Yolanda Fong,

I am writing this email to make it know that I am adamantly against the vaccine mandate. Our Health is our concern and NO ONE else. I am happy that there are vaccine options for individuals who choose to take them. For those of us that choose to not take the vaccine please respect and support our freedom.

Know that this is where I stand, and many others with me.

Thank you.

Mr. & Mrs. Foxworthy,

This is to acknowledge receipt of your email, which has been forwarded to the Council Members for their review. Due to the subject matter, a copy was also shared with Mayor Wheeler.

Please note that there is currently no request before the City Council to vote or take action on vaccine mandates or passports.

Thank you for taking the time to submit your comments.

Hello,

We are residents of Kitsap County for over 40 years. We are retired and have the mobility that many current working people do not enjoy.

We had intended to remain here “forever” but, in simple terms, if you enact Covid passports or mandate vaccinations, we will pack up our household (and our incomes) and move to Florida to enjoy the remaining years of our lives. My son, born here and works from home, will follow.

The damage you all can do with the stroke of the pen can have lasting, devastating effects for years...PLEASE think of unintended consequences, and duress of the lives you will disrupt if passports and mandates are enacted.

We are stunned at the blissful ignorance of most citizens regarding Covid vaccinations and the flood of reports coming in from all over the world of death and serious adverse effects after injection regardless of the manufacturer.

The anger is mounting worldwide and the more the politicians push these mandates, the more devastating the pushback will be.

Please act wisely...we are watching with great concern.

This is a great example of why this over reach. All these extra positions are unstaffed (let alone under funded ??) and it just makes a mess out of doing regular business (kids going to school, buying groceries, getting basic life done).

Here's a good example

My daughter at CKHS had a "close contact of Covid " at school.

School calls me says she's spoken w/my daughter ect, ect ect.

I text me daughter she says no one from school talked to her.

I call school back "did you get wrong student ?"

School "oh no sorry I don't know who I've talked to today - it's just been crazy"

Awesome so there's really no order and sense to this and all it does is waste resources!

Seattle school nurses, parents say contact tracers are overwhelmed

Dear elected public servants,

I'm writing to express my concern that you all are considering following the example of nearby counties who have overstepped their legal authority by issuing an illegal vaccine mandate.

We are US citizens and we do not have a Government to control us - we are supposed to control our Government. The over reach by Washington State is gone on for too long. Do not allow the politics of neighboring counties to leak over to Kitsap county. We a different group of people over here. We believe in the constitution! We don't want the government to mandate involuntary medical treatment just to maintain our livelihood.

This whole fiasco of over reach is only going to cause our Government, our state, our county and in general the economy to plummet with debt. This is going to be a long court battle which only wastes the financial resources the Government is already lacking. A court battle that I am certain will be lost.

This requires more Government jobs, more spending and in the end more debt that tax payers will be required to pay. Do not be irresponsible with our already depleted resources by following our neighbors in their un-American, unconstitutionality vaccine mandates.

Sincerely,
Beverly Karpiak

Keith,

I am a Port Orchard, Kitsap county resident. I am a business owner. I am also an international bestselling author and a business consultant. I have lived in Port Orchard for 21 years as an adult and six years as a teenager. I am very concerned about the direction of our Country.

I want to make it abundantly clear that I personally know people, including family, who have had severe adverse effects from the Covid-19 vaccine.

Since getting the vaccine, my sister-in-law now has to wear earmuffs over her ears 24-hours a day because a ringing won't stop. My brother's "brother-in-law" had an adverse reaction to the vaccine, which resulted in his left leg uncontrollably shaking unceasingly. My best friend received the vaccine only to have migraines ever since, which was never the case prior to the vaccine.

As of yesterday morning, my own mother-in-law went to church and told a fellow friend who was a nurse that she wasn't feeling well. The nurse looked at her and could tell something wasn't right. The nurse asked her to smile, and at that point, it became apparent something was wrong. Only half her face smiled.

Hence, my father-in-law rushed my mother-in-law to the ER, and after examination, it was determined that my mother-in-law suddenly has Bell's Palsy. She is a healthy woman, but after getting the vaccine, things have changed. Obviously.

I say all this to plead with YOU to leave the choice of receiving the vaccine to the citizens. There is a lot of energy from the Government convincing and mandating people to get the vaccine, while big tech companies are limiting the flow of information or dissenting voices that are factually based. Think about this... Even if you quote the FDA or the CDC "directly," it could get you de-platformed and ALREADY HAS for many. That alone should cause alarm to anyone.

As of September 3rd, the U.S. Government reports from VAERS that:

- Over 14,500 people have died as a result of the vaccine.
- Hospitalizations have been 58,440.
- Urgent care 77,919.
- Doctors visits 106,184.
- Anaphylaxis 5,783.
- Bell's palsy 7,911.

As of today, that's over 700,000 people who have had adverse effects from the Covid vaccine, specifically. By the way, Harvard conducted a study and found that less than 1% of actual adverse cases are reported to VAERS, which means all these numbers can be multiplied many times over.

Although every life matters, prior to Covid-19, citizens and even the Government accepted health issues that potentially led to death as a part of life. Yet, the current narrative speaks of a pandemic similar to the "Black Plague" that took hundreds of millions of lives. So, looking at science, who's really affected?

Infection survival rate by age:

0-19 - 99.9973%

20-29 - 99.986%

30-39 - 99.969%

40-49 - 99.918%

50-59 - 99.73%

60-69 - 99.41%

70+ 97.6% (non-inst.)

70+ 94.5% (all)

I would argue that COVID-19 is not the pandemic that the narrative is trying to sell, especially when PRE-TREATMENT solutions are available! Prominent doctors from John Hopkins, Harvard, Stanford, even the creator of the mRNA technology, and many others, including vaccine specialists from the FDA and the CDC, have come out to speak strongly against the Covid-19 vaccine.

