Covid-19 vaccine mortality rate is beyond all other vaccinations combined since data collection began.

<https://openvaers.com/covid-data/mortality>

The following press conference was released last week:
CAUSE OF DEATH AFTER COVID-19 VACCINATION
UNDECLARED COMPONENTS OF THE COVID-19 VACCINES
<https://pathologie-konferenz.de/en/>
Zoom conference, Reutlingen, Germany

"On Monday, 9/20/2021 in the pathological institute in Reutlingen, the results of the autopsies of eight people who died after COVID19 vaccination will be presented. The fine tissue analyses were performed by pathologists Prof. Dr. Arne Burkhardt and

Prof. Dr. Walter Lang. The findings confirm Prof. Dr. Peter Schirmacher's finding that among more than 40 corpses he autopsied who had died within two weeks of COVID19 vaccination, approximately one-third of those deaths were caused by the vaccination. Microscopic details of the tissue changes will be shown during the live-streamed press conference. Prof. Dr. Werner Bergholz will report on the current parameters of the statistical recording of vaccination events.

The press conference will also present the results of the analysis of COVID-19 vaccine samples by an Austrian research group, which are in line with the findings of scientists from Japan and the USA. Undeclared metal-containing components were found in the vaccine. Visually, vaccine elements are conspicuous by their unusual shape.

The results of the investigation have led to legal and political demands, for example, for the immediate collection of information by the authorities in order to be able to assess the health risk posed to the population by the COVID-19 vaccines. For example, early signals of impaired fertility in vaccinated individuals can be examined by consulting IVF registries. Through the cancer registry, insights can be gained into the development of cancer due to the genetic modifications of the viral RNA. Suspension of COVID-19 vaccination should be considered."

In closing, a fully vaccinated individual can still contract, carry, and spread the SARS-CoV-2 virus. Therefore, a vaccine passport will not stop the spread of Covid-19.

The very idea that Kitsap County is considering the implementation of a vaccine passport is abhorrent. If implemented, it will only foster a deeper societal division, create a society of segregation and encourage further dissonance and hate. A vaccine passport will do nothing to help stop the spread of Covid-19.

As a resident, a voter, a consumer, and a tax payer, I demand that you cease the discussion and BAN all vaccine status documentation requirements.

Subject: Do not destroy freedom of choice. Getting a vaccination is a personal choice not the governments.

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Dear Kitsap County Health Board,

The information put out early regarding how many deaths would occur throughout the COVID-19 Pandemic never became reality. Authorities have even said we have moved to an Endemic situation. What is the difference between the endemic of the yearly cold and flu season and that of COVID-19? We allow people to have the choice of getting a seasonal flu shot or not. How is this different now? Is the next step to require a yearly flu shot, two or three? Rather the number of deaths which have occurred from receiving the vaccination should be alarming.

A decision to require proof of vaccine ("passports") in order to enter businesses within our county is tyrannical and discriminatory. It is just as bad as that of segregation; a culture long ago deemed to be immoral. Such a decision is a violation of our country's basic freedom to not have any form of government interference in a citizens privacy of life and the pursuit of liberty, happiness and justice. What gives you the right to determine their freedoms is less important than others?

Freedom of choice was bought with a high price. There are thousands of veterans and active duty military people living in this county who made the sacrifice physically, emotionally and spiritually to fight for those freedoms so that all who live in the United States and Kitsap County can choose how to live their lives. Medical treatment is a freedom of choice for one's own body. Remember the slogan "my body, my choice?"

I hope and pray that you will open your eyes and see that such a decision only continues the escalation of destroying the American way of life. I urge you to choose carefully what you do as it will have lasting effects far beyond today. Thank you.

Sincerely,
Stevin Johnson

Subject: Comments For Sept. 28th Meeting

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

To Whom It May Concern:

I am writing concerning your September 28th meeting and the recommended actions listed within your agenda. While I understand the need to address the continued spread of Covid 19 and possible steps to be taken to protect the public I am concerned about the possibility of requiring proof of vaccination for entry into not only public but private facilities. This may seem like a simple decision but I assure you it is far from that. I am not alone in my belief that this would be wrong on many levels.

From the perspective of a business owner this is a bad idea! The burdens placed on businesses due to this pandemic are already unbearable. We have faced forced closures, limits to our capacity, difficulty obtaining supplies and the greatest employee shortage I have witnessed in my life. The possibility of yet another requirement burdening already struggling business owners would do more harm than good. Have you even considered the difficulty of implementing something like vaccine passport requirements? Have you considered the potential for confrontations with customers, the potential for discrimination law suits from customers with valid medical conditions preventing them from vaccination? Where would this leave businesses that offer services to young children who are not eligible for the vaccine?

From the perspective of a customer this is a bad idea! Mask mandates, limits on space, poor service due to staffing issues and bad weather making outside dining uncomfortable are just of the few of the reasons I have heard from customers as to why they are avoiding businesses. The thought of having to produce papers every time you want to enter a building would be a nightmare and a complete invasion of privacy. The other day while talking with a group about the possibility of mandated vaccination passports for dining out I heard it said, "Vaccination passport? I can eat at home and save money! Let's see who last longest!" This was not coming from an unvaccinated individual but one who valued his privacy and saw this as un-American. We already have laws in place protecting privacy of medical information. Vaccination passports require you to make this information public not to your boss (as many employers already require proof of vaccine) not to your school (as schools require vaccination records) but to anyone, in any business in the county. Assuming you are considering accommodations to those with valid exemptions you are now requiring them to publicly display their medical disabilities.

From the perspective of a citizen of this great nation this is bad idea! Benjamin Franklin said, "Those that can give up essential liberty to gain a little temporary safety deserve neither liberty nor safety." While no one wants to see the Covid 19 pandemic continue we must not forget who we are as a free nation. Despite your beliefs about vaccination we all must guard out personal liberties or lose them forever. Essentially requiring a citizen to produce their "papers" to move about the county, to go to work, to go to school, to go to the grocery store, to attend a church service is not the American way.

I urge you to think about what side of history you will find yourself on in making this decision. Will you be responsible for increasing the number businesses closing their doors in our county, will you be responsible for business owners and

customers taking their business elsewhere, will you be responsible for setting a precedent that leads to the loss of personal liberty. Thomas Paine recognized the importance of protecting even someone you disagree with from oppression when he warned, "He that would make his own liberty secure, must guard even his enemy from oppression; for if he violates this duty, he establishes a precedent that will reach to himself."

Thank you for taking the time to consider my comments.

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Dear Mr. Grellner,

I am writing to strongly urge you to not require vaccination for residents and visitors of Kitsap County. To differentiate between members of society because of their vaccine status is a form of discrimination. Requiring vaccines for entry into public places severely restricts one's ability to shop, dine, and carry on daily activities for those who do not get the shots.

Requiring employers and their employees to fulfill and enforce vaccine mandates/resolutions is unfair. More resources and personnel will have to be allocated solely to checking people's vaccination status, and there is (typically) no financial assistance from those making the mandates. Mandates will harm businesses and the economy when businesses lose employees who will not get the vaccine, and when they lose customers for the same reason.

Furthermore, requiring proof of vaccination does not take into consideration the immunity one acquires after having had the Covid infection, which is many times higher than the immunity of vaccination. Vaccine mandates also do not consider exemptions that are medically necessary or that violate people's consciences.

Likewise, mandates forcing those who don't want or won't or can't get the vaccine will result in job loss, which has multiple effects on wage-earners, their dependents, and the companies which lose employees.

The Board should strongly consider the cost of enacting vaccine mandates. Litigation will surely follow.

Vaccination should be a personal choice: it is permanent, and irreversible. The jurisdiction over one's body belongs to the self, not to the government.

Thank you for choosing to NOT require vaccination for entry into public places, for allowing the freedom of choice for Kitsap County residents, its visitors, the people of the State of Washington, and for everyone in this great country.

Sincerely,

Heather Friesen

Subject: Comment for Kitsap Public Health meeting

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Dear Keith Grellner,

I'm writing to comment in advance on the Kitsap Public Health Board's discussion of possible actions in response to the current surge of the Delta variant of COVID-19 in Kitsap County.

This new phase of the global pandemic has wreaked unbelievable local havoc on our healthcare systems, with sick and dying COVID-19 patients (most of whom are unvaccinated) filling ICUs and preventing many others from accessing urgently needed medical treatment.

A very vocal, very angry minority of Kitsap citizens have been misinformed by a massive onslaught of anti-vaccine and anti-mask propaganda. These folks may not understand the harm they are doing, but their willingness to help spread a highly contagious, potentially disabling or fatal disease presents a serious, immediate, ongoing challenge to the Public Health District, as well as to their own families, neighbors, and colleagues. And many, citing their erroneously selfish concept of "freedom," will continue to flout public health suggestions and requirements, even as more and more of their fellow citizens sicken and die from a preventable, highly contagious disease.

Anti-vaccine and anti-mask hardliners, at this point, present a danger to the public and to themselves.

As a Kitsap resident who cares about **all** my neighbors, particularly the medically vulnerable ones, I hope that every legal means possible will be employed to require the local eligible community to (a) receive vaccinations and (b) wear masks in public indoor and crowded outdoor settings.

Our region and our nation have a long history of vaccine mandates, enacted to protect public health - **and to ensure every citizen's freedom of movement and freedom to gather without undue risk of harm in public places.**

I am proud of my belief in freedom. But I also assert that "freedom" should not allow any one of us to endanger our neighbors and communities.

Thanks for your time and consideration,
Anne Mathews

Subject: Opposition to a COVID Vaccine Passport Program

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Mr. Grellner,

I learned today that Kitsap County leadership is considering instituting a COVID Vaccine Passport Program, preventing those unable to verify their medical status from entry to restaurants and other businesses.

As a long time resident of Port Orchard, with many friends, colleagues, and family close by, I wish to express my opinion on this matter.

I am deeply concerned about our county and our country when we consider and/or implement divisive, discriminatory policies against our neighbors, friends and family members. Our country is deeply divided on so many issues, and this is an opportunity to reach out and take care of each other vice force a one-size-fits-all solution.

I expect the impact of a vaccine passport will be devastating and far reaching in our community: it will degrade the emotional and mental health of those who are discriminated against (reminiscent of how the US has treated African Americans and also how US citizens of Japanese descent were treated during WWII); it will also be a huge financial blow to our local businesses who have struggled so greatly the past 18 months. And there will be more unintended consequences we cannot yet imagine.

We look to you as our county leader to build bridges and to support all of the people you represent. You, our representative, have the opportunity to think outside the box and show the citizens of our beautiful county your care for them. Focusing on treatments for people when first diagnosed would be a good start, in addition to providing the public with real, honest data and conversations, The mixed messages from the CDC and the fact that vaccinated individuals can both get sick from and spread the virus give the impression that a vaccine passport isn't as much about stopping the spread as it is to force people into making a medical decision that may not be in their best interest. And last, acknowledging the role of natural immunity of those who previously had Covid would build the trust the nation so desperately needs.

Thank you for taking the time to consider my opinions. This is a complicated issue that is a real test for us: in the end, will we decide to treat each other with dignity and respect, or will we mandate and separate?

Sincerely,

Julia Ratmeyer

Subject: Proof of Vaccination

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Mr Keith Grellner,

I wanted to let you know, as a Christian, health care provider, and resident of Kitsap county, I oppose allowing the Kitsap County Health Department to impose vaccine mandates on any business in Kitsap County. I also oppose a "proof of vaccine" requirement to access any businesses.

I have received religious exemptions at both of the healthcare businesses I work for as I believe the Bible is God's word and He tells us to trust in him. By mandating "proof of vaccine" to enter a business in Kitsap County, they will be denying my Constitutional right stated in the 1st Amendment.

Amendment I

Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof; or abridging the freedom of speech, or of the press; or the right of the people peaceably to assemble, and to petition the government for a redress of grievances.

I respectfully request that you and your office respect the Constitution of the United States of America, and make the honorable decision of not allowing "proof of vaccine" in Kitsap County.

Thank you for your time.

Sincerely,

Dr Elizabeth Kirbow

So do not fear, for I am with you, do not be dismayed, for I am your God, I will strengthen you and help you, I will uphold you with my righteous right hand.

Subject: 9/28 Kitsap Public Health Board Special Meeting Agenda

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Mr. Grellner,

I don't know your role in the subject meeting, but you are listed as the board contact and Administrator on the information provided to me. I sent the following message (with minor variations) to the list of meeting attendees:

I am a resident of Kitsap County and am adamantly opposed to mandating vaccines for anyone, and it naturally follows that I am opposed to requiring proof of vaccination for entry into indoor public places.

I have read Mr. Marrow's memo of September 28, 2021 attached to the special meeting agenda. The summary notes that the healthcare system in Kitsap County is severely strained. I personally know skilled health care workers in this county that are required to choose between receiving an injection or being terminated from their position. It seems like this is not being discussed and could also be a significant factor that is straining the healthcare system.

The public agencies that are tabulating data have lost credibility with me as the definitions are continually changing. Correct me if I'm wrong, but the current definition of a fully vaccinated person is anyone who is at least two weeks after their second injection. This allows many people who have received injections to be tabulated as unvaccinated. If those that have received injections but are not fully vaccinated are the primary cause of the current outbreaks then the premise of the discussion is false and recommendations 2 – 5 will only exacerbate the crisis being discussed.

I urge you to seriously consider alternative perspectives than those dictated by federal agencies.

I believe implementing additional draconian policies will not resolve your concerns with our local healthcare system and will likely make the problems worse.

Re: King County-style vaccine passports

Date: 09/27/2021

I am writing to express respectful, decisive opposition to the proposed restrictions which would require proof of vaccination to access public businesses in Kitsap County.

This is unsupportable as evidenced by the Washington State Constitution, which provides the following in Section 1:

“Political power is inherent in the people, and governments derive their just powers from the consent of the governed, and are established to protect and maintain individual rights.”

As the local boards of health are attempting to impose this requirement, a review of the duties of these local governments are enumerated here:

“Powers and duties of local board of health.

Each local board of health shall have supervision over all matters pertaining to the preservation of the life and health of the people within its jurisdiction and shall: (1) Enforce through the local health officer or the administrative officer appointed under RCW [70.05.040](#), if any, the public health statutes of the state and rules promulgated by the state board of health and the secretary of health;...”

Dissent of this attempt may be also supported by Secretary of Health Umair Shah, MD, in his statement, “counties and businesses can make their own rules about masking.”

In closing, as a subject of Washington State, I must strongly oppose this attempted imposition of the Kitsap County Health Department. This state derives its power from such subjects as myself. No business in Kitsap County ought to be compelled to entertain this imposition. Have we so ignored the essential statement found at the beginning of our State Constitution? Specifically, have leaders in our state chosen to ignore section 1 entitled Political Power? It reads, “All political power is inherent in the people, and governments derive their just powers from the consent of the governed, and are established to PROTECT AND MAINTAIN INDIVIDUAL RIGHTS” (Emphasis mine).

Respectfully,

Douglas S.

Subject: Opposition to Proof of Vaccine

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Dear Health Officer Grellner,

I am writing to express respectful, decisive opposition to the proposed restrictions which would require proof of vaccination to access public businesses in Kitsap County. As a resident of Port Orchard and a patron of businesses all across the Peninsula, I evidence the benefits to life and HEALTH that freedom of health choices gives, and each business owner and manager ought to be autonomous in these choices, just as patrons have NO legally-supported requirement to disclose health status.

This is unsupportable as evidenced by the Washington State Constitution, which provides the following in Section 1:

“Political power is inherent in the people, and governments derive their just powers from the consent of the governed, and are established to protect and maintain individual rights.”

As local boards of health are attempting to impose this requirement, a review of the duties of these local governments are enumerated here:

“Powers and duties of local board of health.

Each local board of health shall have supervision over all matters pertaining to the preservation of the life and health of the people within its jurisdiction and shall: (1) Enforce through the local health officer or the administrative officer appointed under RCW [70.05.040](#), if any, the public health statutes of the state and rules promulgated by the state board of health and the secretary of health;...”

In closing, as a subject of Washington State, I must strongly oppose this imposition under consideration by the Kitsap County Health Department. This state derives its power from such subjects as myself. No business in my county ought to be compelled to entertain this imposition.

Our county will be divided at levels we have never seen should this imposition be attempted. Proof of vaccine will widen this divide, not narrow it. Please allow citizens and business owners to lawfully continue in life, liberty, and the pursuit of happiness with YOUR SUPPORT. We need our local leadership.

Subject: Opposition to Proof of Vaccination for Access to Kitsap County Businesses

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Dear Mr. Grellner,

I recently learned that the Kitsap County Health Department is considering whether to impose a proof of vaccine requirement to permit access to certain businesses. I am writing to urge you to reject this course of action as it will serve no benefit while imposing significant economic costs on small and medium sized businesses that have suffered tremendously during the past 20 months. My reasons are as follows:

1. Studies show there is no difference in transmission and infection between vaccinated and unvaccinated populations so there is NO basis to treat them differently in group settings. As you know, unlike most vaccines, these do not prevent infection or transmission, so nothing is to be gained from this divisive policy.
2. Studies confirm that those with natural immunity/antibodies from having Covid-19 are the *least* at risk in terms of transmission or infection. Yet, such potential policies are unjustifiably not taking this into account. There is no basis for those with natural immunity to get vaccinated and to be discriminated against in such a policy.
3. Washington has already largely immunized its at-risk population so there is no basis to be more restrictive than we were earlier this year. Senior citizens represent over **80%** of Covid-19-related deaths and are over **95%** fully vaccinated, among the highest in the nation. Also, businesses have already invested significantly in improved ventilation, health measures, etc. and are much safer environments than last year. Finally, there is no scientific basis to conclude that these small businesses are spreaders.
4. This policy would only exacerbate the economic upheaval small- and medium-sized businesses have endured by slashing their revenues and imposing additional compliance costs, with no discernible benefit. The consequences will be devastating to business success, employment, and tax revenues, not to mention the citizenry of Kitsap County.

For these and other reasons, I urge you to reject this potential measure.

Thank you for your efforts and your consideration.