For this reason, citizens should have the CHOICE whether or not to get the vaccine. Fortunately, as I go into the public most people have respectfully adhered to the call to wear masks. And currently, based on the numbers in the hospitals in Kitsap county, we are not experiencing an uncontrolled crisis with the current protocols in place - regardless of whether people vaccinated or unvaccinated.

From its' origin, what has made the United States unique and thriving was striving for liberty and freedom. Again, I would understand such draconian measures from the Government based on a UNAPPROVED vaccine if the death rate was 5% 10%, (for a poor example :-), but that is NOT the case.

Unfortunately, Covid-19, like the household flu, is not going away – no matter what mandates are put in place. Research shows that it will continue to mutate and infect people due to the "over-use of vaccines" and that Covid-19 contains animal pathogens. What's even more worrisome is that even if someone gets the vaccine, you can still get Covid, and you can spread Covid. Has anyone considered that the vaccine under the "emergency use authorization" may be the cause of mutations and spreads?

There is always a fine balance between freedom and security or freedom and one's health choices. Many people have legitimate and sincere reasons for not getting the vaccines. Their wishes should be respected.

I plead with you that you honor individual rights and freedoms. Many people will be watching how you vote and mandating vaccinations, given that the numbers I have shown do not make sense for those who choose not to receive the vaccine.

Please consider what I have said, and please vote "NO" to mandating vaccines.

Hello,

I am a Port Orchard, Kitsap county resident. I am also a Business Owner. I have lived in Port Orchard for the majority of the last 32 years. I am concerned about the decisions that are being considered on our local and State level.

I say all this to ask you to leave the choice of receiving the vaccine to the citizens. I believe it is NOT the Government's responsibility to mandate medical decisions on behalf of its citizens. Rather...all medical decisions should be a personal decision and choice, determined after counsel from their personal doctor on an individual basis.

There is always a fine balance between freedom and security. In this case the freedom of one's personal health choices. Based on the data below...many people have legitimate and sincere reasons for not getting the vaccines. Their wishes should be respected in terms of their own medical decisions.

In terms of the safety of the Vaccine. There is enough data to show concern about mandating it...

As of today, the U.S. Government reports from VAERS that:

- Over 14,500 people have died as a result of the vaccine.
 - Hospitalizations have been 58,440.
 - Urgent care 77,919.
 - Doctors visits 106,184.
 - Anaphylaxis 5,783.
 - Bell's palsy 7,911.
- (*as of September 3, 2021)

While at the same time the Covid infection survival rate by age is:

0-19 - 99.9973%
20-29 - 99.986%
30-39 - 99.969%
40-49 - 99.918%
50-59 - 99.73%
60-69 - 99.41%
70+ 97.6% (non-inst.)
70+ 94.5% (all)

For these reasons, citizens should have the CHOICE of whether or not to get the vaccine.

Fortunately, currently based on the numbers in the hospitals in Kitsap county, we are not experiencing an uncontrolled crisis with the current protocols in place - regardless of whether the vaccinated or unvaccinated.

Finally, there is a lot of energy focused on mandating people to get the vaccine, while at the same time big tech and social media companies are limiting the flow of information if it is not part of their approved agenda or approved by their unknown fact checkers. When there is no fair decimation of information and opposing viewpoints...that alone should cause alarm to anyone when considering mandating anything. (Whether you agree on a principle or not.)

I plead with you to honor individual rights and freedoms.

Please consider what I have said, and please Vote to take NO action and allow the current situation to play out.

Keith Grellner,

As Kitsap County small business owners, we believe requiring proof of vaccination to enter a place of business is discriminatory, will cause segregation, and goes against the Constitution, our rights and the rights of small businesses all over the county. If you are choosing to follow in the footsteps of our neighbors (Jefferson and Clallam Co.) it shows you are in the pockets of the politicians and don't care about the citizens that voted you in. No one should have to show their papers to enter a business, let alone feel they would be discriminated against for making their own choices about their life.

We do not want to discriminate against our clients. We have worked hard for many years to establish ourselves as a reputable business in Kitsap County. Requiring such a thing will alienate many of our existing clients and ward off potential new clients who cannot/will not get the vaccination. Do not vote in favor of vaccine requirements; they will be crippling to small businesses.

Subject: What percentage of Kitsap County needs to get vaccinated for it to be enough?

CAUTION: This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

What sort of input are local businesses and officials submitting to Kitsap Public Health? Here are my thoughts, let's stand up for the little guy...it's been hard enough to keep open as it is!

Here is the Kitsap Public Health Board Special Meeting Agenda for 9/28, Recommended Actions on Pages 5 & 6:

https://kitsappublichealth.org/about/files/agendas/2021/0928_BOH_Agenda.pdf

Hi Keith-

It's my hope that the Kitsap Public Health Board will follow the science and decide that requiring additional vaccine requirements in Kitsap County is unnecessary.

The top employers in the area already require vaccines

- Department of Defense
- All Contractors who work at/for department of defense
- Olympic College (staff and students)
- Hospitals
- School Districts
- All other state and federal agencies
- All businesses that employ 100+ employees

What percentage of Kitsap County needs to get vaccinated for it to be enough?

Small businesses will be impacted by this the most. Especially restaurants. I don't know if you've tried to eat out lately, but I eat out at local restaurants at least 3 times a week, and I can tell you that restaurants are already struggling to hire enough staff. Adding additional requirements for employment and then requiring those establishments to have to hire more people to track the vaccination status of their employees and patrons is excessive.

We can assume that if the majority of employers already require vaccinations, then the majority of people who are patronizing local businesses are vaccinated.

I think that the Health Board should wait until the State and Federal mandates are in effect and see if further measures are needed.