Sincerely,

Dennis J. Trittin

Dear Kitsap County Health Board,

I have lived in Kitsap County for 69 years, and my wife just a tad less. We shop at Kitsap's many stores and eat regularly at Kitsap County restaurants. We use local trade businesses for any work we need done, and all our medical providers are in Kitsap County. We rely on open accessibility to each of these. We ran a business for over 13 years in our fine county and so we know the dog's breakfast that mismanagement can make for a small business. It can choke businesses out. We fully understand the current circumstances with Covid and its variants. We do not think the answer is to require proof of vaccination for any persons or groups of people by making a recommendation or a resolution to do so, to create a proof of vaccination in our county. Ask the folks up at Callum and Jefferson county. I called one restaurant and they said the edict was killing their business. Doing this is onerous and adding another burdensome layer to the work governmental and private employers and employees already have to do in these difficult times.

In Kitsap County businesses, you would be requiring employees even in their teens to demand proof of vaccination for customers to enter their businesses. As an employer or an employee, this is a difficult burden to bear at any age. Requiring masks to enter businesses has already been and is still a difficult and very trying process. Adding proof of vaccination for citizens to function in Kitsap County society is way too much and strikes as being very controlling. There are also many who cannot get the vaccination because of medical issues.

Demanding proof of vaccination from citizens does not guarantee citizens will get the vaccination. You, representing us and then demanding this proof only serves to cause more divisiveness and mistrust in our leaders for the general public. We think this is a big mistake and will cause more problems than it will help. We implore you, please do not recommend or form a resolution to the Health District or to the cities you represent to require proof of vaccination to work in or to enter any businesses. Sincerely,

Brian and Teresa Olsen

Subject: URGENT - Concerned Citizen - Sept 28 Meeting

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Dear Mr. Grellner,

I write to you urgently as a concerned citizen of beautiful Kitsap county. It has come to my attention that there will be a meeting of the Kitsap Public Health Board tomorrow. I understand that the board will be deciding on whether or not to impose a "proof of vaccination" requirement for all indoor venues open to the public.

For the sake of my conscience, my future and the future of my children, I must implore that you do not let this come to pass.

The current statistics concerning COVID-19 clearly present evidence that even vaccinated persons still contract and transmit the virus (but have less of a chance of ending up in a hospital). So why the jump to forcing the freedom loving citizens of this great country against their own discretion concerning personal medical decisions? If we follow the science we should have reached herd immunity by now. Why require proof of vaccination for carrying out normal everyday activities? This is a severe and harmful overreach to the conscience of every individual in this particular nation that is founded on the principles of Justice and LIBERTY for all. These principles are written into our very Declaration of Independence. These principles have been fought for through bloodshed by our fellow countrymen and women.

Since when has personal and private health information ever been allowed to be put on public display? In Article 1 Section 3 "Personal Rights" of the Constitution of the State of Washington states: **No person shall be deprived of life, liberty, or property without due process of law.** Section 7 states **No person shall be disturbed in his private affairs, or his home invaded without authority of law.**

Would not this vile "show your papers" requirement be contrary to those sections previously listed? Or would you also be requiring law-abiding citizens to obtain and show that they are fully vaccinated for polio, hepatitis, rubella or measles as well? It is overreaching and not an equal enforcement of law.

A vaccine passport is unconstitutional, and a mandate is not a law. This is an incredible breach of privacy, and I again ask that you vote "No" to imposing a proof-of-vaccine for anyone. Such a thing would deprive persons of liberty, if not life. It opens the door to severe discrimination against those who do not have the correct "papers".

For that matter, will you yourselves be submitting yourself to a proof-of-vaccine? Or, like Congress, will you be exempt from your own rules?

Please keep Kitsap county as free as it can be and do not allow this injustice to pass.

Sincerely,

Mrs. Adams

Dear Director Klute,

I hear that Kitsap County is meeting tomorrow to consider a vaccine passport in order to enter businesses. I am respectfully asking you to argue against this gross infringement of our freedom.

It would be like a cop who uses unwarranted force while performing his job, to get his way. How does that work out in society? Who does he think he is, that cop? It is unjust.

I own a home in Kitsap County; I object to passports restricting freedoms within our county, state, and nation, of any kind whatsoever. They are not warranted by the circumstances. It is like amputating the entire arm when only the hand is infected.

Such “passports” are unprecedented in our country. But, not in other countries in history we both could name. Do you want us to be like them? Do you want to open the door to “show me your papers!”?

I object to the coercion of trying to hurt and shame a set of people with whom one disagrees. The entire body politic would be sickened by passports in order to enter businesses. Please argue against this illiberal, hyper-controlling and un-scientific policy and prevent it from happening on your watch.

Sincerely,
Deirdre Forman

Subject: Appeal To Reject Implementation Of Requirements To Show Vaccine Documents And Public Settings And Venues

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

To whom it may concern,

As a resident of Kitsap county for the last seven years, I am requesting that there be no prohibition and that you do not implement restrictions regarding admittance to public events, indoor venues and facilities, such as restaurants and gyms, small businesses, stores, including shopping malls, and grocery facilities.

We have lived with flu and many other communicable diseases such as HIV, tuberculosis, measles, hepatitis B, Ebola without exacting or implementing draconian measures such as those that are now being proposed. Presentation of vaccine documents and paperwork have never been required. Much more objective, logical, and reasoned consideration are warranted in this matter. It appears that there is a highly emotional component to actions that are being suggested.

I want to be perfectly clear and transparent that I am not an anti-vaxxer, nor have I ever been. I worked in healthcare in a major regional hospital in Renton, WA for almost 20 years as a healthcare provider. I always took the vaccinations (annual flu shot, hepatitis B, tuberculosis test, and other vaccines). My children also have had vaccines suggested by school and government.

Subsequent to my above appeal, I am also requesting Demand for Religious Exemption from Covid-19 Vaccination.

Based on my understanding of Title VII of the Civil Rights Act, the First Amendment to the United States Constitution, and other federal and state laws, I choose to exercise my right to demand a religious exemption to the requirement that I be vaccinated using the Covid-19 shots. This demand for an exemption is based on my deeply held religious beliefs pursuant to my reliance on teachings in the Holy Bible.

The Bible says, "Remember it is sin to know what you ought to do and then not do it" (James 4:17 (NLT)). My personal convictions are inspired by my study and understanding of the Bible, and personally directed by the true and living God. I am personally convicted that I should not receive any of the three Covid-19 shots.

It is not my responsibility to force my personal religious convictions regarding this matter on other persons as I believe whether to receive a Covid-19 shot is a personal decision to each person (Romans 14). Where scripture does not expressly instruct on a particular matter, I believe that I am required to search the Scripture myself for related truths (Romans 15:4) and to seek personal guidance from the Holy Spirit (Acts 2:38-39; Romans 8). If I fail to submit to the personal convictions that the Holy Spirit and Scripture has impressed upon me, I will be sinning against God. I have personally searched the Scripture and sought guidance from the Holy Spirit to come to my decision.

The Bible states that the body is the Temple of the Holy Spirit. We are commanded to take good care of

it, not to defile it, and certainly not introduce something into it that could potentially harm it (1 Corinthians 3:16-17, 1 Corinthians 6:19-20, 2 Corinthians 5:10, and 2 Corinthians 7:1).

The Bible also outlines the fact that God created the body both "fearfully and wonderfully." (Psalm 139:13-16). The Covid-19 shots work as gene therapy. By manipulating genetic operations, the Covid-19 shots alter what God made (literally assuming the position of God), which I believe to be a sinful practice under these circumstances. These vaccines (by the very disclosure of the vaccine manufacturers) contain carcinogens, neurotoxins, animal viruses, animal blood, allergens, and heavy metals. As the Covid-19 shots have not been subject to longitudinal research, I do not believe it would be right for me to introduce these substances into my body because they have not sufficiently been proven to me to be safe and effective. Rather, I believe they may be harmful to my body.

The Bible tells us "Then God blessed them, and said, Be fruitful, and multiply. . . ." (Genesis 1:28). In direct conflict to this order from God, taking the vaccine has been shown to cause serious and lasting damage to the reproductive ability of both women and men. Respected virologists, such as Biochemist and Molecular Biologist Janci Chunn Lindsay, PhD, and Virologist William Gallaher, PhD, have discussed the plausibility of the concept that, "Covid vaccines will cross-react with the syncytin and reproductive proteins in sperm, ova, and placenta, leading to impaired fertility and impaired reproductive and gestational outcomes."

It is worthwhile to provide some context to these assertions by noting that COVID-19, being untreated, has a survivability rate of 99.98% under 50 years of age. Over 50, the survival rate is 99.5%. These are numbers provided by the CDC. This continues to lend credibility to the fact that it would be sinful to seek to undertake a superfluous procedure when the risk of death is substantially low. Therefore, based on guidance from the Holy Spirit and the Holy Bible, I cannot conscientiously take the covid-19 shots under these circumstances.

Perhaps the most notably significant reason why the acceptance of these vaccines would be considered sinful centers around the fact that fetal stem cell lines from aborted babies were used in either the initial development and/or testing of the covid-19 shots. By receiving the COVID-19 shots presently available, I believe it would constitute a complicit action in the act of abortion. I believe that abortion is murder and is strictly prohibited in the Bible (Exodus 20:13; Psalm 139:13-16; Jeremiah 1:5; Isaiah 49:15). Psalm 127:3 says that quote children are a heritage from the Lord, offspring a reward from him. " The fact that aborted stem cells were involved in the origination of the three covid-19 shots make the consumption or inoculation of this vaccine into my body an unthinkable act to me.

Therefore, I choose to exercise my right to a religious exemption from the COVID-19 shots.

My religious beliefs are sincere. Legally, I cannot be required to prove that a church or religious leader agrees with my sincere religious beliefs, or my interpretation of scripture, or my instruction from the Holy Spirit, my beliefs are my own, and they are sincerely and deeply held.

Subject: vaccine requirement?

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

To whom it may concern,

I am writing to let you know that mandate vaccines for entering businesses is discriminatory. I am appalled that you would even consider this requirement? This in fact goes against our constitution and our fundamental rights as humans. What if someone CANNOT take the vaccine due to already underlying conditions? Some people have been told by their doctors that taking the vaccine would cause severe medical problems. So, because that individual is trying to live his healthiest life, are you willing to sacrifice that person for the good of many? Are you saying that that person has no voice? That person has no choice? Since when should the government control things such as dining and shopping? We already wear masks, and stay socially distant apart? Now, you are trying to enforce another law? This literally breaks my heart! I love my small community, and kitsap county and this will indeed tear it apart. Please consider "choice." Please consider businesses who don't want to be a part of the mandate. Please consider our children and the future of our communities. Yes, I do know how real this virus is! I have had very ill family members AND THEY HAVE ALL SURVIVED! THIS VIRUS WILL BE AROUND VACCINE OR NOT! I implore you on behalf of the many, DO NOT DO THIS! We are a republic with choices, we are not a Marxist/Communist nation run by the elite few. Again, please consider choice OVER mandate.

Sincerely,

Charisse Bryant

Subject: Vote NO - No vaccine passports

[CAUTION]: This email originated from outside Kitsap Public Health District. Do not click links or open attachments unless you are expecting this email. If you are unsure please contact IT.

When I was outside your offices last June with my SUMBIT THE VARIANCE sign - did you ever think you'd be asked to make a decision like this? A decision that would target an otherwise healthy population of your fellow citizens to prevent them from engaging with others freely? I bet in June 2020, if someone had suggested that one day the overwrought COVID response would have you targeting healthy citizens and preventing them from engaging in commerce, livelihoods, and socialization because they "couldn't show their papers" - you would have thought THAT was an overwrought and slippery slope argument that would never happen. But here we are.

Vaccine passports do not stop COVID from spreading because these vaccines to-date are not sterilizing vaccines. Vaccinated people can catch and spread COVID. COVID doesn't care if someone shows a vaccine passport.

Vaccine passports are simply punitive to those who've made the difficult decision to not get vaccinated for personal, medical reasons. Consider, an unvaccinated person with transmissible COVID is MORE likely to know they are ill and stay home than a vaccinated person who maybe doesn't feel as badly because they have their vaccine immunity helping them out but can show a passport rendering the supposed benefit of passports moot.

Vaccine passports make our businesses unfairly responsible for becoming part of the executive branch of government. This is too much to ask of our business community. I cannot stress enough that it is both dangerous and illiberal. Businesses are not the police and the police have better fights to fight.

Vaccine passports hurt our friends, businesses, and tax base with regards to time, resources, mental & community health.

Vaccine passports do not account for natural immunity which is a thing that actually exists for a lot of people and provides a more broad and robust defense against COVID spread.

Vaccine passports, once implemented, will be even harder to un-implement - see slippery slope argument from 2020.

For reasons involving both science and logic, vaccine passports should not be instituted in Kitsap County or anywhere.

Dearest Sirs & Madames,

You know how crazy people are who are antivaxxers & antimaskers: Like with airline passengers where they go nuts more & more.

You see the exponential rise in violent crimes across U.S. cities, like Portland, particularly with shootings & mass shootings. While there may be no real evidence to point to such rising violent crime rates stemming from all the rhetoric, confusion and so forth related to COVID, my argument is that the link is nonetheless real. People are more prone to turning to violence when they're upset over politics and the like, such as with Trump inciting the January 6th riot.

Then there is the rising suicide incidents, maybe particularly among young girls. Do you want your daughters, or your neighbors daughters, to be more compelled to kill themselves over your nonsense for invoking proof-of-vaccine requirements, particularly when vaccines don't stop spread of the virus anyway?

The point is that the more you push the envelope here with this type of garbage nonsense, then I firmly believe you will see rising violent crime more & more in your area, including suicides. And when that happens, it will be stemming from these various issuances like proof-of-vaccine mandates. People are turning violent over simply wearing a mask. And they WILL turn violent over being forced to show proof of a vaccine, including to turn violent over being forced out of businesses for not complying with such a requirement. It will happen!

Then CDC Director Rochelle Wolensky admitted a few weeks ago in a broadcast that vaccination doesn't stop spread of the virus among vaccinated persons to either unvaccinated ones, nor amongst those who are vaccinated, as in so-called "breakthrough" infections. So what good is the vaccine if it doesn't stop spread?

Sure, the vaccines look to lessen severity of illness following a subsequent infection, but that's not stopping the virus from moving around. They (anyone) is lying to say that by virtue of being vaccinated it protects others from infection. That's apparently not true and Ms. Wolensky confirmed it's not true.

The definition of the term "vaccine" used to mean to stop a virus in the vaccinated person, but the CDC changed the definition in the case of COVID to mean that it offers "protection" against severe illness, which is not the same as stopping it.

But let's be reasonable about the so-called "asymptomatic" hypothesis: For instance, I'm not allergic to pollen, but if pollen is in the air, then it WILL deposit in my nose & throat the same as for anyone who is allergic to it. So if you took a

sample and found pollen in my nose, would that make me asymptomatic to hayfever? Well, it would if you are using the same logic being applied to suggested asymptomatic COVID infections.

And that's the logic being used with COVID: If you're vaccinated then it should offer protection from severe disease, or maybe to prevent disease, but if COVID is in the air the same as pollen is in the air (and we know it is), then it WILL get in everyone's nose vaccinated or unvaccinated who breathes it in. That's WHY the asymptomatic argument is such B.S., because it suggests that simply having it in your nose means your technically sick with the virus.

And that's hogwash! I haven't had a flu vaccine in 43 years; and the last time I was ill with the flu in the past 43 years was in 2013. But for the remaining 42 years, there is NO WAY that I didn't come into direct contact with flu virus, in which case it was up my nose despite not making me ill.

So I would have been a carrier of flu (or am a carrier anytime it's in my nose), but if flu virus is in the air then the flu vaccine won't stop the virus particles from landing up my nose. This is simple logic, very simple & pragmatic science. It's not rocket science.

So you getting the COVID vaccine for instance will NOT prevent the virus from freely landing up your nose either; and consequently you will be able to spread it around the SAME as if you were unvaccinated. Personally, I won't get the COVID shot largely because of all the many hundreds of thousands of severe "vaccine injuries" being reported to the VAERS system. I'll take my chances.

I'm 60 years old. I'm wealthy. And I've had a good life. If COVID kills me then so be it. I'll just choose to die at home in that case rather than going on a ventilator and taking up a precious ICU bed. But it's my choice nonetheless. I don't want the risk of the "other" side effects from the vaccine. And being vaccinated in any case won't stop me from carrying it around as long as it's in the air and I'm breathing it in.

I do engage some unique practices to protect myself from COVID and even flu: Perhaps most importantly is that I disinfect my nose & throat daily with hydrogen peroxide (H₂O₂) by gargling with a 1:1 dilution ratio of 3% H₂O₂ to water and by spraying a 1:6 dilution up my nose. I've been gargling with it for 30 years in place of regular mouthwash, but only started spraying it up my nostrils (with a spray bottle) about nine months ago due to COVID. (I spray it up my nose twice in a row every morning.)

And if YOU are not disinfecting your nose with H₂O₂ on a daily basis the same as I do (which you probably aren't doing), then I will bet you your annual salary that you test positive up your nose long before I do. Personally, I don't think I'll EVER catch the COVID virus in view of some of these different things I do. I also eat a lot of hot peppers (for the capsaicin content), but that's another hypothesis I have that I won't go into here.

The H₂O₂ idea isn't a hypothesis or even a theory: Hydrogen peroxide kills ALL viruses. There isn't a virus it won't kill. That's been proven.

So if you don't want the vaccine, then consider the H₂O₂ and even to ingest a fair amount of capsaicin daily. But obviously, I think a game plan is needed for those not willing to get vaccinated, otherwise they will most likely catch a bad case of COVID sooner or later.

I don't think I will catch it. I really don't. I don't avoid situations where it's likely I could catch it, but it just doesn't happen. And again, I'll bet you good money that I test negative over & over & over again FOREVER compared to anyone not using hydrogen peroxide the way I do.

Read this article below at the footer from the [NIH.GOV](https://www.nih.gov) website, published way back in April 2020, which actually recommends use of H₂O₂ as both a gargle & nose spray for active or presumed COVID infections. (It doesn't mention use of H₂O₂ as a preventative measure one way or the other, which is obviously how I use it.) Then ask yourself why Dr.

Anthony Fauci never mentions anything about "disinfecting your nose with hydrogen peroxide" despite that he is at the head of the NIH where this article was published.

Ask yourself that! And stay safe...

Best regards,

James Bone

Subject: Urgent email from the Director of Crunch Fitness Silverdale

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Dear Keith Grellner,

My name is Derrick Means. I am the General Manager of Crunch Fitness here in Silverdale. I believe we spoke on the phone a while back and you were of the impression that "Crunch Fitness Silverdale, with their safety protocols, mitigates the health concerns of the public better than big-box stores." It was your recommendation on that topic that kept my facility from being closed for the 3rd time in 2020.

First, I want to thank you for the office you hold, and for your service to me as a citizen of this wonderful County. I know what it means to serve others with my work and with my life. Every day I am in charge of 3,800 members that I lead in such a way as to keep them motivated when they feel like quitting. They are tired, they are burdened, they are running on empty right now. I come in every day and I carry the weight of all the members and all my numerous staff. I see it in the faces of people applying for jobs every day that I interview. A chance to be a part of the healthiest environment in the County, under my care and leadership.

I have changed a lot of lives here in the two years I have run this facility. Pre-covid, during, and post-covid. I have relentlessly been the face of positivity, of courage, of emotional control, and I have had days where I went home and almost cried from carrying so much for my community through the change, the rules, the uncertainty, and even being laid off during closures many times.

Undoubtedly I have the cleanest and safest fitness facility in the County. We use electrostatic disinfectant guns, employ two full-time janitors, and each staff member rotates cleaning every 15 minutes. I also enforce the mask policy and walk the floor every 20 minutes to ensure that it is followed. You do not see this in other businesses. It is very saddening to have to put a mask on while running and sweating but my members do it anyway out of respect for me, out of peace in the face of chaos, and because I have them believing we will get through this together, the masks mandate won't last forever. But each promise I make to them I keep having to break. The rules get tighter, people get upset, and I get the blunt end of it, financially and emotionally.

I am writing to you to tell you that if you require proof of vaccination to enter this gym or ask that my staff get the vaccination as a condition of employment that, sadly, the smiling staff faces that 3,800 people in this community enjoy told me they would quit. Members would cancel. So you see, the very force that is striving 7 days a week as a beacon of health, cleanliness, and relentless togetherness would unravel, and these staff would leave, and the people getting healthy in our community would stop coming. It would be counter-productive in our small county to require this of us at this time. I have loved my staff and been by their side through all of this. I have worked hard to earn his job. I employ a lot of people and they would quit if this was forced upon them, burdening the State, burdening me, fueling more unrest in our peaceful, beautiful County.

Please consider the option to "Take no action at this time and not require proof of vaccination to work or shop at this amazing facility, of our staff, of our members, this community, this wonderful County." Most people in this area are already vaccinated and also the vast majority wear masks.

Thank you for your consideration.

-Derrick Means

9/27/21

To The Following: Keith Grellner RS, Gib Morrow, Robert Gelder, Becky Erickson,

In your official elected and appointed capacities, we are requesting, as voters and residents of Poulsbo and Kitsap County, that you vote against changing any mandates and government requirements concerning the vote on 09/28/2021 at the Kitsap County Health Board meeting (and/or any changes in the date) on Covid. We request a vote of "#1 as taking no action and allow the current situation to play out" at the present time. There are too many changes on a daily basis presently and to require identification and/or proof of vaccines for any reason will go against our citizen rights and responsibilities. It can have more of an affect on health and welfare in negative ways especially considering the overall statistics of the virus in the County and the variety between areas. One answer does not answer all areas or concerns within subsets of the County and has led to major problems within other countries and cities/states. It will have more negative consequences on our growing County and it's residents. I am a counselor and have dealt with many people's concerns during this year and a half. Please vote for not taking any action and letting the situation play out. We live in Poulsbo and District 1.

FYI,

The Kitsap Sun is reporting a decline in COVID 19 cases.

https://www.kitsapsun.com/story/news/2021/09/27/gda-covid-19-state-2021-09-27-wa-pbks/118953386/?fbclid=IwAR1fc_KMWa5TN8fjmR7bk0hgpwXR61Vo2jwrlVhWOamru-RUdD8xjOGJxl

Dear Officials,

I am writing to you in hopes that you are being led by a true desire to serve the people. If you are then please read this. I am against vaccine passports. As a BIPOC, I can tell you how disgustingly racist vaccine mandates and passports are-even the leaders of Black Lives Matter and Native Lives Matter have vehemently denounced them.

As a Historian pf World War II, I can tell you that requiring citizens to show a vaccine card or be denied entry into places outside of their homes is eerily resonate of fascism.

Lastly, I have to wonder why this meeting is closed to we, the people- when it concerns us so intimately.

True statesmen and stateswomen are led by God and do what is right for the people even when it means pissing of their peers. Oppression is never right.

God Bless you all.

Sincerely,

E. Gonzales

Subject: NO on proof-of-vaccine requirement

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

I understand that the Kitsap County Health Department will consider whether to impose a proof-of-vaccine requirement to access businesses in Kitsap County in the Tuesday meeting. I urge you in the strongest terms to not impose such a mandate for reasons that are summarized below.

- Vaccines have had no long-term testing on humans to understand long-term effects. Descriptions by credible scientists and doctors as to how the vaccine can target the body's organs are a basis for my opposition to being injected.
- The number of deaths caused by the vaccine far surpass the total from all previous vaccines approved in the U.S. I do not see any research to determine what characteristics make one susceptible to being killed by the vaccine. Therefore I refuse to participate in a mass, one-size-fits-all injection program.
- A proof-of-vaccine program does not take into account an individual's natural immunity. I am healthy and have a healthy immune system. It appears that I have natural immunity so the program is not appropriate for me. Evidence exists that a vaccine injected into a person with natural immunity actually harms that person's immune system.
- Of greater societal importance is the fact that I am a free-born American who has the intelligence to understand the meaning a 99.9 percent survival rate for those who contract the virus. Those who most strongly push for government imposition of mandates are the same ones who hide inconvenient data, spread disinformation, and demonstrate their tendency toward tyranny.

Subject: Tuesday's Kitsap County Health District meeting on citizen's proof of vaccination

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Dear Kitsap County Health Board,

We have lived in Kitsap County for 68 years, 55 years and 28 years respectively. We shop at Kitsap's many stores and eat regularly at Kitsap County restaurants. We use local trade businesses for any work we need done, and all our medical providers are in Kitsap County. We rely on open accessibility to each of these.

We fully understand the current dire circumstances with Covid and its variants. We do not think the answer is for you to require proof of vaccination for any persons or groups of people by making a recommendation or a resolution to this effect to the Kitsap County Health District.

- Doing this is onerous and adding another burdensome layer to the work governmental and private employers and employees already have to do in these difficult times.
- In Kitsap County businesses, you would be requiring employees even in their teens to demand proof of vaccination for customers to enter their businesses. As an employer or an employee, this is a difficult burden to bear at any age
- Requiring masks to enter businesses has already been and is still a difficult and very trying process.
- Adding proof of vaccination for citizens to function in Kitsap County society is way too much and strikes as being very controlling.
- There are also many who cannot get the vaccination because of medical issues.
- Demanding proof of vaccination from citizens does not guarantee citizens will get the vaccination.
- You, representing us and then demanding this proof only serves to cause more divisiveness and mistrust in our leaders for the general public.
- We think this is a big mistake and will cause more problems than it will help.

We implore you, please do not recommend or form a resolution to the Health District or to the cities you represent to require proof of vaccination to work in or to enter any businesses.

Sincerely,

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Hello Mr Grellner,

I am writing to express my concerns and to offer my opinion as a Kitsap resident in regard to your special meeting of 9/28/2021.

First, I want to say that I am NOT an anti-vaccine person. I am recovered from Covid, with natural antibodies. There is no provision in your plans or me! Four of the options do not address those who have had Covid and recovered, only the first option keeps my freedom to come and go as I please.

How in good conscience can you dictate for me to be vaccinated? Especially since the efficacy of the vaccines are known to wane over time. Right now, there are many breakthrough cases, in fully vaccinated individuals, who with a card can still have freedom to access any business they choose. I think that is discrimination.

This pandemic is not going to stop because you say we need vaccination cards. (not with this vaccine that is only a prophylactic) There will be variants that continue to challenge us for many years. When the virus mutates, and immune escapes, are you going to mandate what shot allows freedom? When is it going to stop?

Subject: Health board Meeting for Sep 28, 2021

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Hello,

I am writing since our questions/comments will not be taken tomorrow.

First, I would like to point out that science shows that the unvaccinated are no threat to the vaccinated. Forcing employers to make their employees vaccinate in order to keep their jobs is a major violation of their human rights to decide what goes into their bodies. It is immoral to make people choose between getting vaccinated and being able to make a living to support themselves and their families. Lets not forget to mention that vaccination requirements are very prejudice against those who cannot due to medical or religious purposes. By pushing a mandate that would require proof to work or to attend public spaces, you are knowingly segregating those with religious convictions which is a direct violation of the First Amendment, and medical issues which is a violation of the Americans with Disability Act. What about those who have immunity because they already had Covid and have the antibodies? They shouldn't have to come up with proof if they are trusting their immune system to do its job. With that said, we are all adults and do not need any entity to tell us how to protect ourselves. We are washing our hands, we are wearing masks, we are social distancing, some of us are even getting vaccinated. Those who are vaccinated should be confident in knowing they are protected. Those who feel threatened or worried even though they are vaccinated should take extra precautions. The whole point of getting vaccinated was to protect those who cannot get vaccinated. Businesses should not require proof of vaccination status for entry into indoor public spaces for several reasons. As mentioned above, it is prejudice. It will only hurt businesses and employees more, which in turn will hurt our local economy. People will be out of work, not because they are not vaccinated but because you chose to force businesses to impose on the public's personal choices. Businesses will also be extremely short staffed (like they are now-but worse) so small businesses will most likely have to close permanently. Large businesses will either struggle or leave and in the end, this decision killed our local economy. WE are the ones who make businesses money, not the other way around. I know plenty of people, vaccinated and unvaccinated, who will no longer spend money in places that make requirements such as vaccination status proof because it is a violation of peoples medical privacy and we do not agree with segregation. It needs to be understood that those who wanted to be vaccinated, already are. Those who are being coerced into getting this vaccine to resume normal rights in our own home towns, are basically being medically raped. If we wanted to live like King County, we would move there. We love our county and would like to live as free citizens. So many local businesses and employees suffered due to the shut downs, this will only hurt them further. Let those who want to wear masks and get vaccinated do so, it is their right as American's living in a free country. Let those who do not want to wear masks or get vaccinated live their lives equally as free to choose as well. When did it become okay to dictate what others around you HAVE TO DO to accommodate you and your personal wants/needs? Will you ban smoking everywhere since second hand smoke also kills? Probably not. It is okay to help guide us with information and resources, but it is not okay to force us. Vaccine passports will, without a shadow of the doubt, kill our local economy.

Respectfully,

Keith Grellner

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

I rarely get involved in local politics, but this upcoming meeting has ramifications that affect me professionally and personally. I read the agenda for the meeting, and I was taken back by two specific policy decision being weighed.

- 1) Make a formal Health Board recommendation/resolution for all private businesses to require vaccination for their employees and/or require proof of vaccination for entry into indoor public places.
- 2) Issue a formal Health Board/Health Officer order under RCW 70.05 to require all business open to the public, or indoor venues open to the public, to require proof of vaccination for entry.

In both cases you would be severing the relationship between consumers and businesses simply because they chose not to be vaccinated. Think about the damage this would cause to the local business community and then also think about the lawsuits that would come from not allowing someone to enter a grocery store to buy food! I have kept my business in Kitsap County for almost 30 years and have several employees. I can tell you that if these mandates become law, I would not hesitate to move everything out of this area. You are dealing with very delicate and important issues that need to be considered through discussion and not in a closed office. I hope you make the right decision.

Subject: Vaccine Requirement

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Hi Keith,

I wanted to let you know that I strongly oppose the Kitsap County Health Department imposing a "proof-of-vaccine" requirement to access businesses. I work in healthcare, and advocate for all people to be empowered to make the choice to care for their bodies. Requiring a vaccine to enter businesses is bullying behavior, and it violates our constitutional rights to be free of discrimination. You do not have my support for this, and many, many people stand with me. They are vaccinated and unvaccinated, healthcare workers and people who work in every sector stand with me. Be warned--we are not a statistic, we are not data to be moved around. We are real people with souls, with families, with values. We want our voices to be heard. We trust you to be a leader in our county. Don't disappoint us.

I see that several vaccination mandates are being considered.

Please remember that even with the best of intentions, government should be very hesitant to mandate actions to adult citizens.

While I chose to be vaccinated, others, for reasons important to themselves, have made other decisions. Please do not try to impose vaccination or shopping mandates. You will exacerbate the situation of having qualified help to businesses and government, and you will cause shoppers to go to other counties or shop on-line, causing problems for already-strained businesses.

You should also be cautious of the "slippery slope" here. The flu season will soon be upon us. Are you going to impose the same requirements for flu vaccinations?

Respectfully,

James Sykes

Dear Sir,

If I could attend this meeting in person I would tell you that this Forum is not Freedom. Do not make judgement on this Agenda without Community Involvement. The Governor's Mandates over the past 1 1/2 years have been very difficult to survive, not only as a business, but as a human being. A decision to require a Passport to enter a privately owned business will surely be the demise of many Law Abiding, Tax Paying Citizens who have been completely burdened through the Covid-19 Shutdowns, and Recovery Stages Placed by Government Leaders.

Freedom - The power to do what you want to do: the ability to move or act freely - the state of not being a slave, prisoner, etc- the state of not having or being unduly hampered.

Our generations of dead soldiers died for our freedom...

LET FREEDOM REIGN

AMERICA LAND OF THE FREE

Subject: Public Comment for 9-28 Agenda

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

c/o Mr. Grellner
Executive Board Members,

I write to provide opposing public comment regarding the September 28th Health District agenda. The agenda appears to be suggesting or proposing vaccine mandates or passport style documentation on private businesses and in effect a restriction of movement and free access to services on the general citizenry if unvaccinated.

As you are aware President Biden as well as our Governor have begun a push to force employers and citizens to submit to vaccinations, a medical procedure. The President has stated the regulation and enforcement at the federal level will be OSHA however that entity last checked has not created the rules, regulations or what the process of enforcement shall be.

Reviewing many HR related documents and legal analysis regarding vaccine mandates it appears that exemptions for a vaccine mandate by an employer also requires the employer to provide for an exemption process for sincere religious, medical or other exemptions and accommodations to be made. What accommodation is to be made for natural immunity due to prior healed infection and for how long? It doesn't appear that the health department nor the State with all their resources intends to provide approved legal exemption documents or to help create a known approved path for these exemptions. That leaves the burden of attempting to figure out a legal pathway for compliance and the legal expense for such on local businesses. It also seems to leave the mandating business in the liability line for any vaccine injury litigation. In the best case the employer is left with a Workman's Comp claim to damage their experience rating.

I do understand the cities and counties moving towards vaccine mandates as a precaution for their own employees as employers as they control the decisions, processes and a portion of the rulemaking ability towards those mandates with many attorneys on staff to handle litigation. If our local governments loose in court they simply transfer the cost to their risk pool or the public but if a small business loses in court many times they are bankrupt or severely financially damaged.

Let's be real, small businesses in our county have been forced into the position of being the enforcers and police for government regulations and mandates issued by the government at various levels or been subjected to fines and harassment by the mandators, a horrendous transfer of liability, cost, risk and burden. Many of those small businesses haven't survived the first round or are still dealing with the fines issued while trying to survive. Many are just starting to financially recover.

I will also mention that the enforcement of those mandates so far has been discriminatory in enforcement with evidence

of the local government employees under the control of the health boards elected officers not given the same punishments or fines issued to private citizens and small businesses. Your own police, fire and public works workers have violated the mandates with evidence sent to each of you which from the best can be seen from a public view has gone with a blind eye. If the executive board is unable to control the behavior of their own employees during these mandates, how can they in good conscience move to create additional burdens on others? Why are the mandates, fines and enforcement only for the citizens and small businesses?

I have taken the time to review the data sets provided by the Kitsap Health District which seems to avoid portions of the data to the citizens or at least can't be easily located. Specifically, the data relating to infections and outbreaks by industry is illusive so current outbreaks and where they are happening in detail is not meaningfully addressed. Data relating to the healed seems not to be given so citizens have no idea how many are currently infected or contagious. How is a citizen of Kitsap to be informed on the actual current size of the current contagious and where the problem is surging? Lacking specifics on the outbreaks in Kitsap I resorted to using a much better data set presented in King County which seems to point to some alarming areas of concern. [COVID-19 outbreaks - King County](#) The homeless shelters seem to be a higher outbreak area than eating establishments. Has Kitsap County focused Human Services and the Health District at the homeless population and those receiving services funded by the taxpayer? Have there been vaccine clinics at the meal service points for the homeless like the Salvation Army in Bremerton? Has there been outreach to the homeless camps in Kitsap by the Health Department? Have temporary shelters and the Crisis Triage went to a model of vaccines for service? Has Kitsap Mental Health Services gone to a model of vaccines for service yet? Have the social services available in Kitsap been placed under the same scrutiny as small businesses with the same mandates and repercussions for noncompliance?

As our President floods our nation and our communities uncontrolled with waves of illegal and legal immigrants from Haiti, Afghanistan, Mexico and other areas being released without vaccinations, how many immigrants served by KIAC in Kitsap are going unvaccinated? My statement is not to target immigrants as a discrimination tactic but to more point out areas that the health district may not be addressing while pushing mandates on select sectors and small businesses.

Who will be your enforcers of any issued vaccine mandates? If it is the area code enforcement or DCD departments then who will make sure permits and inspections are issued in a timely manner? If it's the Police and Sheriff's Office, then who will augment our already short-handed officers to ensure public safety doesn't decline? If it's L&I then how exactly will the state enforce a local mandate? Are these mandated enforcements to be pushed on small businesses again without compensation for enforcement. If that is the case, then it should be viewed as a theft of services and a drain upon small businesses coffers that have already been overburdened. Who enforces any mandate issued from the local ivory towers of government who can't even get us proper government mandated and government contracted garbage recycling services restored?