From what I read, there doesn't seem to be any clear benchmarks locally or nationally regarding vaccines. I hope that our county will decide that additional mandates, additional stress on business owners, additional red tape, etc is superfluous.

The CDC is very clear that vaccinated individuals can still spread and contract COVID. Does requiring vaccines to enter businesses REALLY make people safer? or does it just make them FEEL safer? or is it about MAKING people do something they don't want to do (get vaccinated)?

What is the Health Board's objective? Safety? Feelings? Control?

I urge you to let the mandates/requirements that are already in place to be sufficient. Assume that the federal government chose to make their requirements for businesses over 100+ employees for a reason and don't make more restrictive recommendations.

Thank you,
Beth Michaelson

Thank you for your attention to this situation.

My family and I have owned property in Port Orchard for many years and support many Kitsap businesses through our patronage.

I have worked in the healthcare sector for the majority of that duration.

We DO NOT support the limiting of commerce in Kitsap county (or beyond) thru vaccination passports.

We DO NOT believe that this type of restriction to citizens or visitors is appropriate or allowable under our state or national inalienable constitutional liberties.

Why?

1. Studying Israel's experience with high vaccination rates indicates that the well-intentioned vaccines are not truly effective to prevent catching or spreading the virus.

2. Side effects of these vaccinations are much higher than any other on record. The risks do not exceed the benefit for over 90% of our population.
 3. The survivability percentage does not allow this situation to merit overreach of governmental control that our governor has been pushing.
 4. Universally administering these specific gene therapy/vaccinations without long term studies performed only weakens our immune systems from their effective natural immunity.
 5. Residents who have already survived the Covid illness should absolutely not take this vaccination according to seasoned virologists.
- Any decisions must provide the necessary exceptions for this population as well as medical and religious exemptions. Any discrimination to any of these individuals would absolutely violate our existing laws.
6. Attached is a copy of a lawsuit that has been made by a large group of doctors who after careful study fully question the efficacy of this type of treatment. (Pages 1-10 and Page 41 are especially pertinent)
 7. Our county should not be in any way complicit in any mandatory activity that involves legal retribution for patients from adverse effects.
 8. Forced vaccinations are not allowable under international Nuremburg agreement established after WWII.
 9. Again... Limiting Commerce further will devastate our counties and state far more than a highly survivable virus.
 10. The fear promoted by poor handling of this situation so far nationally and state has caused tremendous educational harm to our kids, spiked depression rates, and gravely polarized our communities and eroding trust in inconsistent governmental guidance which does not bode well for the livelihood of any elected official.

Instead - take action here:

1. There are immune system boosting treatments available that should be prescribed by all physicians, especially vulnerable populations.
2. Prophylactic outpatient treatment of patients will expedite recovery, shorten stays, and relieve pressure on the healthcare system.
3. DO NOT copy the mistakes of Israel's vaccination program.
4. India has had an enormous turnaround of their Delta surge by using this approach using proven medications.
5. Educate people to stay home when not feeling well instead of trusting a mask to protect others from their illness.
6. Support/subsidize trustworthy screening at business entrances instead of requiring passports.
7. Given the intentional origins of this virus we need to quickly restore our country to strength and normalcy. Passports won't do that, only reinforce division and inequitable treatment of citizens.
8. There are 2 phases to this illness which makes it harder to treat (inflammatory and respiratory). Properly sequencing treatment, focusing especially on the 8th day phase change will boost success of critical patients with comorbid conditions.

If something is truly good, it does not have to be forced upon respectable citizens. Please DO NOT require VAX Passports.

Thank you for your service - we're praying for your success in making wise decisions.

Please let me know if I can answer any questions or help clarify my statements in any way.

Most Respectfully,

- Brian Knudsen and Beth Knudsen

Subject: KITSAP PUBLIC HEALTH BOARD SPECIAL MEETING AGENDA, September 28, 2021

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Dear Kitsap Health Board Administrator Keith Grellner,

Dear Health Officer Gib Morrow,

I am a resident of Kitsap County, in Port Orchard. I strongly oppose any vaccine mandates on businesses, organizations, employees or other individuals! People's rights have been violated for more than a year and a half to stop this virus, and it just continues to escalate. This is still a free country and escalating this overreach is not only continuing to destroy businesses, jobs and the economy, it is also violating our rights as free citizens, all supposedly for our protection.

Additionally, according to the Mayo Clinic research, Washington State already has a very high rate of vaccinations, yet according to the reports, COVID is ramping up to the highest numbers yet. The Mayo Clinic research numbers and link are below, but 78% of WA adults 18-64 and 99.9% of 65+ already have had one dose, and 69.8% of adults 18-64 and 95.1% 65+ are fully vaccinated!

The Governor's and President's mandates are already headed to the courts, because they are unconstitutional. I ask you to stop this now!

<https://www.mayoclinic.org/coronavirus-covid-19/vaccine-tracker/>

☒ At least 1 dose ☐ Fully vaccinated

☐ At least 1 dose ☒ Fully vaccinated

Sincerely,

John Morrison
Port Orchard, WA 98367

Hello. Thank you for your email concerning the Kitsap Public Health Board.

Please be aware that the Health Board is not scheduled to take any action at tomorrow’s special meeting. The purpose of the meeting is to provide Health Board members an opportunity to discuss the current effects of the COVID-19 pandemic on Kitsap County’s healthcare and EMS systems.

The meeting is open to the public, but is limited to the first 500 guests in the Zoom format. The meeting will also be broadcast live on BKAT and Facebook. Interested persons may access the meeting and the meeting materials through

the Health Board's meeting materials webpage at: <https://kitsappublichealth.org/about/board-meetings.php> , and click on "Meeting Packet" for "9/28/21 Special Meeting". A video recording of the meeting will also be posted at the above within several days of the conclusion of the meeting.

We will be forwarding all comments received to the Health Board for review at their next regular meeting on October 5.