In closing I would ask that you keep in mind exactly how many payroll checks or benefits each of you on the Executive Health Board or your employees and stakeholders imposing mandates have missed while meaningful help to private businesses has been delayed, denied or simply is unavailable. Small businesses have been destroyed while government coffers have been filled and first responder parades held. Mandates create financial grief and legal risk for small businesses of which your personal or government entity risk is not the same.

Subject: Kitsap Public Health Board - Special Meeting - Vaccine Mandates - 28SEP2021

[CAUTION]: This email originated from outside Kitsap Public Health District. Do not click links or open attachments unless you are expecting this email. If you are unsure please contact IT.

Mr. Keith Grellner, RS

As a vaccinated Kitsap County resident and voter, I wanted to voice my concerns to the Kitsap Public Health Board and the Kitsap County Commissioners regarding vaccine mandate deliberations. I strongly recommend no further action and let the current situation play out.

I understand there is currently a significantly high impact on our medical treatment centers due to the Covid variant(s). I also understand you probably feel the need to do something to alleviate the issue as a community leader. What's not being discussed as far as I can tell are the negative impacts a mandate will cause with respect to the ability of our community to function somewhat efficiently. We are and will continue to experience negative impacts of this pandemic for years to come based on what's happened the last 19 months. I fear a mask mandate will add complications and step onto that slippery slope for more government control under the justification of public safety. At some point we need to stop moving the goal posts with regards to this pandemic.

Do we really need a government enforced mandate which places individuals in conflict with their personal beliefs, convictions, and ability to live their lives? Won't this create another crises on top of the Covid crisis? Is the resulting confusion and frustration as businesses try to enforce this mandate or receive penalties, worth whatever benefits a mandate is expected to produce? Will unvaccinated individuals who have already had Covid be forced to get a vaccine when they already have superior protection? I believe there are too many questions which need to be answered before another restrictive mandate is enacted.

I personally chose to receive the vaccine after weighing the pros and cons as an individual. I'm not against the vaccine, but I can also see the nuanced areas where an individual has justifiable reasons for not receiving it. They should not be punished for making that individual choice for a disease with a 98.2% recovery rate. I understand that Covid is/has taken an extreme toll on those it has affected or killed. I have family and friends which Covid has affected. Having said that, sometimes the best thing to do is let things play out, rather than create scenario prime for unforeseen negatives.

Thank you for your time and consideration.

Respectfully
Andy

Subject: No Vaccine Passports

[CAUTION]: This email originated from outside Kitsap Public Health District. Do not click links or open attachments unless you are expecting this email. If you are unsure please contact IT.

To whom it may concern,

I am adamantly opposed to any mandate which restricts access to public facilities for any citizen and request that you vote against ANY FORM of segregation. All forms of discrimination are illegal.

I'm asking you to uphold my rights and the rights of all citizens guaranteed in the 14th amendment of the US Constitution "no state shall deprive any person of life, LIBERTY, or property..."

I beg you: not be a supporter of medical apartheid. State law RCW 49.60.030 guarantees freedom from discrimination and declares this a civil right. The Civil Rights Act of 1964 states it a crime to discriminate against any individual. It's a shame that it took the Supreme Court decades upon decades to finally uphold the fact that all people are created equal and to guarantee that truth at a federal level, even though they had repeatedly tried to shuck their responsibility onto the state level time and time again as they allowed discrimination to go unchecked within each state until 1964...an issue that should've been over at the end of the Civil War! I have faith that our Supreme Court will once again uphold the rights and liberties of every citizen when it comes before them. At this time, please stand for freedom, as we know that this vaccine passport will not be the last time we will have to make a stand for the rights of every citizen.

P.S. My natural immunity to having suffered and recovered from Covid19 should be considered just as strong of a protection as someone with the vaccine. And yet, I'm being seen as a threat to society, even though I cannot catch or transmit the disease. Where is the justice? I'm not saying I want a badge, or a passport...I'm saying that this double-standard is just another form of discrimination.

If Kitsap County is allowed to push through a "vaccine passport" then we are no better than the United States before the Civil War demanding to see papers dependent on what skin color you were. Or no different than the Nazis who declared the Jewish people a public health hazard and required citizens to carry papers to prove they had the freedom to move around. "Zeigen sie ihren papieren!"

Kitsap County Resident,
Bekah O'Meara

Subject: Comments on proposed vaccine mandates in Kitsap County (for hearing on 9/28/2021)

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

To: Kitsap Public Health Board
Subject: Proposed vaccine mandates in Kitsap County

Thank you for this opportunity to comment on the proposed COVID vaccine mandates being considered at your special meeting on September 28, 2021.

I would like to begin by addressing some missing information in the letter from Dr. Gib Marrow included in the agenda for this special meeting. It seems to me that by excluding any comparative information about vaccinated Kitsap County residents, we are unable to see a complete picture of what is going on in Kitsap County.

For example, Dr. Morrow says that there are over 700 new cases diagnosed each week since mid-August in Kitsap County. There is no information about how many of these are vaccinated vs. unvaccinated. Instead a blanket statement is given stating that the surge is “most severely impacting the unvaccinated.” Without comparative data, this statement cannot be verified.

Dr. Morrow continues making similar statements throughout the rest of the letter, without any data to back-up these claims. E.g. “...infected staff – primarily unvaccinated staff...” is used without any backup data comparing vaccinated to unvaccinated staff.

Dr. Morrow says vaccine mandates are the best way to keep schools open without including any facts regarding COVID outbreaks in schools or the number of children with COVID who end up in the hospital. Why are these key facts not included along with the related claims?

As a matter of fact, the only facts (or partial facts) included in Dr. Morrow’s memo are those which support the hypothesis that vaccines are the best way to address the COVID crisis. By not addressing any other options or looking at any other data which supports other points of view, it seems to me that you are not fully informed and able to make a decision about the best options for Kitsap County residents.

Next I would like to address the role of government in general. It is not the proper role of government to mandate any citizen do anything regarding their own health. After years of preaching that people have a right to do what they want to their own bodies, I find it hypocritical that these same people are now trying us what to do to our own bodies.

This is a slippery slope. If you begin with COVID vaccine mandates, where will it stop? Why not require people to stop smoking, drinking alcohol or taking recreational drugs? These kinds activities are far more harmful, kill more people, put more of a strain on our health care system, and cause more economic damage than COVID. Or let’s talk about obesity which causes more harm in all of these areas than everything else put together. Will you next forbid the consumption of

any form of refined sugar or artificial sugars in Kitsap County? Or require a certain diet, body-fat ratio or weight of those residing in Kitsap County? Of course not!

If you are not yet convinced, let me now talk about the blatant discrimination inherent in the proposed mandates. The majority of unvaccinated citizens in Kitsap County are minorities. Vaccine mandates create different classes of citizens—vaccinated citizens are allowed to hold more jobs, attend more events, enter more stores, and access more services than their unvaccinated counterparts. If this is not anti-American, I am hard pressed to imagine what is!

Is this really what you want for Kitsap County—a place where a shot gives you special benefits and privileges and refusing to get one makes you a second-class citizen?

Thank you for taking time to read my comments. I am not going to go into a discussion of the how having COVID anti-bodies has been scientifically proven to be far more effective than the vaccine (and a vaccine mandate does not account for this) and other extenuating circumstances surrounding taking the COVID vaccine which I hope you have already taken time to consider, and which I am sure others will write to you about.

Sincerely,

Juliana McMahan

Subject: Regarding your upcoming Health Board Zoom Meeting

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Dear Mr. Grellner,
My name is David Fischer and I've been a free US citizen for 66 years and a resident of Kitsap County for 27+ years.

I am writing to express some things that I want all our elected officials to be aware of, especially those serving on the Kitsap Health Board.

First, there is something that I feel many elected officials have forgotten. All elected officials in our free country are to work FOR the people, not above them or around them. I have issues with this board meeting being held without ANY public comments. In other words, meeting without input from the very people they are to represent. This is a big problem in my mind. Why would you meet like this? What is so "important" or "secret" or "divisive" that the board would NOT want public input?

Second, I'm guessing that the issue of vaccine mandates will be part of your discussion. If it is, I want you to know very clearly what I want our elected officials to do. NOTHING!

I believe that the regulations already put in place by federal, state and local governments to try and deal with COVID over the last year and half have done nothing but harm this country. Tens of thousands of businesses have been forced to close their doors. Millions have lost jobs and livelihoods. And, for what? The pandemic is still happening. People with vaccines are getting sick along with the unvaccinated...they are passing on the virus just as the unvaccinated do...they, too, are using hospital rooms and resources, just as those who have CHOSEN, as a free citizen of this country, to not get the vaccine. There is basically no difference. People with the vaccine get sick, go to the hospital and die. This is fact. So, WHY MANDATE vaccines? It is UnAmerican, it is overreach by the government, it is a violation of our state and federal constitutions...and it is WRONG. Mandating vaccines is one small step away from mandating abortions for "the common good", as Communist China did for so many year. STOP THIS MADNESS. PLEASE Do NOT let any kind of vaccine mandates or laws be put into place.

The results of any more regulations, including a local vaccine mandate, would be the closing of more businesses, the loss of more jobs and more families being dependent on government help, an increase in mental health issues, more division in our already massively divided culture, and the further degradation of trust in our governing officials.

PLEASE vote against any such policies.

Respectfully,
David Fischer

Subject: Kitsap Public Health meeting 9/28 agenda

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Good afternoon,

I will be brief as I know that many concerned citizens will be commenting on the agenda to be discussed during the September 28 meeting. After 18 months of navigating the pandemic of Covid-19, I understand the complexity of the situation. However, handing down even more mandates and burdening already short staffed and financially insecure business' to try and enforce any kind of vaccine requirement, either for their employees or for entry into their private business, is, among many questionable legality issues, cruel at this point.

My vote is for everyone to sit tight, let this play out while encouraging people to stay home if they are sick, even if they have received their vaccination, seek early treatment, and practice good hygiene. As we are learning, the vaccine does not prevent transmission, only symptoms, so the uptick in cases could very likely be from people that are not feeling sick, but going about their lives and spreading this virus at high rates. If this is the case than requiring proof of vaccination status to enter business' does nothing to prevent the spread, only contributes to the feeling of "I am vaccinated therefore I can go about society" while those that are not are excluded.

In summary this does not, and should not, be a get the vaccine or we will take away your ability to provide for your family and/or participate in society solution. That approach will only make those that have not or can not take the vaccine more hesitant and lead to stagnant vaccination rates.

Please consider the hardworking people you represent and do not mandate more heavy handiness and intrusion upon peoples private and personal health decisions. Your role is to keep people informed about current health concerns, and to protect peoples rights to make their own health decisions. It is not to force or threaten the people that elected you.

Thank you for your time,

Laura Sherlock

Subject: Kitsap Vaccine Passport Proposal

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

To Whom It May Concern:

Recently I heard that Kitsap County leadership is considering instituting a COVID Vaccine Passport program, barring those without paperwork from entry to restaurants and businesses. As a long time resident of Kitsap Country, and Port Orchard in particular, I wish to express my opinion on this matter.

While I am pro-vaccine, I am fully against any vaccine mandate or vaccine passport programs. In my estimation, such measures are unnecessarily divisive to our community. They cause us to label people within our community as “us” and “them” and further drive a wedge between us all.

Our communities need healing right now. We need to come together and help one another, not demonize those who feel differently from what you or I may feel on a given topic.

It is my hope you will use this opportunity to bring our community together rather than divide it further.

Thank you for your time and consideration.

To whom it may concern (i.e. EVERYONE in this county who speaks for common sense and rights over governmental control):

This is getting out of hand. Not allowing public comment on an issue that could not possibly be MORE public and impact us so directly... It's absolutely absurd. This is not about vaccinations anymore. You all know this.

FOR THE RECORD: I, my family, my neighborhood, my friends and coworkers are ALL FOR **step 1. TAKE NO ACTION AND ALLOW THE CURRENT SITUATION TO PLAY OUT.**

The science DOES NOT SUPPORT vaccine passports. It just doesn't. Look at Israel!! LOOK ANYWHERE. It's dumbfounding to me how we can be at above 70% as a county in vaccinations and STILL want to push an agenda for this control. THE VERY FACT THAT COVID19 continues to spread **REGARDLESS OF VACCINATION STATUS** should IMMEDIATELY overthrow any idea to make vaccine requirements a thing. We KNOW **PEOPLE WHO ARE VACCINATED CAN GET AND SPREAD COVID**. Possibly even EASIER if their symptoms are minimal. HOW DOES HAVING A VACCINE MAKE IT OK THAT YOU CAN DO SOMETHING THAT SOMEONE ELSE CANNOT??? Fully vaccinated ARE ending up in the hospitals. They ARE getting Covid. Even if it is less, we KNOW THEY CAN SPREAD IT. Making it so ONLY vaccinated can go places DOES NOT CHANGE THE SPREAD OF COVID AND ONLY DIVIDES AND ANGERS YOUR WHOLE COUNTY. It makes NO logical sense. It is NOT OK. It is ludacris that our government wants to control who has access to food, shopping, and business, and yet we can turn on the TV and see hundreds of thousands of people sitting side by side at a Seahawks game. **Vaccination status has nothing to do with safety when it comes to the spread.** I don't know why people think this is about the disease at this point. You will be hurting businesses, you will be causing a MAJOR divide in our county, and you will find a LOT of unhappy people should you try to politicize this virus to this extent. The science does not back this up. If you pass anything other than step 1 we will be hurting as a county. The government has already overstepped their boundaries by making vaccine requirements. I am sick to my stomach about the segregation and absolutely backwards thinking that requiring blanket policies and segregating people is a GOOD thing. THIS HAS NOT WORKED FOR ANYONE THAT HAS TRIED IT. DO NOT LET KITSAP BE IN THIS SAME FAILURE OF AN EXPERIMENT.

Hello there, Kristen Hytopoulos,

Im here to ask that you will not allow any further divide in Washington State & our beloved Country by requiring vaccine passports. This will not only create even more chaos (haven't we all had enough?!) & divide but it is a new form of segregation. It will force many out of a job and ruin livelihoods- driving many out of the state. It is inhumane to shove this down people's throat (I suppose arms would fit better here) Those who have wanted the vaccine (and those forced to get it) have it- those that do not want it or want to wait a few years before receiving it should have that choice WITHOUT the freedom of purchasing food and goods taken away from them. The thought that this is even a thing to be voted on is disgusting. It is scarily similar to history- having to show a yellow star. Many do not like that comparison and yet, here we are. We are not a communist country. Mandating or requiring a vaccination card is a turning point of this country's freedom. It isn't a health concern at this point. Not when so many freedoms will rely solely on a card.

What is the difference between a vaccinated person & an unvaccinated person, going into the same place, if they both can have & both can spread the virus?

If you believe in God or higher power, I ask that you pray or meditate. Listen to what your soul and heart say. Do the right thing and don't pass this vote to require vaccine passports.

Kindly,
Chelsey

To whom it may concern,

I understand there is a meeting of the Kitsap Public Health Board, Tuesday September 24th. Of the choices of what to recommend to the health department I recommend taking a hands off approach.

Please recommend that the Kitsap Public Health District:

1. Take no action and allow the current situation to play out.

Regards,

W. Locke Morgan

Dear Sir,

I have been a resident of Kitsap county for almost 40 years and this is the first time I am compelled to write to ask, no beg you not to impose these crippling requirements or mandates on the citizens of our county.

With almost a year and a half of this effort to control a virus (which should not be called a pandemic) I personally know more people who were harmed from the vaccine, than I know people that have been harmed by the virus. A friend of the family, a nurse experienced 8 miscarriages in the ER in 1 shift. Two friends of family members of ours have died, and a number people have gotten the virus after they were vaccinated. Not to mention the terrible hurt and abuse of losing a job and the ability to take care of your family.

Personally I got the virus and found that although the symptoms were different, it was no worse than any other flu bug that have experienced in the past. I am fearful of getting the vaccine myself due to the blood clotting issues that **may** come with it. And with the natural immunity that I now have why should I have to risk the vaccine?

You must know that the mandate to vaccinate or be banned from making a living is reminiscent of when people lived under the Hitler regime. People being scared to come out of their homes and always asked to show their papers.

I have searched and I have asked the questions and found that there are many differing opinions, which is another reason I believe that mandating this vaccine is wrong.

So I respectfully ask you to not approve these requirements or mandates for our county.

Thank you kindly,
Jodi Harris

Subject: Mandatory vaccinations/passports

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Hello -

I'm writing to give comment on the upcoming meeting regarding mandatory vaccinations.

Haven't we endured enough. Haven't we been through enough! This is by far the most government overreach I have experienced in the United States. To mandate a vaccination as part of employment or to enter a public building will have far greater damage to folks of Kitsap County than the pandemic itself. The effects on our mental health need to be considered. The business owners have endured enough then to have to implement and manage your overreach is ridiculous! The folks that are vaccinated are those who want it. We won't be forced to get it.

Look at the state numbers at those refusing to get vaccinated. Look at all the folks who are willing to lose their jobs and their livelihood over this. Mandates don't work. People will still find a way around it. Folks opposed to the mandate will support the business that aren't enforcing your mandate. Folks will spend their money online to businesses like Amazon. That means money is not being spent in our county. That has a major trickle-down effect to our local economy and local business owners.

The fact that vaccinated folks can still get and spread covid is not being addressed. The vaccine is not the perfect answer here.

The vaccine mandate is causing issues with our healthcare system. It has impacted the availability of first responders and healthcare workers. The mandates are causing the issues. The answer is not more mandates.

I'd like to use myself as an example. I am a mom of two young kids and married to a first responder. We've all had Covid. We have a stronger defense to the virus than with the vaccine. With this mandate it means I cannot go into a store to shop for Christmas gifts. That means Carter's Chocolates or Josephine's on Bay Street won't get my business this year. That means Grocery Outlet (locally owned) won't get my business anymore. You know who gets my business Amazon and Walmart. Some might say oh order your groceries online. Oh, did you know that Walmart online service is constantly out of food yet it's in stock in the store. I have a child with several food allergies and severe food pickiness due to a disability. With a mandate the prohibits entry unless vaccinated means I cannot go into the store and look for food that he can and will eat. This means my son won't be able to participate at the local gymnastics place because I

cannot go inside. That means Sound Elite Athletics won't have my business. The list goes on. It would be a shame for 30% of business here in South Kitsap to go straight to Amazon. Think about all the individual stories of people in Kitsap County. I am one of tens of thousands....

I urge you to consider the whole picture including the mental health of the residents of Kitsap County.

"Any society that will give up a little liberty to gain a little security will deserve neither and lose both." -Benjamin Franklin

Thank you for your time,

Kerri McNally

Subject: Vaccine Mandates

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

I am compelled to write this letter as I bear witness to the most invasive medical infiltration of bodily autonomy of our time. I am hearing that Kitsap County might be next on the list for considering a vaccine passport, so I decided to be pro-active in addressing this with the County Council and the Health Department.

The Preamble to the Declaration of Independence states, "We hold these truths to be self-evident, that all men are created equal, that they are endowed by their Creator with certain unalienable Rights, that among these are Life, Liberty and the pursuit of Happiness." Medical coercion is a massive violation of unalienable Rights endowed by our Creator. On a humanity level, forced or coerced medical intervention is a direct violation of bodily autonomy. On a legal level, forced or coerced medical intervention violates the Bill of Rights in the Constitution of the United States and the Washington State Constitution. RCW, Title 42, Chapter 42.56, Section 42.56.939 states "The people of this state do not yield their sovereignty to the agencies that serve them." In addition to these egregious violations, I would like to draw attention to the Nuremberg Code in which "The voluntary consent of the human subject is absolutely essential." Informed consent and choice are fundamental human rights.

I can continue to get into the weeds with a discussion that points out that injuries and deaths are occurring more than any other "vaccine" in history with this forced medical intervention in which no one bears financial liability except for the recipient of the medical intervention. I could discuss the censorship, propaganda, restriction of early treatment, public vilification of citizens at the state and federal level, obscured data, misuse of state agencies and funds supporting unlawful mandates, abuse of executive power, or I could address the continuous fear-based narrative that this state has promulgated on its citizens for over 18 months at a dizzying pace utilizing all forms of media.

Kitsap County Council and County Health Department, at the core of this is whether or not you believe the government owns your body.

Medical interventions are an individualized decision that occur in the private patient-doctor relationship, with the patient always making the final decision on a medical intervention. As a council and health department, you have a responsibility to our community to not draw lines in sand and erode your relationship with your constituents. In addition, you have a responsibility to not support the divide and conquer tactics of tyrants. Please note that eventually, we will all be "unvaccinated" if a precedent is set allowing for mandated medical interventions anytime the government decides to invade bodily autonomy. Pastor Martin Niemöller' wrote a poem titled "First they came for the communists, and I did not speak out because I was not a communist." [Holocaust Memorial Day Trust | First They Came – by Pastor Martin Niemöller](#)

Hello, there is a meeting scheduled tomorrow in discussion for proof of vaccine in order to be allowed entry into businesses. This is outrageous and unfair. The unvaccinated will already face termination from their employers, and now will not be able to shop at Safeway to buy groceries on an already limited budget! This is highly unconstitutional and discriminatory. Please do not allow this to happen to the citizens of America. The vaccine is not a cure! The vaccinated can still spread Covid. Please help in hearing the pleas of these people!

Subject: Tomorrow's Vote

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Mr. Grellner,

I am very troubled by the idea of the government forcing people to get the vaccine and forcing private businesses to mandate vaccines for their employees. There are several reasons I am troubled by this clear overreach of government authority.

1. There is a long history of class-action lawsuits against manufacturers who make FDA-approved medications, which after their use by millions of people turn out to be harmful or deadly. This mandate could make Kitsap County liable in future class-action lawsuits.
2. The courts have begun to rule on the issue of mandatory vaccines and as a taxpayer, I don't want my taxes used to pay for lawsuits the county loses, when they could be avoided by simply acknowledging the people's right to self-determination. My body, my choice.
3. There is a good deal of legitimate information regarding the dangers of overdoing the vaccinations, which can result in a drug-resistant virus, in the same way the overuse of antibiotics causes drug-resistant bacteria. I have included a link to an article that addresses this risk.
https://townhall.com/columnists/robjenkins/2021/09/26/this-new-peerreviewed-article-could-be-a-gamechanger-n2596486?utm_source=thdailypm&utm_medium=email&utm_campaign=nl&bcid=ac46087e7ecc466260a6a7a2ee3aaa7fb99b1e9b9b71801ef6d86841f605a615&recip=2034646
4. Both Sweden and Norway have now removed all COVID restrictions because they followed the herd-immunity plan rather than the disjointed, dysfunctional, inconsistent, fear-based, draconian way we have handled this virus in the United States.
5. The number of deaths has been manipulated for the greatest impact to generate fear of this virus. That holds true in Kitsap County as well. For the first 43 deaths, the presence of comorbidities was included in the reporting. Every death in the county attributed to COVID also included the comorbidities that those victims were fighting. Then that stopped. Why? I would suggest that it invokes more fear in the general population if the comorbidities are not mentioned. As a result of this fear, people are more willing to accept government overreach.
6. I challenge the idea that this is a pandemic and thus a public health emergency. We began to take steps to combat the COVID virus in March of 2020. In Kitsap County as of today, there have been 180 deaths attributed to COVID. Even taking this number at face value, that means in a county with a 2021 population of 275,867, over the course of 18 months, only 0.00065248833% of the population has died. The percentage of those who have died compared to the number of cases is a death rate of 0.01220421723. These numbers argue against both a pandemic and an emergency.
7. Today, the Bremerton Sun reported a 28.4% reduction in the number of cases from week to week. If case numbers are decreasing, the draconian measure of government mandate is even more oppressive and authoritarian.

8. Each Thursday, Kitsap County Public Health District reports on the number of deaths and the age range of those who have died. In 18 months, no one under 30 has died in this county. Only 2 have died between the ages of 30-39. Only 5 have died between the ages of 40-49. Only 18 have died between the ages of 50-59. So in 18 months, we have lost 25

people under 60. Yet, as a result of these 25 deaths, the government has become totalitarian and removed the freedoms we have cherished and fought for over the life of this country. It's time to ensure the vaccination of the 60 and over population and let the rest of the citizens live according to the inalienable rights spoken of in the Declaration of Independence. There is no pandemic and the "emergency powers" that have been wielded in such an inconsistent, contradictory, and hypocritical manner by the elites have no authority and no basis in law unless those laws are twisted to provide power to those who have an insatiable appetite for such power.

9. To give you some perspective, I am in the 60-69 category, I have diabetes, I am obese, and I am fully vaccinated. But I stand shoulder to shoulder with all those who have chosen not to get vaccinated. Their health decisions should be their own. You have neither the legal nor moral right to impose your will on the citizens of a "free" country. Stop, before you pull the whole country down with your authoritarian actions.

Very respectfully,
Kim Highfield

Dear Keith Grellner,

It has come to my attention that there is a meeting scheduled tomorrow, September 28th, 2021 to discuss requiring proof of a COVID-19 vaccine.

Our family has lived in Kitsap County for over 30 years.

I vehemently Oppose requiring any such proof or even being asked by a business regarding my personal health choices. And let me be very clear, any requirement by any government entity to receive anything into my body is a violation of my basic rights as an American Citizen. As far as I know we still live in a free country and that is the way it should remain.

Each and every American Citizen has the right to make this personal decision regarding their health and well being.

A decision made by Kitsap County officials mandating businesses to ask for this proof will not only be a violation of rights, but it will also destroy even more of our county businesses and our economy as a whole.

Please oppose any requirement.

Respectfully,

Lawrence Howe

Say NO to Vaccine Mandates. It is completely unfair to expect businesses to enforce this mandate. Many businesses in Kitsap County are already struggling and to require them to staff additional employees at the entrance and enforce is asking too much of the business and the employees. If city and county council is willing to be in the trenches and man those front doors, then by all means. Otherwise, Say NO to Vaccine Mandates.

Respectfully,
Bernie Peterson

Subject: Statement Regarding Informed Consent and Medical Sovereignty

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

1. Juan and Kristin Lopez are against medical experimentation without verifiable and full informed consent on all potential side effects of said treatment with an unconditional free will choice to refuse the medical experiment on untested or unsafe medical interventions, such as a faulty use of a PCR test or government illegal mandates regarding the COVID-19 experimental vaccine.
2. We assert that no government individual, agency or other corporate representatives have been granted authority over the "PEOPLE'S" private health decisions and we maintain our sovereign control over our bodies in unconditional terms, regardless of a so called "State of Emergency".
3. We assert it is against State, Federal and International Laws that exist regardless of a declared State of Emergency (particularly, unlawfully prolonged ones), to mandate the FDA's (Food and Drug Administration) EUA (Emergency Use Authorization) for COVID-19 "vaccines" or any product or procedures, whether EUA or not, without full informed consent of all ingredients and potential side effects; and to institute illegal mandates such as vaccine passports for access to schools, workplaces, restaurants, etc., is completely unconstitutional and scientifically unsound.
4. We assert that to allow and worse, to facilitate the coercing, shaming, bribing or otherwise forcing citizens into being a test subject in any experiment without full informed consent in order to keep their employment, attend schools, or participate within their communities, is to participate in crimes against humanity.
5. We assert that until such time as the United States of America and its Constitution and the Bill of Rights are dissolved, all citizens as "We the People," citizens, are protected by that Constitution and Bill of Rights along with the Federal and State Health statutes that are codified in the Nuremberg Code. Violations of the Nuremberg code and Bill of Rights is against all the "We the People's" inherent and Constitutional Rights.
6. We assert that none of the 10 codes of Medical Ethics in the Nuremberg document are being honored in these experimental COVID-19 vaccines...None. And without full disclosure as to the ingredients of

these gene therapies (i.e., mRNA vaccines), and due to secret proprietary ingredients maintained by the pharmaceutical corporations in question, the basic requirement of informed consent is not possible. See the following link: <http://www.cirp.org/library/ethics/nuremberg>

7. We assert that “We the People” have the right by law to refuse any products including all EUA drugs technologies, vaccines, EUA tests, masks or medical procedures, EUA investigational products, population genomics programs, EUA healthcare data tracking and surveillance platforms. A lawful application of the terms of a lawful Emergency Use Authorization includes the right to informed consent and the option to refuse. The FDA can only issue an EUA if there are no other cures, treatments or prophylactics available. The FDA has therefore breached this regulation, when it issued the EUA, as they were informed prior to that issuance of alternative and successful treatments such as Ivermectin, Hydroxychloroquine, Zinc, vitamins B, D and C. So, for the FDA to continue asserting that “COVID vaccines” are the only way to “get back to normal” is entirely fraudulent!
8. We assert if any individual representing any business/corporation that chooses to enforce any illegal mandates such as a medical procedure (the PCR test) or medical therapy (the COVID-19 vaccine) on healthy employees, vendors, or sales representatives by strongly suggesting these tests and treatments are necessary, should be offered on an absolutely voluntary basis without any recriminations whatsoever. Otherwise, these corporate individuals may be held liable for any damages, injuries or loss of employment due to refusing the illegal mandates. For employers to threaten employees, vendors or sales representatives to adhere to unlawful dictates is to participate directly in harm being carried out on employees, vendors and sales representatives, and as such these employers may be liable for damages of said harm.
9. We assert that the First Amendment to the United States Constitution prevents the government from making laws which regulate or abridge the freedom religion, the freedom of speech, the freedom of the press, the freedom of assembly, or the right to petition the government for redress of grievances. Since our “We the People” freedoms have obviously been profoundly and unlawfully eroded during this alleged “pandemic” because of unjustified and disastrous lockdown mandates. “We the People”, having all political power, never granted authority to any one, whether a lawmaker, government official, law enforcement official, employer, doctor or nurse to force any medical intervention upon us through their opinions, policies, programs or mandates being falsely presented as law. On the contrary, “We the People,” maintain adherence to the laws that were in place before this virus or any of its variants emerged.
10. We recognize other foreign and domestic agendas at play that are repugnant to the Constitution and Statutes designed to protect us and so we firmly denounce them and their influence on our Representatives. We demand an immediate investigation into the fraudulent nature of this, “pandemic” and the unsustainable claim of a “State of Emergency.”
11. We affirm that “We the People” are not feeling protected, but suffocated by arbitrary restrictions based on inaccurate data and unsubstantiated fears. This coupled with unprecedented levels of censorship and fake news based on misleading and ever-changing data, reveals a “public servants” lack

of comprehension and memory regarding the oaths “public servants” took to uphold the Constitution of the United States of America. Due to this breach of duty to protect our First Amendment Rights and Trust, the Affiants demand that each of you rectify this breach immediately, regardless of any State of Emergency, whether or not such a state, in fact exists.

12. We demand that you prove that there is in fact, justification for a State of Emergency based on an actually isolated virus called Sars Cov2 or any variant thereof. Claiming justification for the “Emergency Powers and EUA,” that are based on the rising “Case Numbers” from the Drosten’s PCR test, a version of Nobel Prize laureate Dr. Kary Mullis’ invention of the PCR test, it will not hold up in court, legally or medically, having been proven to be inaccurate and fraudulent in citing rising case numbers. The Affiants also demand that you provide full disclosure of new laws (not mandates) that grant you authority to exercise this force against your constituents, as no laws exist at this time.
13. We demand you respond to we the people and hear our demands. If you fail to respond to us, within the week, you will have acknowledged trespassing against the Constitutional and God-given Rights of the People that you have sworn to protect as well as participating in the crimes mentioned herein. You further agree, that if you do not respond showing Constitutional Provisions authorizing the before mentioned breaches within seven business days, you will have agreed to the facts herein, that no court shall re-examine this matter as you will have thereby agreed to accept the above-mentioned terms of truth and law. This letter authored by two Citizens of the United States of America and residents in Washington State, in Kitsap County, stands as a Notice of Liability and will be used as evidence of wrongdoing, if needed. In the meantime, the Citizens also demand that you cease and desist coercing the “We the People” into surrendering their right to opt out of PCR testing and dangerous mRNA experiments, gene therapies, vaccines or any medical mandates whatsoever.

The Citizens present this statement, on 27th day of September in the year of our Lord Two Thousand Twenty-one by Juan and Kristin Lopez.

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

I am unable to attend the meeting and as it seems the board is unwilling to have public input I am reduced to communicating in this manner.

1st I am not antivax, I have had all my shots, however, at 55 years old I find it unsettling at how hard this agenda is being pushed on people. If the trials had been performed as in previous vax program and development and if the depts of health and the CDC and who had been forthcoming and transparent with the info there might be less hesitation.

2nd I would like to convey the fact that many citizens will not be forced to vax even if you implement a passport or other requirement of proof. We tolerate the mask mandate in order to enter a business then immediately remove the mask and continue to shop or do business unimpeded. I recently visited a county that has a proof mandate for vax and believe me when I tell you that most businesses are not actively enforcing said mandates.

Further, there are far better means of protecting the citizens of this county.

1st ensure that the emergency medical providers are implementing an actual life saving treatment program.

2nd actually follow proven science allow providers to prescribe medicines that are proven to inhibit covid 19. There are many studies that prove hqc and ivermectin are safe and effective and they provide great sustained immunity. I know that doesn't support the narrative from the federal govt. But your responsibility lies in protection of the citizens of this county not following the unproven directives of the white house or our governor and their financially driven objectives.

3rd send clear and concise directives to businesses in how to CORRECTLY clean and disinfect their business. Including making sure that they are providing appropriate washing products for the public. Ie. Not using watered down soap and cleaners. The same goes for janitorial staff in schools.

4th elimination of mask requirements as there are many studies that conclude that masks are not capable of prohibiting the transmission of covid 19. And in fact promote other illnesses such as bacterial pneumonia and other bacterial infections.

I am not speaking as an expert, I have done much research as I am 55 and a high risk individual. I have congestive heart failure and have had a stroke. I have worked all of the pandemic and not been sick once. I work with the public and eat out and regularly visit our state casinos.

I wish I had more time to go through and add the studies supporting all of this but I do not. However, I believe that those of you making our decisions should be able to do the research and find trusted educated experts that are not influenced by the greed of money fame and power that are currently advising as experts on covid restrictions.

I respectfully ask you as our representative to ask the correct questions.

1st how are seriously ill patients being treated.

With scientific proven therapies regardless of the national narrative?

Are symptomatic patients being treated with medicines that are effective in creating a recovery not requiring hospitalizations in order for them to recover at home?

Why are masks required when there are studies that prove they are clearly ineffective and possibly more dangerous than helpful.

I implore you to do the right thing and represent the people of this county. Make decisions in our best interests understanding that means proper medical treatments of the sick. Insuring that businesses spend more time on cleaning and disinfecting instead of acting as mask and vaccine police. Also afford that the governors mandates are nothing more than suggestions and can't be legally enforced by workers.

Further realize that forcing people to vaccinate is a violation of our rights regarding an unproven experiment vaccine. There is no liability to the manufacturer regarding these vaccines, however I believe that eventually the liability will come back to someone. A quick review of the vaccine system should give this board pause to reconsider what you are pushing on your citizens. Any further mandates by this board only puts you in the column of complicity.

I believe that you are here for the good of the people and will do the right thing. Table this to investigate your experts research the effect these requirements will have on businesses and the people you represent.

Sincerely a citizen

Keith Grellner

I understand that on Tuesday you will be discussing possible vaccination requirements for our county.
I am in shock that we have come to this.
I OPPOSE allowing Kitsap County Health Department to impose a vaccine mandate on any business in Kitsap County.
The biggest reason I urge you not to enforce any mandate is because this is America and we still have freedoms - especially freedom to make decisions regarding our own bodies.

To the board,

We the people say no more, no more imposing your mandates, no more to you making the decision within or on the citizens of Kitsap County.

The dictatorship and the constant overreach of those in elected positions are abusing power given to you by your constituents and and you are on full display from the top office and down. To institute more or harsher restrictions would result in infringing on individuals god given constitutional rights and freedoms that are backed by constitution of the State of Washington and the United States of America.