Best Regards,

Keith Grellner | Administrator | Kitsap Public Health Board Executive Secretary

Dear Mr. Grellner

I oppose the Kitsap County Health Department imposing vaccine mandates on any business in Kitsap County.

Absolutely not! I don't know who you think you people are, but this is unacceptable and will not be tolerated by the people!

You are not elected by the people. You are a group of unelected bureaucrats acting as an official in government. We the people say "NO"! We will not tolerate this overreach!

Stop this ridiculous idea. Stop trying to frighten people. Stop trying to ruin businesses. Stop this idea of imposing a "proof-of-vaccine" requirement to access businesses. This is demonic! We the people are wearying of this!

JUST STOP!

Awesome "wordsmithing" in your response.

My problem is that YOU are even PROPOSING such an ordinance that I or other CITIZENS might not be welcome to purchase groceries because some people are either immune due to previous exposure to or, for whatever reason, decline the COVID Vaccine after such a SHORT period of use by the general public and VERY LITTLE Data of the long term effects of the Vaccine itself!

Personally, I believe it is NOT in the best interest to the public to MANDATE this vaccine when we do NOT have ANY long term data to support the mandate such as was done with other vaccines from the mid 1900's, like Polio, Mumps, Measles, and Chicken Pox, among others, which ALL of them underwent nearly a DECADE of testing PRIOR to mandates, which there were back then!!

Do NOT put long term public health in jeopardy because of some MORON Libs back in Washington, D.C. convincing you that this is a good call!

To ALL that are considering this NONSENSE, you will be opening the proverbial 'Pandora's Box' .

You are dictating law that is ILLEGAL, whether written or NOT!

This constituent will likely make my attempt (should this foolishness be enacted) to enter a store for the sole purpose of engagement, then arrest.

If I'm lucky, there will be a sufficient number of others doing the same thing.

That will result in a Class Action lawsuit against Kitsap County!

I'll be looking forward to a supplement to my retirement after having lived in Kitsap County for the past 31 years in the same house.

I picked Kitsap County BECAUSE of the Conservative nature of this location and now RADICAL LIBS have made it here in Main Stream numbers and that is UNACCEPTABLE!!

DO NOT GO FORWARD with this 'proclamation' that will CAUSE starvation by DECREE !!!!!

Harold Bright

Port Orchard resident since 1989

Dear Public Servant,

1. **Can you please direct me to the Washington State Constitution Article** that **gives you the authority/right to discriminate against another man or woman** (covid shot injected or not, HIV positive or not, gay or not, herpes or not, democrat or not), and **their right to "Life, Liberty and the pursuit of Happiness?"**
2. Can you point me to a contract that each resident of Kitsap County has signed, giving you the right to administrate a vaccine product in their private property (their body) or deny their freedom, movement, access to private businesses, and public facilities owned and financed by "all residents?" If you don't have each individual mans and woman's contractual consent, you would be **trespassing** their God given rights and body.
3. What liability would **you** and your peers accept if any man or woman is harmed by this proposed unconstitutional action? **Unlike federal and state officials, you have no personal liability protection as a representative; you are personally liable for violating the U.S. Constitution, State of Washington Constitution, State Statutes, Local Codes and Federal Criminal Statutes.**

I am making legal notice to you, verifiable to 3rd parties via FOIA requests, so you cannot claim ignorance that any vaccine product verification mandate would likely personally subject you to 42 U.S. Code 1983 liability claims. Also, if you and another vote to mandate a vaccine product or use the color of the law to intimidate/coerce/violate your residents' rights, you will be in violation of 18 U.S. Code 241 and 242 subject to imprisonment. Lastly, you and your peers may be personally liable and tried in an international court for "Violations of Nuremburg Code."

Any vaccine product that you require to be in their body to have access businesses and public spaces, how will you remove it from their body when they leave said areas? **If you can't remove it, what compensation will you provide each man and woman for the taking of their private property (their body) as required by the U.S constitution 5th amendment? Will you personally and Kitsap County put up a \$500 million bond for damages, injuries and punitive damages that will ensure in due time?**

I require you as my representative to deny a vaccine product mandate to have access to private businesses and public spaces within Kitsap County.

42 U.S. Code 1983 Civil action for deprivation of rights
18 U.S. Code § 241. Conspiracy against rights
18 U.S. Code § 242. Deprivation of rights under color of law

18 U.S. Code § 514. Fictitious obligations

18 U.S. Code § 876. Mailing threatening communications

18 U.S. Code § 1001. Statements or Entries Generally

1341 – Fraud and swindles to coerce residents into taking an experimental product that is also an interstate commerce product thus subjecting yourselves and Kistap County to Federal Criminal Statutes

Sincerely,

Philip Bayley

Subject: 9/28/21 meeting re COVID recommendations

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Mr. Grellner;

As an employer (and a resident) in Kitsap County, I am compelled to comment on the five possible recommendations set forth in Dr. Morrow's memorandum to the Kitsap Public Health Board.

I am a firm proponent of Option #1, which is to take no action at this time. I see no benefit, yet much controversy, in requiring local governments and private employers to require vaccinations of their employees as a condition of employment. Rather, we as a community should focus on education and continuation of the preventative measures we are currently taking.

I would caution the KPHB to carefully examine the atrocities that have been committed over the course of human history because we believed it was "for the greater good". This situation is no different. If we take the statistics from the Washington State Patrol (issued last week), roughly 1/3 of their troopers were refusing the vaccination. If roughly 1/3 of all employed persons in Kitsap were terminated from their jobs due to a vaccination policy, I wonder what the action plan is to replace our first responders, our public works employees, our wastewater/fresh water operators, our healthcare workers, or those many people in Kitsap who help to defend our country, to name a few. There is none, and as such I would encourage local government to do the right thing and not create yet another crisis. Let's concentrate on providing positive incentives rather than threatening people with taking away their livelihood or preventing them from accessing important services.