You dont get to speak for me. I am a man and I have my own voice, my own beliefs and my own rights. I do understand that we have a virus that unfortunately has taken loved ones, but 99.7% of us survive this virus. This is not a one size fits all situation. There are 255 thousand residents of Kitsap, some have already had covid and their natural antibodies helped them conquer this virus others have turned to this "vaccine" 73% for ages 65+ 63% for ages 12+. If doing this makes them feel better, great, good for you for getting to make the choice to for your own body. But you dont have the right to tell me to do the same. The freedom of choice is what makes us American's.

This is not a vaccine. A vaccine prevents an illness, a vaccine stops the spread of something and better yet it stops you from dying from something. This is not a vaccine. You can still catch the virus, still spread it and still die from this virus fully vaxed. I've personally have witnessed the affects of this virus on those that are not vaxed versus those fully vaxed. I've even had family have to say goodbye to family that are fully vaxed and had died from virus itself. So my question to you is, what is it all for?

No to mandates, no to mask, no vax passport.

Thank you for your time,
Ben Davila

[CAUTION]: This email originated from outside Kitsap Public Health District. Do not click links or open attachments unless you are expecting this email. If you are unsure please contact IT.

Dear Mr. Grellner,

As a business owner, taxpayer, shopper and deeply involved citizen of Kitsap County I want you as a public servant to hear me loud and clear... mandating a vaccine for the residents of Kitsap County will cause further division, alienate those who have been advised by their doctors to not get the vaccine and cause businesses to close. Our property values will plummet. We are trying to get out this state as fast as we can. We need time to close our doors and sell our house. Do not jeopardize the livelihoods of your friends and neighbors. The numbers of dying from covid do NOT support destroying more lives by the destruction of community and jobs which results in homelessness, broken families, suicide to name a few. What happened to "my body, my choice"? Let people live their own lives. Follow the science... it says something far different than what the news is telling you.

Sincerely,
Karen Holt

Mr Grellner,

At the health department meeting that is scheduled for tomorrow, September 28th I am asking that any and all vaccine requirements/vaccine passports be voted down.

To require them will bring added devastation to businesses, families, and our over all local economy.

Individual autonomy must be protected by all in order to have a proper society and one that trust their government officials.

To make vaccines a requirement in order to take part in local activities is not right in a free society. Much more will be lost than what could possibly be gained.

PLEASE strike down vaccine requirements/passports.

Respectfully,
Ellen Howe

It is irresponsible of the health dept to give people a false sense of security that if they are Vax'd and the fellow patrons are vax'd they are safe.

They could cause the death of at-risk individuals who might believe this false narrative.

It is a unconstitutional for the anyone to prevent US citizens to freely move about our country.

Please, let this just run it's course and take no action.

Subject: No COVID Vaccine Mandate

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

I am writing in to voice my opinion regarding the mandating of the COVID-19 vaccine and the effects it will have on our community. My wife and I have research this quite a bit and feel that though the vaccine may reduce the risk of severe effects of illness, it is not worth our health to get it. This is called risk analysis. I do believe that people should have the choice to take the vaccine. I even support the vaccine for certain groups of our society. What I do not support is being forced to put something in my body to “protect me” when what I am being protected from is less likely to kill me than many other things I do in normal life.

1) If you look at Israel, one of the highest vaccinated countries, you will see that they are still having high infection rates. No one can challenge that, not only are the unvaccinated passing the virus around, also the vaccinated. The CDC has put out that a vaccinated person carries the same viral load as a vaccinated person. This shows that vaccinated people can transmit the virus at the same rate as unvaccinated people. I would even go as far as saying that vaccinated people spread the virus more than unvaccinated people base on the fact that a vaccinated person is more likely to be asymptomatic than an unvaccinated person. This means that the vaccinated person will more likely be out living their life spreading the virus verses the unvaccinated person home with symptoms.

2) By not taking the vaccine you are only risking your own health. Everyone has had the ability to get the vaccine if they would like. Mandating the vaccine takes my health decisions away.

3) Small businesses – small businesses have been beat up enough during this pandemic. By implementing a mandate, a lot of trained employees will be forced to quit, and the businesses will lose patrons as they will not be able to enter. I am afraid that these businesses can’t handle another blow like this.

There is an abundant amount of research on this virus and alternative ways to treat it. A lot of it is fact and a lot of it is fiction. I ask that you look into these. Be on the forefront! Don’t let others think for you! Don’t just look at what is happening in the United States. There are great examples of treatment in India. Make Kitsap the model of how to treat COVID. We are seeing that following what others are doing isn’t working.

Finally I ask, do not implement failed policies as they are politically expedient. Open up Kitsap County and allow the citizens to make their own choices.

Respectfully,
Kevin Rose

I am writing to inform you of my opposition to any and all vaccine mandates in Kitsap County. I am especially opposed to requiring all business open to the public, or indoor venues open to the public, to require proof of vaccination for entry. I believe this is un-American, anti-freedom and goes against the Constitution. I furthermore do not recognize your authority to invoke such mandates in a free society. My hope is that you will vote in favor of keeping American citizens free. Especially from a virus that kills far fewer than 1% of the population.

Sincerely,

Gary M. Waller

Dear Keith Grellner,

I am writing to express my concern over the proof of vaccine mandate being considered for Kitsap County. I strongly oppose allowing the Kitsap County Health Department to impose vaccine mandates on any business. I have three reasons for concern. I believe firstly that this is a violation of the business owner's freedom. Secondly, that I could be discriminated against and prevented from participating fully in society because of my choice over my body and healthcare. Thirdly, this is a violation of my healthcare privacy. Please oppose this mandate!
Thank you! -Bonnie

I oppose a government requirement to require or show proof of a COVID vaccination in Kitsap County under any circumstances. These kinds decisions should be made by individuals who can take into account the specific needs of their employees and customers and the best available science.

It is not the proper role of government and will create different classes of citizens within our county who will have access to different services, jobs, and benefits. I can think of very few things which are more un-American than dividing up citizens this way.

Sincerely,

Javier Medina

Vaccine mandates that limit jobs, entertainment, etc create a class system. “You are vaccinated, you may sit inside in the warmth to dine” “you are not vaccinated, you may sit in the shivering cold... hope you don’t get sick”. This is division and discrimination and it is coupled a lack of understanding of individual situations.

Mandates take medical decisions out of the hands of those that know their health best.

U.S.C. - How To Shackle The Corrupt Government Gang

From Walter Burien
<http://CAFR1.com>
11-1-4

Prepared by Leonard Henderson
<http://familyrightsassociation.com>

Don't complain about Government Corruption, enforce the standing law and put the shackles on the perpetrators one steady and forceful step at a time.

I do note that with an inherently corrupt system, those corrupted inside players or their agents in the courts will not in most cases enforce the law and indict themselves for their own crimes due to "corrupted political pandering and the misbegotten money involved at their disposal," you must "take out" for justice the Wolves in the chicken coop yourself in-order to in-force the law. The following is the Law at your disposal for "your" use and in-force-men-t.

Walter Burien <http://CAFR1.com>

Title 18, U.S.C., Section 241 Conspiracy Against Rights

[U.S. Code](#)
[Title 18](#)
[Section 241](#)

This statute makes it unlawful for two or more persons to conspire to injure, oppress, threaten, or intimidate any person of any state, territory or district in the free exercise or enjoyment of any right or privilege secured to him/her by the Constitution or the laws of the United States, (or because of his/her having exercised the same).

It further makes it unlawful for two or more persons to go in disguise on the highway or on the premises of another with the intent to prevent or hinder his/her free exercise or enjoyment of any rights so secured.

Punishment varies from a fine or imprisonment of up to ten years, or both; and if death results, or if such acts include kidnapping or an attempt to kidnap, aggravated sexual abuse or an attempt to commit aggravated sexual abuse, or an attempt to kill, shall be fined under this title or imprisoned for any term of years, or for life, or may be sentenced to death.

Title 18, U.S.C., Section 242 Deprivation of Rights Under Color of Law

[U.S. Code](#)
[Title 18](#)
[Section 242](#)

This statute makes it a crime for any person acting under color of law, statute, ordinance, regulation, or custom to willfully deprive or cause to be deprived from any person those rights, privileges, or immunities secured or protected by the Constitution and laws of the U.S.

This law further prohibits a person acting under color of law, statute, ordinance, regulation or custom to willfully subject or cause to be subjected any person to different punishments, pains, or penalties, than those prescribed for punishment of citizens on account of such person being an alien or by reason of his/her color or race.

Acts under "color of any law" include acts not only done by federal, state, or local officials within the bounds or limits of their lawful authority, but also acts done without and beyond the bounds of their lawful authority; provided that, in order for unlawful acts of any official to be done under "color of any law," the unlawful acts must be done while such official is purporting or pretending to act in the performance of his/her official duties. This definition includes, in addition to law enforcement officials, individuals such as Mayors, Council persons, Judges, Nursing

Home Proprietors, Security Guards, etc., persons who are bound by laws, statutes ordinances, or customs.

Punishment varies from a fine or imprisonment of up to one year, or both, and if bodily injury results or if such acts include the use, attempted use, or threatened use of a dangerous weapon, explosives, or fire shall be fined or imprisoned up to ten years or both, and if death results, or if such acts include kidnapping or an attempt to kidnap, aggravated sexual abuse or an attempt to commit aggravated sexual abuse, or an attempt to kill, shall be fined under this title, or imprisoned for any term of years or for life, or both, or may be sentenced to death.

Title 18, U.S.C., Section 245 Federally Protected Activities <A [Laws: Cases and Codes](#)
[U.S. Code](#)
[Title 18](#)
[Section 245](#)

1) This statute prohibits willful injury, intimidation, or interference, or attempt to do so, by force or threat of force of any person or class of persons because of their activity as:

- a) A voter, or person qualifying to vote...;
- b) a participant in any benefit, service, privilege, program, facility, or activity provided or administered by the United States;
- c) an applicant for federal employment or an employee by the federal government;
- d) a juror or prospective juror in federal court; and e) a participant in any program or activity receiving Federal financial assistance.

2) Prohibits willful injury, intimidation, or interference or attempt to do so, by force or threat of force of any person because of race, color, religion, or national origin and because of his/her activity as:

- a) A student or applicant for admission to any public school or public College;
- b) a participant in any benefit, service, privilege, program, facility, or activity provided or administered by a state or local government;
- c) an applicant for private or state employment, private or state employee; a member or applicant for membership in any labor organization or hiring hall; or an applicant for employment through any employment agency, labor organization or hiring hall;
- d) a juror or prospective juror in state court;

e) a traveler or user of any facility of interstate commerce or common carrier; or f) a patron of any public accommodation, including hotels, motels, restaurants, lunchrooms, bars, gas stations, theaters...or any other establishment which serves the public and which is principally engaged in selling food or beverages for consumption on the premises.

3) Prohibits interference by force or threat of force against any person because he/she is or has been, or in order to intimidate such person or any other person or class of persons from participating or affording others the opportunity or protection to so participate, or lawfully aiding or encouraging other persons to participate in any of the benefits or activities listed in items (1) and (2), above without discrimination as to race, color, religion, or national origin.

Punishment varies from a fine or imprisonment of up to one year, or both, and if bodily injury results or if such acts include the use, attempted use, or threatened use of a dangerous weapon, explosives, or fire shall be fined or imprisoned up to ten years or both, and if death results or if such acts include kidnapping or an attempt to kidnap, aggravated sexual abuse or an attempt to commit aggravated sexual abuse, or an attempt to kill, shall be subject to imprisonment for any term of years or for life or may be sentenced to death.

Title 18, U.S.C., Section 1001 Fraud and False Statements

[United States Code](#)

[TITLE 18 - CRIMES AND CRIMINAL PROCEDURE](#)

[PART I - CRIMES](#)

[CHAPTER 47 - FRAUD AND FALSE STATEMENTS](#)

U.S. Code as of: 01/02/01

Section 1001. Statements or entries generally (a) Except as otherwise provided in this section, whoever, in any matter within the jurisdiction of the executive, legislative, or judicial branch of the Government of the United States, knowingly and willfully - (1) falsifies, conceals, or covers up by any trick, scheme, or device a material fact; (2) makes any materially false, fictitious, or fraudulent statement or representation; or (3) makes or uses any false writing or document knowing the same to contain any materially false, fictitious, or fraudulent statement or entry; shall be fined under this title or imprisoned not more than 5 years, or both.

18 USC Sec. 1203 TITLE 18 - CRIMES AND CRIMINAL PROCEDURE PART I - CRIMES
CHAPTER 55 - KIDNAPPING

[Laws: Cases and Codes](#)

[U.S. Code](#)

[Title 18](#)

[Section 1203](#)

STATUTE

(a) Except as provided in subsection (b) of this section, whoever, whether inside or outside the United States, seizes or detains and threatens to kill, to injure, or to continue to detain another person in order to compel a third person or a governmental organization to do or abstain from doing any act as an explicit or implicit condition for the release of the person detained, or attempts or conspires to do so, shall be punished by imprisonment for any term of years or for life and, if the death of any person results, shall be punished by death or life imprisonment.

[United States Code](#)

[TITLE 18 - CRIMES AND CRIMINAL PROCEDURE](#)

[PART I - CRIMES](#)

[CHAPTER 109 - SEARCHES AND SEIZURES](#)

U.S. Code as of: 01/02/01 Section 2234. Authority exceeded in executing warrant Whoever, in executing a search warrant, willfully exceeds his authority or exercises it with unnecessary severity, shall be fined under this title or imprisoned not more than one year. U.S. Code as of: 01/02/01 Section 2235. Search warrant procured maliciously Whoever maliciously and without probable cause procures a search warrant to be issued and executed, shall be fined under this title or imprisoned not more than one year.

Section 2236. Searches without warrant Whoever, being an officer, agent, or employee of the United States or any department or agency thereof, engaged in the enforcement of any law of the United States, searches any private dwelling used and occupied as such dwelling without a warrant directing such search, or maliciously and without reasonable cause searches any other building or property without a search warrant, shall be fined for a first offense not more than \$1,000; and, for a subsequent offense, shall be fined under this title or imprisoned not more than one year, or both. This section shall not apply to any person - (a) serving a warrant of arrest; or (b) arresting or attempting to arrest a person committing or attempting to commit an offense in his presence, or who has committed or is suspected on reasonable grounds of having committed a felony; or (c) making a search at the request or invitation or with the consent of the occupant of the premises.

[More on Section 2236](#)
[Laws: Cases and Codes |](#)
[U.S. Code](#)
[Title 42](#)
[Section 1983](#)

Sec. 1983. - Civil action for deprivation of rights

Every person who, under color of any statute, ordinance, regulation, custom, or usage, of any State or Territory or the District of Columbia, subjects, or causes to be subjected, any citizen of the United States or other person within the jurisdiction thereof to the deprivation of any rights, privileges, or immunities secured by the Constitution and laws, shall be liable to the party injured in an action at law, suit in equity, or other proper proceeding for redress, except that in any action brought against a judicial officer for an act or omission taken in such officer's judicial capacity, injunctive relief shall not be granted unless a declaratory decree was violated or declaratory relief was unavailable. For the purposes of this section, any Act of Congress applicable exclusively to the District of Columbia shall be considered to be a statute of the District of Columbia Title 42, U.S.C., Section 14141

Pattern and Practice
[Laws: Cases and Codes](#)
[U.S. Code](#)
[Title 42](#)
[Section 14141](#)

This civil statute was a provision within the Crime Control Act of 1994 and makes it unlawful for any governmental authority, or agent thereof, or any person acting on behalf of a governmental authority, to engage in a pattern or practice of conduct by law enforcement officers or by officials or employees of any governmental agency with responsibility for the administration of juvenile justice or the incarceration of juveniles that deprives persons of rights, privileges, or immunities secured or protected by the Constitution or laws of the United States.

Whenever the Attorney General has reasonable cause to believe that a violation has occurred, the Attorney General, for or in the name of the United States, may in a civil action obtain appropriate equitable and declaratory relief to eliminate the pattern or practice.

Types of misconduct covered include, among other things:

1. Excessive Force 2. Discriminatory Harassment 3. False Arrest 4. Coercive Sexual Conduct 5. Unlawful Stops, Searches, or Arrests

Subject: COVID-19 Kitsap Public Health Board

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

To whom this may concern,

It has come to my attention that as of September 28th at 11 there will be a meeting with the Kitsap public health board in regards to what steps we will make as a community moving forward on COVID vaccination passports and mandates.

My name is Mariah Washington-Abundo and I have been a resident of Port Orchard, Washington for 4 years now. I was born in Texas. In 2017 the military brought me to Bremerton, Washington but in 2019 I got out and decided to stay. I've truly made this my home and have enjoyed every single experience here. I've found family, people that are here through thick and thin by my side, I've met amazing beings while working at the shipyard and convenient store next to Bremerton ferry. I've also found joy within work by becoming a teacher to many little ones here around the Kitsap area.

Since the beginning of this pandemic I've recognized that my constitutional rights as a citizen of the United States and my humanity rights are being tested almost as if someone is seeing if I'm paying attention and if I'm not they might be snatched away before anything could be done about it. Not only that but this pandemic has been a make or break for us as humans to stand together as one regardless of our beliefs, race, backgrounds. I feel This is a time for us to recognize that all of us on planet earth can exist without having the same beliefs as one another and to accept each other. There is no law in existence that requires me to be tested, vaccinated, or masked, under any condition. I have a right to what goes in my body and what doesn't. It would be unlawful as well to require proof of vaccination for entry to public places or venues open to the public. I do not agree with the option of a required vaccination in any aspect including passports. I understand that health and safety is important, so is the truth with this pandemic and what the purpose of it is. It sounds crazy that we would be at a point to caring around a "vaccination passport". That would be completely against ADA and HIPA. So what would that make the ones that are here to help support us as a state if our on politicians are willing to violate our rights and try and over ride them?

I can say that this whole pandemic has taught me to stand my ground for myself, to speak my truth/ find the truth within, and to gain knowledge on the rights I do have which people have risked/lost their life's for. I believe through every experience there is chance for growth. There is positives aspects in an experience and negative aspects, I get to decide what lenses I look through. I do

appreciate your time to read on my prospective with what's ahead. I hope that as a community we move together by taking in everyone's prospective and finding the most best solution while keeping in mind the rights that are here to protect us as the people of Washington and of the Untied States of America.