Subject: Special Meeting Agenda

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Hello Mr. Grellner – I hope this is the appropriate forum to voice my opinion on the agenda for the special meeting tomorrow.

I am opposed to requiring private companies to mandate that their employees or patrons must have proof of vaccination to come to work or enter indoor space at a private business. I believe that we are crossing the lines of the protections that were intended by HIPAA. I have no problem with continuing to require masks when entering public spaces, businesses, etc. A mask is something you can remove, its not injected in your body and it doesn't violate any HIPAA privacy laws.

I believe we need to continue the education regarding vaccines and debunk the crazy, literally crazy falsehoods like the one I saw today that said the government is going to put the vaccine in salad dressings or that Bill Gates has a chip in the vaccine so he can track the citizens of the United States. I'm not sure where this idiocracy comes from but unfortunately it's out there.

I personally believe in vaccinations and fortunately we are a small business and our employees are vaccinated by their own choice. I understand that this might be a different problem for larger employers, but I can only voice my opinion from our work situation.

Thank you for your time.

Subject: Kitsap County Vaccine Mandate

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

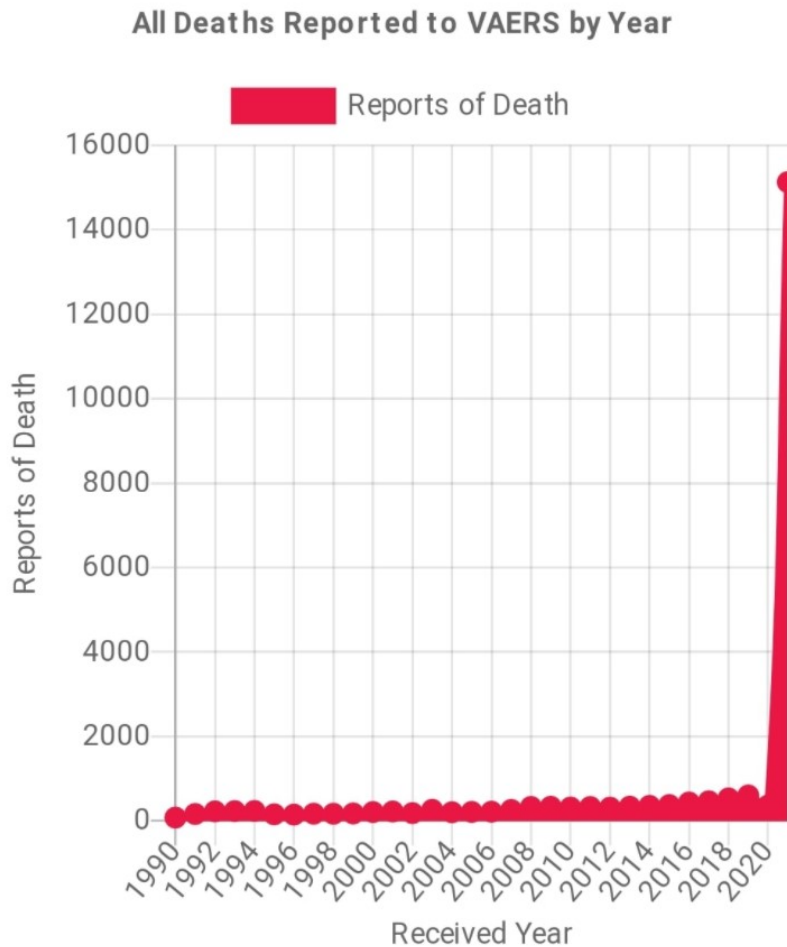

Dear Mr. Grellner,

I am a long-time resident and homeowner in Port Orchard, WA. I am writing to voice my extreme opposition to a county-wide, vaccine mandate. I understand that our county officials would like to keep Kitsap County safe and healthy, however, even if we achieved a 100% vaccination rate, it would still fail to protect us from SARS-COV-2 and its subsequent mutations. Several highly vaccinated countries are a testimony to that fact. Isreal is nearly 100% vaccinated since February of this year, yet look at their current data...

A county-wide policy of barring non-vaccinated individuals from entry to any business is not only unconstitutional, but it defies the Nuremberg Code (due to coercion) and discriminates against individuals who are already injured by vaccines. Members of my family are unfortunately included in that sad number, which I believe is sorely underestimated.

Furthermore, the SARS-COV-2 vaccines currently on the market are BY FAR the riskiest of all vaccines in the history of vaccines. A quick look at the CDC's own VAERS database will show you that - and studies have shown that injuries are woefully under-reported.

Please understand that those who are willing to get these vaccines have already gotten them. The rest of us have very strong reasons to avoid them, including bad previous reactions to vaccines, concern about side effects (including death), religious opposition to the use of aborted fetal cells, opposition to putting other human and even animal DNA fragments into our bloodstream, and the fact that all of the vaccine manufacturers have *complete legal immunity* from lawsuits, should their products harm or kill us.

If the Kitsap County Board of Health decides to pass any kind of vaccination mandate, it will devastate our fragile economy with a spiraling negative impact.

Our Constitution was written to protect us *from* the government. Please do the right thing and help preserve our medical freedom and right to bodily autonomy.

Sincerely,
Sheri Silver

Subject: Question/concern regarding 9/27 Kitsap public health board meeting

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Hi Mr. Grellner,

I have read through the [memo](#) regarding tomorrow's public health board meeting and would like to ask a clarifying question, and — if applicable — share a potential concern with one of the recommended actions.

For context, I am a working professional in Seattle and a resident of Bremerton since 2018. I am actively involved in a nondenominational Christian church in Bremerton, where we seek to provide a community of redemption, truth, and hope to members of the local community in search of such.