Sincerely,

Mariah Washington-Abundo

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

To Whom it may Concern,

I wish to strongly voice my OBJECTION to vaccine passports for Kitsap County restaurants for the following reasons:

1. Violation of citizen's rights to medical privacy...HIPPA
2. The negative economic impact to our local businesses just recovering from the lockouts and recent mandates.
3. Enforcement of "passports" would place additional undue burdens on the businesses

If more people are in fact getting vaccinated and mask mandates are back, shouldn't the problem be getting better? The fact that you are holding meetings and calling them "public" but not allowing "Public input" makes it appear as though the decision has been made without any public inclusion.

Respectfully,

Christina Brisbon

Mr. Grellner,
What a huge disappointment that a vax mandate would even be considered in Kitsap Co.
Not only is it a huge governmental overreach by people who are too big for their britches, but will no doubt have a terrible impact on our local businesses.
I beg of you to put a lot more thought into this.
Sincerely,
J. Smith

Dear members

Thank you for your time today, I just wanted to voice my thought on the Covid meeting tomorrow. I would like to see us follow the numbers and science that is made public on the Kitsap County Health website and make our decisions based on this and not someones opinions. When I looked at the site today this is the numbers that were just updated

Deaths

0-19 0

20-29 0

30-39 2

40-49 5

50-59 18

60-69 32

70-79 41

80 Plus 74

Average age of death is 78

5% of Covid cases are in the Hospital

When you look at the numbers that our posted we are doing very in 20 months of Covid-19.

I do not want to use my covid card as a way to get into places and at this time I feel this would just dived our county and not united us as one. Businesses do not have the staff to check for vax cards nor do most want to have this burden.

Please wait on any decisions to see how this go since the Sun just reported cases are down 24.8% in Kitsap County. I would like to see you educated the public with the numbers from Kitsap Health Department and make choices based on numbers so people can see. When I let people know about the website they are not informed about it they only get their info from whoever not facts or numbers from our health department. Please look at the numbers not bad over 20 months. One more thing BLM is now protesting NYC Mayor saying vac passports are racist we are not a racist county or state and it might be only a matter of time before BLM shows up in our state and calls us racist.

Thank you Marty

On Monday, September 27, 2021, 01:58:17 PM PDT, Ruth Regina <ruthregina26@yahoo.com> wrote:

Let me begin with the fact this meeting is being held **remotely** and will **not allow** public discussion.

We are all educated on COVID, some have had it, some have been vaccinated, others have used therapeutics while others simply carry on with their lives. That's called liberty! This "virus" has a 98% survival rate. Most of us have lost someone near and dear to us from cancer. We all have the fear of hearing the "C" word during a medical exam but, imagine if we knew cancer had a 98% survival rate! Why, we would feel like we have a strong fighting chance of beating cancer! Oh, but then we are diagnosed with the "virus " and the consensus is, we're going to die a horrible death on a ventilator!" We know that it can be difficult for the obese, those with underlying health conditions, and the elderly. I am in my senior years and have already had COVID and I am still here to talk about it. I don't take COVID lightly.

Our doctors and nurses have been on the frontlines for nearly two years and **now** they are going to be **required** to get a vaccination that they may not want to receive? A vaccination made by pharmaceutical companies that bares no responsibility if there are side effects or end up infected with the very virus you are allegedly being protected from. Then of course there are the therapeutics nobody wants to talk about! Why? Why are USPS workers not required to get the vaccine? Why is Congress not required to get the vaccine? Why are people crossing our borders not required to get the vaccine? Maybe the virus is really intelligent and knows ahead of time you work for the USPS? Or your a member of Congress? Or you traveled long and far to cross illegally into the United States. Bringing not only COVID but other diseases that had been previously eradicated from this country.

The Kitsap County Health department has no legal authority to enforce this mandate on the people of Kitsap County. It is my recommendation that the Mayors of each city have the courage to follow the direction of Mayor Armacost of Sequim Washington and declare their cities a Constitutional City and honor the 14th Amendment of the Constitution and not honor the illegal County Mandate.

"What country can preserve it's liberties if their rulers are not warned from time to time that their people preserve the spirit of resistance?"-Thomas Jefferson.

Dear Mr. Grellner,

I don't have any idea where you stand on this issue, but I respectfully request that you do all in your power to protect the freedoms of all citizens. No one should be required to inoculate themselves in order to live their daily lives. Government's role is not to regulate the choices of the people, nor control how private businesses operate. We have already seen how COVID-19 and all its supposed variants have been undeterred by any government mandate. If you mandate anything, please make it freedom.

Respectfully,
Abigail Overton

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Keith Grellner, RS Administrator

Respectfully, I am opposed to requiring vaccines for entry into businesses.

I am not opposed to vaccines per se, but it is the right of each individual to choose the best action for their own health and well being.

The vaccine has harmed thousands and no one person, government or health department should regulate what a person chooses to put into their own body.

Thank you

God bless
Kathy Ashley

[CAUTION]: This email originated from outside Kitsap Public Health District. Do not click links or open attachments unless you are expecting this email. If you are unsure please contact IT.

Keith Gellner,

I am a resident of Kitsap County and I strongly oppose the idea of forcing people to produce documents of any kind in order to patronize businesses or conduct daily life supporting activities. I am a strong supporter of small and local businesses and wish to see that all those who choose to own a business in Kitsap County have the best chance at making a living in Kitsap County.

As a free American citizen I will never do business with any establishment that requires paperwork of any kind to enter.

Vaccinated and unvaccinated people both can get and transmit the virus. People that have survived COVID have a natural immunization that is 27 times stronger than the vaccine. These people are now being treated as second class citizens.

There is zero talk about them because of this restrictive plan to require a vaccine to enter a business establishment.

I will keep this short although there is so much more to say.

Please Keep Kitsap County Free and welcoming to all.

Respectfully,

Eric Ludlow

From: Melissa Siegel

Re: Statement Regarding Informed Consent and Medical Sovereignty

BLUF: For those of you actually considering this genocidal/communistic experiment; how much are you getting paid? I also wanted to let every one of you know that if you agree with all these mandates and the coercion/communistic ideologies of putting any of this into action, you'll be in my prayers.

1. I, Melissa Siegel am against medical experimentation without verifiable and full informed consent on all potential side effects of said treatment with an unconditional free will choice to refuse the medical experiment on untested or unsafe medical interventions, such as a faulty use of a PCR test or government illegal mandates regarding the COVID-19 experimental vaccine.
2. I assert that no government individual, agency or other corporate representatives have been granted authority over the "PEOPLE'S" private health decisions and we maintain our sovereign control over our bodies in unconditional terms, regardless of a so called "State of Emergency".
3. I assert it is against State, Federal and International Laws that exist regardless of a declared State of Emergency (particularly, unlawfully prolonged ones), to mandate the FDA's (Food and Drug Administration) EUA (Emergency Use Authorization) for COVID-19 "vaccines" or any product or procedures, whether EUA or not, without full informed consent of all ingredients and potential side effects; and to institute illegal mandates such as vaccine passports for access to schools, workplaces, restaurants, etc., is completely unconstitutional and scientifically unsound.
4. I assert that to allow and worse, to facilitate the coercing, shaming, bribing or otherwise forcing citizens into being a test subject in any experiment without full informed consent in order to keep their employment, attend schools, or participate within their communities, is to participate in crimes against humanity.
5. I assert that until such time as the United States of America and its Constitution and the Bill of Rights are dissolved, all citizens as "We the People," citizens, are protected by that Constitution and Bill of Rights along with the Federal and

State Health statutes that are codified in the Nuremberg Code. Violations of the Nuremberg code and Bill of Rights is against all the “We the People’s” inherent and Constitutional Rights.

6. I assert that none of the 10 codes of Medical Ethics in the Nuremberg document are being honored in these experimental COVID-19 vaccines...None. And without full disclosure as to the ingredients of these gene therapies (i.e., mRNA vaccines), and due to secret proprietary ingredients maintained by the pharmaceutical corporations in question, the basic requirement of informed consent is not possible. See the following link: <http://www.cirp.org/library/ethics/nuremberg>

7. I assert that “We the People” have the right by law to refuse any products including all EUA drugs technologies, vaccines, EUA tests, masks or medical procedures, EUA investigational products, population genomics programs, EUA healthcare data tracking and surveillance platforms. A lawful application of the terms of a lawful Emergency Use Authorization includes the right to informed consent and the option to refuse. The FDA can only issue an EUA if there are no other cures, treatments or prophylactics available. The FDA has therefore breached this regulation, when it issued the EUA, as they were informed prior to that issuance of alternative and successful treatments such as Ivermectin, Hydroxychloroquine, Zinc, vitamins B, D and C. So, for the FDA to continue asserting that “COVID vaccines” are the only way to “get back to normal” is entirely fraudulent!

8. I assert if any individual representing any business/corporation that chooses to enforce any illegal mandates such as a medical procedure (the PCR test) or medical therapy (the COVID-19 vaccine) on healthy employees, vendors, or sales representatives by strongly suggesting these tests and treatments are necessary, should be offered on an absolutely voluntary basis without any recriminations whatsoever. Otherwise, these corporate individuals may be held liable for any damages, injuries or loss of employment due to refusing the illegal mandates. For employers to threaten employees, vendors or sales representatives to adhere to unlawful dictates is to participate directly in harm being carried out on employees, vendors and sales representatives, and as such these employers may be liable for damages of said harm.

9. I assert that the First Amendment to the United States Constitution prevents the government from making laws which regulate or abridge the freedom religion, the freedom of speech, the freedom of the press, the freedom of assembly, or the right to petition the government for redress of grievances. Since our “We the People” freedoms have obviously been profoundly and unlawfully eroded during this alleged “pandemic” because of unjustified and disastrous lockdown mandates. “We the People”, having all political power, never granted authority to any one, whether a lawmaker, government official, law enforcement official, employer, doctor or nurse to force any medical intervention upon us through their opinions, policies, programs or mandates being falsely presented as law. On the contrary, “We the People,” maintain adherence to the laws that were in place before this virus or any of its variants emerged.

10. I recognize other foreign and domestic agendas at play that are repugnant to the Constitution and Statutes designed to protect us and so we firmly denounce them and their influence on our Representatives. We demand an immediate investigation into the fraudulent nature of this, “pandemic” and the unsustainable claim of a “State of Emergency.”

11. I affirm that “We the People” are not feeling protected, but suffocated by arbitrary restrictions based on inaccurate data and unsubstantiated fears. This coupled with unprecedented levels of censorship and fake news based on misleading and ever-changing data, reveals a “public servants” lack of comprehension and memory regarding the oaths “public servants” took to uphold the Constitution of the United States of America. Due to this breach of duty to protect our First Amendment Rights and Trust, the Affiants demand that each of you rectify this breach immediately, regardless of any State of Emergency, whether or not such a state, in fact exists.

12. I demand that you prove that there is in fact, justification for a State of Emergency based on an actually isolated virus called Sars Cov2 or any variant thereof. Claiming justification for the “Emergency Powers and EUA,” that are based on the rising “Case Numbers” from the Drosten’s PCR test, a version of Nobel Prize laureate Dr. Kary Mullis’ invention of the PCR test, will not hold up in court, legally or medically, having been proven to be inaccurate and fraudulent in citing

rising case numbers. The Affiants also demand that you provide full disclosure of new laws (not mandates) that grant you authority to exercise this force against your constituents, as no laws exist at this time.

13. I demand you respond to “we the people” and hear our demands. If you fail to respond to us, within the week, you will have acknowledged trespassing against the Constitutional and God-given Rights of the People that you have sworn to protect as well as participating in the crimes mentioned herein. You further agree, that if you do not respond showing Constitutional Provisions authorizing the before mentioned breaches within seven business days, you will have agreed to the facts herein, that no court shall re-examine this matter as you will have thereby agreed to accept the above-mentioned terms of truth and law. This letter authored by two Citizens of the United States of America and residents in Washington State, in Kitsap County, stands as a Notice of Liability and will be used as evidence of wrongdoing, if needed. In the meantime, the Citizens also demand that you cease and desist coercing the “We the People” into surrendering their right to opt out of PCR testing and dangerous mRNA experiments, gene therapies, vaccines or any medical mandates whatsoever.

The Citizen, Melissa Siegel presents this statement, on 27th day of September in the year of our Lord Two Thousand Twenty-one.

With the deepest sincerity,
Melissa Siegel

Subject: OPPOSE VACCINE PASSPORTS

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Vaccine passports to enter public businesses is a recent unprecedented step in our Country and one of dubious Constitutionality. Despite Kitsap Public Health weekly reports that claim “Washington State recently passed some important vaccination mandates”, the truth is no laws have been passed by the Washington State legislature pertaining to COVID. And oft referenced historical cases universally were based on legislative action, not decrees by governors and health officials. Further, those earlier cases all revolved around diseases that had mortality rates significantly higher than COVID, which has been trending toward flu levels.

Laws for vaccines have always recognized the need for medical and religious exemptions. These exemptions were manageable as laws primarily affected schools, which were frequently the outbreak source. How will exemptions be managed when every business is effected? Every person? And how will the county insure equitable treatment will be maintained when these actions are taken. Intentionally or unintentionally, these restrictive measures target religious, racial, ethnic and political minorities. Individual medical and religious concerns are real! But it seems like public health have become the doctors that are too aloof to listen to the actual patient. Several minority groups are deeply opposed to forced medical procedures as they bring back cultural memories of Tuskegee, Haiti and other medical experiments run amuck. And let us be brutally honest, public health agencies have NOT been the trusted source they think of themselves — virus origins, masks, don't trust vaccines, trust vaccines. Requiring businesses to turn away unvaccinated, to deny them business and livelihood, is not too far removed from 1933 Germany.

Medical professionals, especially public health have taken a dangerously myopic view. A recent Medium post concerning comorbidity and the vaccines rattled off a list of diseases that are significant problems for Covid patients and concluded that the positives outweighed negatives for anyone with pre-existing conditions, any preexisting conditions. Mysteriously left out was neurological, autoimmune, environmental exposure immune syndromes, and a host of other rare diseases that ARE vaccine safety concerns for many of us. Concerns that are only evident after lengthy disease specific vaccine trials. I have had transverse myelitis and Gulf War Syndrome, and have spent ten years seeking expert medical advice on every vaccine I receive. I can't do common flu mist vaccines many deem safe as there is an elevated TM risk. Somehow anyone with these rare conditions are supposed to trust a novel vaccine? Ultimately, I did obtain COVID vaccines, but I did so with trepidation as not a single doctor could offer medical evidence supporting vaccination safety of those who suffer from rare diseases — it is not a decision I want some bureaucrat making for me.

The proposed changes, frankly miss the mark. One would expect if the government is going to so restrict our freedom to shop, eat, buy basic goods and services that there would be a preponderance of evidence showing such need. Yet when we review where COVID outbreaks are occurring it is in healthcare, long term care facilities, jails and schools. Most retailers and private businesses have been operating successfully for months without wide scale outbreaks. Average citizens and business people are once again asked to sacrifice our freedom for cases largely out of our control. These businesses will now be burdened with having hired vaccine gatekeepers? Will the Washington State Ferries and Kitsap Transit be equally required to ask for vaccine passports for boarding? Or does COVID not spread there? And as a consumer I will have to reveal medical

information to a minimum wage worker with zero privacy guarantees? And the implications of requiring 100% vaccinated and masked to enter a business are quite simply that the vaccine is so ineffective at stopping the spread that even fleeting contacts are dangerous. Yet only 15 cases from the Kitsap County Fair.

These actions are incongruent with other state, local and NGO actions. In the last few weeks there has been an influx of migrants from around the world. Everyone knows they are being quietly relocated into our communities. We also know that many are arriving without vaccines or testing for COVID, for measles, polio, tuberculosis, etc. The immigration debate is above state and county level discussion, but the relocation isn't when we are placing burdensome restrictions on citizens.

Vaccine papers/passport policy ignores valid science regarding natural immunity. Though it may not be the advised course of immunity, the fact remains 14,000+ residents have tested positive. Breakthrough cases amongst natural immunity are extremely rare, though we've seen vaccine breakthrough cases are quite common. Large clinical studies out of Cleveland and Israel have shown natural immunity is viable, even if not advisable. Should these people now be forced to have the vaccine that may provide little additional protection but isn't entirely without risk.

One of the justifications for these measures is that we are facing a critical care crisis. But is this crisis a result of just the disease, or is it the unilateral mandates by the Governor that has resulted in many of our front line workers leaving? Is the recent deaths caused by only being at 70% vaccinated or is it a result of public policy decisions that resulted in first responders, nurses and doctors leaving? The trend isn't just confined to healthcare, many people are refusing to work rather than be vaccinated. I see a lot of criticism of the general public, a lot of finger pointing at people making a living, not much self reflection or review of how policy actions turned out.

David Fennewald

Keith Grellner,

I strongly oppose implementing a vaccine requirement to enter businesses. This will place undue hardship on businesses already struggling during the almost two years of this pandemic.

Cases in Kitsap county are trending down and those who want or feel they need the vaccine have done so, and it's proven that those with the vaccine can still pass on the virus.

I feel this is just something we are going to be living with, much like the annual flu.

Please be open minded and realize how much of a government overreach this is. In my lifetime, a medical procedure has never been imposed on the public.

I would like to voice my concern and opposition to any and all vaccine requirements. Whether someone gets the vaccine, is between them and their doctor, and should not be a condition of employment or entry into public spaces. The vaccines we have available have shown not to have the efficacy in preventing infection that was originally claimed, some studies show only 42%. And there is no credit for natural immunity, which more studies are showing to be as strong or stronger than that obtained from vaccination. Not to mention, this is a gross infringement on individual rights.