Can you clarify whether items 3 & 5 listed under recommended actions (especially item 5 — “Issue a formal Health Board / Health Officer order under RCW 70.05 to require all business open to the public, or indoor venues open to the public, to require proof of vaccination for entry”, and “”) would apply to our local church, meaning that — if approved — we would be asked to require proof of vaccination for entry into our indoor assemblies?

If yes, what is the best way to share our concerns with this consideration? Given the diversity of community members that attend our assemblies, and the fact that we feel a responsibility to minister to each and every one of them, and given our nondiscrimination policies, this particular recommendation would severely undermine our ability to carry out our role in the community.

Of course, we continue to take guidance from the CDC and state and local authorities when it comes to recommendations on masking, distancing, quarantining and sanitizing. Just as we care for the mental and spiritual well-being of those that assemble with us, so we are concerned for their physical health and well-being.

Sincerely,

Daniel

Thank you for your response! I appreciate your communication.
The entire subject makes this a complete waste of our elected officials time.

There are many more pressing issues, top 3..

- 1- 2020 election fraud
- 2- medical fraud
- 3- religious fraud

All of which would be a productive use of of our elected officials time, rather than waste time on unlawful, unconstitutional and criminal topics that are null and void.

Follow The Founding Documents, starting with the Bible.
Fight the good fight, speaking righteously on behalf of God.
This is about the children, our future.

Thank you for your time, effort and for standing up for humanity!

Sincerely,
Reverend M

Hello. Thank you for your email concerning the Kitsap Public Health Board.

Please be aware that the Health Board is not scheduled to take any action at tomorrow's special meeting. The purpose of the meeting is to provide Health Board members an opportunity to discuss the current effects of the COVID-19 pandemic on Kitsap County's healthcare and EMS systems.

The meeting is open to the public, but is limited to the first 500 guests in the Zoom format. The meeting will also be broadcast live on BKAT and Facebook. Interested persons may access the meeting and the meeting materials through the Health Board's meeting materials webpage at:

<https://kitsappublichealth.org/about/board-meetings.php> , and click on “Meeting Packet” for “9/28/21 Special Meeting”. A video recording of the meeting will also be posted at the above within several days of the conclusion of the meeting.

Best Regards,

Keith Grellner | Administrator | Kitsap Public Health Board Executive Secretary

Kitsap Public Health District

345 6th St., Suite 300 | Bremerton, WA 98337

U.S.C. - How To Shackle The Corrupt Government Gang

From Walter Burien

<http://CAFR1.com>

11-1-4

Prepared by Leonard Henderson

<http://familyrightsassociation.com>

Don't complain about Government Corruption, enforce the standing law and put the shackles on the perpetrators one steady and forceful step at a time.

I do note that with an inherently corrupt system, those corrupted inside players or their agents in the courts will not in most cases enforce the law and indict themselves for their own crimes due to "corrupted political pandering and the misbegotten money involved at their disposal," you must "take out" for justice the Wolves in the chicken coop yourself in-order to in-force the law. The following is the Law at your disposal for "your" use and in-force-men-t.

Walter Burien <http://CAFR1.com>

Title 18, U.S.C., Section 241 Conspiracy Against Rights

[U.S. Code](#)

[Title 18](#)

[Section 241](#)

This statute makes it unlawful for two or more persons to conspire to injure, oppress, threaten, or intimidate any person of any state, territory or district in the free exercise or enjoyment of any right or privilege secured to him/her by the Constitution or the laws of the United States, (or because of his/her having exercised the same).

It further makes it unlawful for two or more persons to go in disguise on the highway or on the premises of another with the intent to prevent or hinder his/her free exercise or enjoyment of any rights so secured.

Punishment varies from a fine or imprisonment of up to ten years, or both; and if death results, or if such acts include kidnapping or an attempt to kidnap, aggravated sexual abuse or an attempt to commit aggravated sexual abuse, or an attempt to kill, shall be fined under this title or imprisoned for any term of years, or for life, or may be sentenced to death.

Title 18, U.S.C., Section 242 Deprivation of Rights Under Color of Law

[U.S. Code](#)

[Title 18](#)

[Section 242](#)

This statute makes it a crime for any person acting under color of law, statute, ordinance, regulation, or custom to willfully deprive or cause to be deprived from

any person those rights, privileges, or immunities secured or protected by the Constitution and laws of the U.S.

This law further prohibits a person acting under color of law, statute, ordinance, regulation or custom to willfully subject or cause to be subjected any person to different punishments, pains, or penalties, than those prescribed for punishment of citizens on account of such person being an alien or by reason of his/her color or race.

Acts under "color of any law" include acts not only done by federal, state, or local officials within the bounds or limits of their lawful authority, but also acts done without and beyond the bounds of their lawful authority; provided that, in order for unlawful acts of any official to be done under "color of any law," the unlawful acts must be done while such official is purporting or pretending to act in the performance of his/her official duties. This definition includes, in addition to law enforcement officials, individuals such as Mayors, Council persons, Judges, Nursing Home Proprietors, Security Guards, etc., persons who are bound by laws, statutes ordinances, or customs.

Punishment varies from a fine or imprisonment of up to one year, or both, and if bodily injury results or if such acts include the use, attempted use, or threatened use of a dangerous weapon, explosives, or fire shall be fined or imprisoned up to ten years or both, and if death results, or if such acts include kidnapping or an attempt to kidnap, aggravated sexual abuse or an attempt to commit aggravated sexual abuse, or an attempt to kill, shall be fined under this title, or imprisoned for any term of years or for life, or both, or may be sentenced to death.

Title 18, U.S.C., Section 245 Federally Protected Activities <A [Laws: Cases and Codes](#)

[U.S. Code](#)

[Title 18](#)

[Section 245](#)

1) This statute prohibits willful injury, intimidation, or interference, or attempt to do so, by force or threat of force of any person or class of persons because of their activity as:

a) A voter, or person qualifying to vote...;

b) a participant in any benefit, service, privilege, program, facility, or activity provided or administered by the United States;

c) an applicant for federal employment or an employee by the federal government;

d) a juror or prospective juror in federal court; and e) a participant in any program or activity receiving Federal financial assistance.

2) Prohibits willful injury, intimidation, or interference or attempt to do so, by force or threat of force of any person because of race, color, religion, or national origin and because of his/her activity as:

a) A student or applicant for admission to any public school or public College;

b) a participant in any benefit, service, privilege, program, facility, or activity provided or administered by a state or local government;

c) an applicant for private or state employment, private or state employee; a member or applicant for membership in any labor organization or hiring hall; or an applicant for employment through any employment agency, labor organization or hiring hall;

d) a juror or prospective juror in state court;

e) a traveler or user of any facility of interstate commerce or common carrier; or f) a patron of any public accommodation, including hotels, motels, restaurants, lunchrooms, bars, gas stations, theaters...or any other establishment which serves the public and which is principally engaged in selling food or beverages for consumption on the premises.

3) Prohibits interference by force or threat of force against any person because he/she is or has been, or in order to intimidate such person or any other person or class of persons from participating or affording others the opportunity or protection to so participate, or lawfully aiding or encouraging other persons to participate in any of the benefits or activities listed in items (1) and (2), above without discrimination as to race, color, religion, or national origin.

Punishment varies from a fine or imprisonment of up to one year, or both, and if bodily injury results or if such acts include the use, attempted use, or threatened use of a dangerous weapon, explosives, or fire shall be fined or imprisoned up to ten years or both, and if death results or if such acts include kidnapping or an attempt to kidnap, aggravated sexual abuse or an attempt to commit aggravated sexual abuse, or an attempt to kill, shall be subject to imprisonment for any term of years or for life or may be sentenced to death.

Title 18, U.S.C., Section 1001 Fraud and False Statements

[United States Code](#)

[TITLE 18 - CRIMES AND CRIMINAL PROCEDURE](#)

[PART I - CRIMES](#)

[CHAPTER 47 - FRAUD AND FALSE STATEMENTS](#)

Section 1001. Statements or entries generally (a) Except as otherwise provided in this section, whoever, in any matter within the jurisdiction of the executive, legislative, or judicial branch of the Government of the United States, knowingly and willfully - (1) falsifies, conceals, or covers up by any trick, scheme, or device a material fact; (2) makes any materially false, fictitious, or fraudulent statement or representation; or (3) makes or uses any false writing or document knowing the same to contain any materially false, fictitious, or fraudulent statement or entry; shall be fined under this title or imprisoned not more than 5 years, or both.

18 USC Sec. 1203 TITLE 18 - CRIMES AND CRIMINAL PROCEDURE PART I - CRIMES
CHAPTER 55 - KIDNAPPING

[Laws: Cases and Codes](#)

[U.S. Code](#)

[Title 18](#)

[Section 1203](#)

STATUTE

(a) Except as provided in subsection (b) of this section, whoever, whether inside or outside the United States, seizes or detains and threatens to kill, to injure, or to continue to detain another person in order to compel a third person or a governmental organization to do or abstain from doing any act as an explicit or implicit condition for the release of the person detained, or attempts or conspires to do so, shall be punished by imprisonment for any term of years or for life and, if the death of any person results, shall be punished by death or life imprisonment.

[United States Code](#)

[TITLE 18 - CRIMES AND CRIMINAL PROCEDURE](#)

[PART I - CRIMES](#)

[CHAPTER 109 - SEARCHES AND SEIZURES](#)

U.S. Code as of: 01/02/01 Section 2234. Authority exceeded in executing warrant Whoever, in executing a search warrant, willfully exceeds his authority or exercises it with unnecessary severity, shall be fined under this title or imprisoned not more than one year. U.S. Code as of: 01/02/01 Section 2235. Search warrant procured maliciously Whoever maliciously and without probable cause procures a search warrant to be issued and executed, shall be fined under this title or imprisoned not more than one year.

Section 2236. Searches without warrant Whoever, being an officer, agent, or employee of the United States or any department or agency thereof, engaged in the enforcement of any law of the United States, searches any private dwelling used and occupied as such dwelling without a warrant directing such search, or maliciously and without reasonable cause searches any other building or property without a search warrant, shall be fined for a first offense not more than \$1,000; and, for a subsequent offense, shall be fined under this title or imprisoned not more than one year, or both. This section shall not apply to any person - (a) serving a warrant of arrest; or (b) arresting or attempting to arrest a person committing or attempting to commit an offense in his presence, or who has committed or is suspected on reasonable grounds of having committed a felony; or (c) making a search at the request or invitation or with the consent of the occupant of the premises.

[More on Section 2236](#)

[Laws: Cases and Codes |](#)

[U.S. Code](#)

[Title 42](#)

[Section 1983](#)

Sec. 1983. - Civil action for deprivation of rights

Every person who, under color of any statute, ordinance, regulation, custom, or usage, of any State or Territory or the District of Columbia, subjects, or causes to be subjected, any citizen of the United States or other person within the jurisdiction thereof to the deprivation of any rights, privileges, or immunities secured by the Constitution and laws, shall be liable to the party injured in an action at law, suit in equity, or other proper proceeding for redress, except that in any action brought against a judicial officer for an act or omission taken in such officer's judicial capacity, injunctive relief shall not be granted unless a declaratory decree was violated or declaratory relief was unavailable. For the purposes of this section, any Act of Congress applicable exclusively to the District of Columbia shall be considered to be a statute of the District of Columbia Title 42, U.S.C., Section 14141

Pattern and Practice

[Laws: Cases and Codes](#)

[U.S. Code](#)

[Title 42](#)

[Section 14141](#)

This civil statute was a provision within the Crime Control Act of 1994 and makes it unlawful for any governmental authority, or agent thereof, or any person acting on behalf of a governmental authority, to engage in a pattern or practice of conduct by law enforcement officers or by officials or employees of any governmental agency with responsibility for the administration of juvenile justice or the

incarceration of juveniles that deprives persons of rights, privileges, or immunities secured or protected by the Constitution or laws of the United States.