Thank you,

Holly Nuckols

Dear Members of Kitsap Public Health,

We are a military family, retired now after 21 years of service in the US Navy. We have lived all over this beautiful country of ours and when it came time to finally settle down, we chose Poulsbo WA as our home. We love it here, but now it is breaking our hearts the direction that this state is heading. Washington is on a very slippery slope. We must uphold individual medical freedoms. We cannot continue to sow division and discrimination in the name of public health. Let us remember our world history or we will be doomed to repeat our past mistakes. Furthermore, it is not the place of any business to inquire about a person's private medical information. That is quite simply not their job.

Please reject the idea of a vaccine passport. It would not be good for the people or businesses of Kitsap County.

Thank you for your consideration,
Dawn Weikel

Subject: Kitsap Public Health Board Meeting Tomorrow, 28 September 2021

[CAUTION]: This email originated from outside Kitsap Public Health District. Do not click links or open attachments unless you are expecting this email. If you are unsure please contact IT.

Dear RS Administrator Grellner,

I am a proud resident of Kitsap County, and have been most all my life. I am writing to you today to ask you for your total consideration as the public health board meets tomorrow.

I am a very concerned citizen. Though currently skeptical of the inoculations, I fully comply with the direction to wear a mask at work, abiding by requests posted at public places, gatherings, agencies and venues to wear a mask. I don't make a big deal out of it, doing it gladly and voluntarily, respecting those businesses, venues, private gathering places, agencies, and people in general. While others and I may have different viewpoints on the inoculations, I will do my part, where it is reasonable, to protect myself and others during this pandemic. I also encourage civilized conversation/debate and exchange of ideas of the topic.

I don't write many letters. But as a concerned citizen, when we're at the point where a resolution/order is being considered by the county health board is about to make a decision for me, I must say something. A line needs to be drawn between personal medical freedom, and a push for inoculations that keep people out of places that would otherwise welcome customers/clients if it weren't for a resolution/order that prevents the customer/business/agencies/venue relationship. Overall, this does more damage than good. Even in a pandemic, reasonable accommodation needs to be had, for businesses/agencies/venues to stay open, and customers/clients to take care of their needs through these places. Some very important needs are met every day through these places, and blocking people from them hurts everyone, in a few ways.

The reasonable action to take of the options you've been presented with, is to allow this to play out, letting the people, businesses and agencies decide for themselves - to learn more, and take personal responsibility. Please consider the needs of all of Kitsap County, as you consider these things in tomorrow's meeting. Thank you in advance, for your full consideration of the situation, as you decide on a course that affects everybody.

Thank you for your support of our community.

Very Respectfully,

K. Dearing

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Please do not require vaccine passports for Kitsap County. It is a violation of privacy and an aggressive act of segregation. There are many documented full proof treatments available for treating covid and any variants. Where there is risk there should be choice. Please vote no for any mandates.

Thank you.

Subject: Comments on BOH Agenda 9/28

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

To whom it may concern,

I am writing to express my comments and concerns on the options that are stated in the memo under the "Recommended Action" section of the agenda.

I do not agree with any action that requires proof of vaccination for entry to be enforced by businesses open to the public. Doing so will only harm businesses. There are people, vaccinated and unvaccinated, who will not be patronizing at those businesses if proof is required. By having less patrons at these businesses, it will cause a loss of revenue and they may inevitably close down. In addition, having proof of vaccination for entry is a discriminatory action towards people who choose not to get vaccinated or who are unable to get vaccinated due to medical or religious reasons.

I also do not agree with employers, private or governmental, to mandate their employees to get vaccinated. Each person has a right and choice to get vaccinated or not.

Lastly, taking no action and letting the current action play out would be the best path to take. As we have seen, waves of COVID do rise and decline. With the delta variant, we are seeing the same behavior from the virus: cases rise and begin to decline after a period of time.

Thank you for taking the above comments and concerns into consideration.

First off I have my vacation and feel this is so morally and constantly wrong to have to show proof of vaccination. So I will not show proof does that mean I cant buy food. Or eat if so I will be filling lawsuit against members of the board.

Vote NO on mandating covid vaccines for businesses! If this is voted "yes", it will be setting up a discriminatory environment (even more than what is already happening!)

Mr. Grellner,

I understand that Kitsap County is considering a vaccine mandate at tomorrow's meeting for people to be permitted entry to businesses. I am **strongly opposed** to such a mandate that oversteps government authority and restricts personal freedom granted by the Constitution.

It would be a different story if the vaccine prevented contracting or spreading COVID. However, the vaccinated among us are still contracting and spreading COVID, so if the mandate were imposed, it would not stop the spread.

Thank you for your consideration of this most important matter.

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Kitsap County Health Board

Good Afternoon. I understand that you are to hold a Health Board meeting this week without the option of public comment.

With regard to the COVID-19 vaccination requirements recommendations. I have read the recommendations, and while I understand your concern for overtaxing medical facilities and overall public health, I feel there are many concerns omitted from the proposals.

- Will you be addressing natural immunity? There are many scientific studies showing the effectiveness of natural immunity, yet few discussions on exempting those who have recovered from COVID-19 from vaccination mandates. If your concern is the overall health of the community, then those with natural immunity pose no greater risk than those vaccinated who have never had COVID-19.
- Will you be addressing those who have a valid medical exemption (severe reactions to previous vaccinations, underlying health conditions where the vaccine may be more harmful than beneficial, etc.)?
- Will you be addressing those who have strong religious beliefs with either vaccinations overall or the ingredients used in either the testing of or the actual vaccine itself?
- If you do chose to elect a "vaccine passport", are you denying those without passports basic essentials that they would need to obtain from grocery stores, pharmacies, etc?
- If you require vaccine passports, what of those that must enter county facilities to conduct business such as paying fines, licenses and serving on jury duty?
- Are you considering the impact on small business that could lose up to 40% of their customer base in addition to staff, where staffing levels are already affecting their businesses?
- Are you factoring in the impact this will have on the churches in the area who serve and support those in need in this community?
- We are seeing an uptick in "break-through" cases where those vaccinated are receiving AND transmitting the virus. Those that are vaccinated are more likely to spread the virus a-symptomatically in the community. Why would we allow the vaccinated to enter the community and potentially spread the virus, but not the unvaccinated when the COVID-19 recovery rate is approximately 99% regardless of vaccination status.

Finally, if requiring masks in public facilities is effective, then why change the policy that is currently in place in this county?

We have a small county that has a nice community feel to it, these mandates are polarizing to the community and I fear this will further deepen the gap between our community members.

Respectfully,

Robin Simmons

Subject: Vaccine Passports

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Mr. Grellner,,

I strongly oppose the proposed vaccine passport proposal being considered. I believe that this sort of action amounts to unnecessarily limiting freedom. The mandate would do nothing to protect those who are vulnerable and would only be punitive in nature. It is simply a form of discrimination. This sort of mandate has no place in a society that embraces individual liberty and choice. The vaccine is intended to protect the vaccinated from disease and by that definition, the unvaccinated cannot pose a threat to them. Public health funds would be better spent ensuring that those who are vulnerable need not venture out of the safety of their homes. The decision to vaccinate or not should expressly be between the individual and his/her doctor without government intervention.

Thank you for your time.

Sincerely,

Deanna Bailey

Subject: NO to biofascism, NO to vaccine requirements for public spaces

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Dear Mr. Grellner,

Please reject any discussion or implementation of vaccine requirements for any public spaces in Kitsap County (or anywhere else in the United States for that matter). Staffing and bed shortages at hospitals, extended wait times, etc. are the direct result of layoffs and threatening hospital and medical staff with termination of employment, causing many to resign their positions, not because of surges in viral contagion among the unvaccinated public. We know that there is no consistent way to test for variants, that more than one covid test has been recalled, that vaccinated individuals are neither immune nor do they prevent transmission of covid, and that there is reason to be skeptical about the way coding for inpatient/outpatient care and death certificates have been done. To entertain these lies is to be complicit in deceiving the people of Kitsap County with an intentionally false narrative.

Furthermore, several recent studies have also proven that those with natural immunity are several times better protected against both future infection and transmission. Regardless, all that is frankly irrelevant, because enforcing local businesses to enforce public compliance is *coercion*. (Let's pretend I was 100% wrong about what I said in the first paragraph -- this would *still* be coercion!) I am disgusted and appalled by both elected officials and unelected bureaucrats at every level of power in this State. These actions are arbitrary, unconstitutional, and immoral. The Public Health Board members do not have the authority to engage in tyranny against the very people and businesses who pay their salaries.

Human rights are not bestowed by the government, but by God, and therefore the government (not to mention regulatory agencies, health districts, and other bureaucratic offices) exists not to regulate or withhold, but rather to protect and uphold those rights. Vaccine requirements, or "passports" as people like to call them, have no place in a free society. There is absolutely no legitimate, moral, ethical, or constitutional reason of any kind to implement such a policy, which, along with the protocols and policies that would accompany it, would violate the United States Bill of Rights, the Nuremberg Code, HIPAA, and the Americans with Disabilities Act, just to name a few.

We know that there are inherent risks involved with all aspects of life. Depending on their circumstances, some people truly will decide to remain home, mask, and vaccinate, and as long as that is their choice, we support that. We also support those who would choose to take responsibility for their health in other ways that do not involve vaccines. While I would be personally annoyed, I even support private business owners making their own decisions *freely* about whether and how to discriminate against their potential customers. At least in that case the public also maintains the freedom to decide whether or not to patronize that establishment.

We simply ask that the Kitsap Public Health Board stays in its lane. Tell the truth, uphold just policies, do not be bribed nor bullied by higher levels of State authority who are pressuring each local district to enforce compliance. Vaccines should always be a personal decision based on conscience and there should be no social stigma attached to it either way, nor should there be a modern-day medical version of Jim Crow laws.

Thank you for your time,
Rhiannon Petrick

20210927

Oppose mandatory vaccines and vaccine passports.

To the members of the Kitsap Public Health District Board regarding the upcoming 2021-09-28 special meeting to discuss recommended action regarding current impacts of COVID-19, our local healthcare system, and possible solutions to stabilize the continuum of care in our community.

To Keith Grellner
Kitsap Health Board Administrator

I am writing to express first my acknowledgment that the circumstances regarding COVID-19 and its impact to our community, family, and friends is legitimate and real and it's heartbreaking to see people get sickness, disease, or virus of any kind at any time. Secondly, this is written with an understanding and appreciation for you and the boards dedication to public health and the earnest desire to seek solutions that result in healing and restoration of individuals health. I also share in the value and desire to see people and places be restored, renewed, and regenerated: from our urban places we live to our bodies.

The following petition and plea is rooted in appreciation and acknowledgement of incredible medical techniques and approaches that help heal people or help mitigate disease, including vaccines, but make a distinction with *the proposed mandatory COVID-vaccine and proof of COVID-vaccine requirements: that such a policy would be unethical, in violation of numerous laws and codes, and is unhinged scientifically.*

With that acknowledgment, **I write to petition you and the board to oppose any effort that seeks to require COVID-vaccines as mandatory and requirements to show proof of COVID-vaccines here in Kitsap County.**

It is understandable that such a decision could be made by you and the rest of the board as an attempt to "stabilize the continuum of care" and that a mandatory requirement as proposed would be proposed out of an interest in supporting public health but to these points I challenge on both scientific and political grounds.

Politically

You have no justification or authority to discriminate against segments of the population based upon whether or not they have consented to a medical procedure.

- Politically, you and the board would be operating outside of your legal jurisdiction and violating numerous laws and codes that protect individuals Civil Rights and individual liberty to informed consent including:

- US Constitution and 1st Amendment protecting individual's liberty: a mandatory vaccine requirement would restrict those who don't have it and prevent them from their life and activities.
- Civil Rights Acts: those who may choose not to have this Covid-vaccine for a variety of reasons would be forced to do something against their consent in order to provide a living, feed their families, and engage in life.
- Violating the Hippocratic Oath
- Violating the International Covenant on Civil and Political Rights Treaty
- Violating the Nuremburg Code
- Violating the Declaration of Helsinki

- You have no authority or reason to restrict the freedoms or invasively put aside informed consent in the population of those you represent in Kitsap County. Please oppose any mandates or restrictions that seek to discriminate against un-COVID-vaccinated individuals.

The situation appears be two-fold:

- 1) An operational and organizational challenge of short-staffed places of care
- 2) General population getting sick, having comorbidities, and complications including getting COVID-19.

If the root problem is short-staffed places of care, clinics, and hospitals that is an organizational and operational challenge and one that won't be solved by establishing, promoting, or requiring mandatory COVID-vaccines for the general population. It is a business challenge not to be solved by restricting the free movement of the population.

As long as the general population continues to increase in obesity, dietary problems, eating poor nutritional diets, and not being as active as should be we will see continued increase in health concerns and health crisis as acknowledged by past Kitsap County Health institutions.

https://kitsappublichealth.org/information/files/Chronic_Disease_Fact_Sheet.pdf

Proposed solution:

The most pragmatic solution going forward to alleviate the burden upon places of healthcare is to promote and encourage the population to develop as healthy as possible lifestyles, diet, and fitness. Boosting immune systems and encouraging improved cardiovascular health is fundamental to overall good health and positioning the population to be in the best possible condition to fight off any future sickness, disease, or virus.

A suggested course of action would be to promote a comprehensive health and diet in the population and in the most at risk and work with providers to make available immune and natural health boosting supplements of vitamins and minerals proven to help mitigate, treat, heal, and recover patients and people both pre and post COVID infection.

-

Scientifically

It is dishonest and unscientific to restrict the lives of people based upon whether or not they have consented to a medical procedure.

Scientifically, enacting and issuing discriminatory policies against un-COVID-vaccinated individuals is unethical, un-supported politically by law and international standards, and is incongruous with successful methods of treatment distinct from the Pfizer, Moderna, and J&J COVID-vaccines.

1. Enforcing COVID-vaccine requirements and proof of vaccination violates informed consent, medical privacy, the US Constitution, Civil Rights Acts, and International Codes and Standards:

- a. If you inject someone with the vaccines, you are injecting them with something you cannot possibly ensure or give them informed consent for
- b. Every shot is potentially iatrogenic (it can cause harm, has side effects)
- c. Taking more shots is not the path to optimal health.
- d. Natural immunity, good diet, supplements, exercise, adequate sleep, zinc ionophore is superior
- e. COVID injections increase all-cause mortality
- f. COVID injections increase the risk of death
- g. COVID injections, per the EUA, do not confer immunity or eliminate the potential transmission of virus to others; at best they mitigate symptoms a small percentage.

2. Immediately encourage and promote the myriad ways people have been treated and recovered from COVID from around the world:

- a. **95% of COVID attributed deaths have comorbidities associated**
 - i. <https://www.cdc.gov/nchs/covid19/mortality-overview.htm>
- b. **Promote the increase of healthy bodies and strong immune systems by:**
 - i. Active fitness
 1. build up a population of strong, healthy, cardio-strong, immune boosted natural systems
 - ii. Develop a good diet
 1. Curtailment of harmful, negative, and unhealthy foods (sugars, processed foods, junk food, etc...)
 2. Inclusion of healthy, locally grown, organic foods and meals
 3. Supplementing with helpful minerals, anti-oxidants, and vitamins
- c. **Acknowledge alternative treatments that successfully are being used to treat COVID from around the world:**
 - i. The Pfizer, Moderna, and J&J substances are not the only way people have been treating and recovering from COVID
 - ii. The Pfizer, Moderna, and J&J substances are still only Emergency Use Authorized and have not concluded safety trials, clinical round III trials, and are not 100% safe and risk free.
 1. <https://www.cdc.gov/vaccines/covid-19/eua/index.html>
 - iii. Alternatives to name a few: ivermectin, quercetin, hydroxychloroquine
 - iv. To enforce a county wide standard that basis access to services, jobs, entertainment, culture, hospitality, etc.. based upon whether or not an individual has had one of these three substances is erroneous, disingenuous,

and ignoring the accomplished mechanisms and strategies being utilized around the world successfully.

v.

3. Lift all Covid Restrictions

- a. It is impossible to achieve 0% risk or 100% risk free environment.
 - i. There will always be a presumed risk of contagious disease, sickness, or accident and it is dystopian to enact restrictive, discriminatory policies based upon consent to medical substances being injected into the body when there are alternative treatments and procedures available.
- b. The accepted estimated potential of death rate for most demographics falls within .02 to 1% and recovery from COVID is achievable. Continuing to proceed with further restrictions and coercion is anti-scientific in light of the successful treatment plans, availability of COVID-vaccine alternatives, and demonstration from other nations and states on treating COVID cases when they arrive.
 - i. <https://www.cdc.gov/coronavirus/2019-ncov/hcp/planning-scenarios.html>
- c. Acknowledge the current steps nations such as Denmark, Sweden, and Norway are taking by removing all of their COVID restrictions:
 - i. <https://www.reuters.com/world/europe/sweden-remove-most-remaining-pandemic-restrictions-this-month-2021-09-07/>

In conclusion, please do not approve of discriminatory and restrictive policies that include such measures as: COVID-vaccine requirements and proof of COVID-vaccines in Kitsap County. Establishing such a policy is un-scientific and politically motivated; not focused on achieving comprehensive health and restoration of people. The prescribed products produced by Pfizer, Moderna, and J&J are still only EUA substances and have not concluded all phases of clinical trials. It is unsafe and unethical to dictate the general population have these as stipulations of employment, entertainment, hospitality, recreation, and religious activity. There are safe and successful remedies and treatments available sans-COVID-vaccines and these should be celebrated, discussed, and promoted as a way to mitigate the health challenges present.

I encourage and petition you to act with honesty and boldness to demonstrate your care for the public by NOT approving of any measure that promotes, encourages, stipulates, determines, resolves, requires, and mandates COVID-vaccines as condition of access in Kitsap County public and private locations.

Sincerely,

Daniel David
Kitsap County Resident

Subject: Mandatory vax proof

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Dear Mr. Grellner,

My husband is now recovering from covid. He has been advised by Kitsap county doctors to get the covid vax after 90 days for two reasons:

1. Having covid gives a person 90 days to 6 month immunities.
2. If he were to get the vax now it may possible be harmful to him.

How would a policy of proof of vax affect those unable to get the vax?

I also had covid.

Will we be punished along with thousands of others?

Please do not make covid vax a proof for entering Kitsap County businesses.

Please do not pul this heavy burden on businesses that are already strained.

Sincerely
Karen Ross