Whenever the Attorney General has reasonable cause to believe that a violation has occurred, the Attorney General, for or in the name of the United States, may in a civil action obtain appropriate equitable and declaratory relief to eliminate the pattern or practice.

Types of misconduct covered include, among other things:

1. Excessive Force 2. Discriminatory Harassment 3. False Arrest 4. Coercive Sexual Conduct 5. Unlawful Stops, Searches, or Arrests

Subject: Kitsap Health Board Special Meeting

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Hello,

I am emailing in regards to the Kitsap Health Board Special Meeting to take place on 28 September. I feel that items of this magnitude should not be taken lightly. Decisions should be made based on input from a broad range of resources, including elected officials constituents in their capacity as public servants. These events should be open and allow interaction. Even though the letter states that public input would not be taken, I would like to at least respond in some fashion.

I personally am vaccinated. It was my choice. I do not feel that vaccinations should be mandated. Proper, truthful and traceable education, based on scientific fact is a better deterrent than mandates. We are more and more having our freedoms of choice mandated away. Freedoms and ideals that I served proudly for twenty four years to uphold in the U.S. Army. Having lived for ten years in a post-Soviet Union country, I and my family have witnessed firsthand what overly controlling a nation ultimately accomplishes. In the end, total collapse.

I believe that I should not be forced to show my personal health information to someone in order to be allowed access. If it is what becomes required, I believe that many people will simply choose to not visit these establishments, and utilize sources such as on-line services, that do not provide local business revenue. The ripple effect of loss of revenue to local businesses, especially small ones, is extremely large and far reaching. It impacts personal incomes, tax base, community support and more.

As a business owner, mandating these items will add to the already immense financial distress of decreased revenues and its impact, as well as the costs and effort associated with enforcing the mandates. I feel that the ultimate effect will be more harmful than good.

Thank you for your service to the community and consideration.

Mark

Good morning,

I am writing today regarding the potential enactment of various COVID-19 mandates in Kitsap County. I am a new Kitsap County citizen as of April 2021. We moved our family here from Edmonds, WA to be close to family and because we love the friendly people, pace, and beauty of Kitsap County. And to escape some of the politics and urban issues that come with living close to Seattle. We have embraced living here, and have joined our kids' elementary school PTA, support local athletics and businesses, and overall just love the experience.

I recently heard there will be a Health Board meeting to discuss implementing COVID-19 mandates to enter businesses, gyms, etc. here in the county and was disappointed to know this is even being deliberated. I believe the political hysteria is doing nothing but damaging our citizens and our culture. Many less invasive public safety measures are bringing down

the COVID numbers and many Kitsap County residents are fully vaccinated without the need for this "stick" approach. Also, fully vaccinated individuals and businesses should have nothing to fear from unvaccinated individuals. In addition to the vaccination rate no one is accounting for the natural immunity a large portion of our citizens have. Businesses, including critical infrastructure like healthcare and public safety, are already struggling to find qualified workers. These mandates cause reasonable citizens like myself to pause and wonder what the real reasoning is behind these mandates. It does not make scientific sense, it only demonstrates that those in power want to have more control over their citizens. Not to mention these policies are extremely inequitable to those from disadvantaged communities. And where will it stop? Currently, there is one FDA approved vaccine for adults and all others remain under an EUA. Will we start mandating emergency authorized vaccines for our children when those receive an EUA? When did looking at the risk/benefit analysis of medicine and policy become an afterthought?

I plead with you to take a more reasonable approach. Your citizens care about each other, they care about the economy and each other's health. That can be seen by our current COVID numbers, that people are making good common sense decisions to keep each other safe. We can all understand that living with COVID is something we have to do, but enacting these mandates damages businesses, citizens, and the way of life we love here in your county. Let's avoid the need for protests and marches in the streets against mandates seen in big cities across the country and world. Let's be reasonably minded and scientific about these decisions. There is no science to prove that segregating vaccinated and unvaccinated folks benefits your citizens, but it is being shown to tear regions apart causing unrest and pitting people against each other.

Thank you for your time and consideration in stepping back to just look at the situation reasonably.

A concerned voter.

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Good Morning,

I am writing today to express my opposition to allowing the Kitsap County Health Department to impose vaccine mandates and/or vaccine passports on any business in Kitsap County. This will greatly affect and limit the business', and places of interest those 12 and under and the unvaccinated will be able to frequent and/or visit. This will greatly dampen the community unity and will prevent the unvaccinated in meeting needs for their family. These kinds of restrictions will take away the rights of many individuals and cause a great divide among the community of any County in which it is implemented.

Dear Commissioner Gelder,

I'm writing to state my concern for where we are heading with proof of vaccination mandates. Even though I am fully immunized against covid, I adamantly oppose allowing the Kitsap County Health Department to impose a "proof of vaccine" requirement to access any business in Kitsap County. This isn't nazi Germany

where we need to show papers. This is a free country and our private medical records are our private business.

Shame on anyone for even considering this draconian idea.

Sincerely,

Colin Woehrle

Dear commissioner,

I have recently read your meeting agenda for the special session to be held on Tuesday 9/28/21. As we all faces struggles and trials in the Pandemic, I am concerned about the options presented in the discussion notes. In particular the idea to require proof of vaccination for entering an indoor space infringes on our rights to choose our own medical treatment. I believe that vaccinations are a very important part of the fight against COVID. Many individuals will have their lives saved because of taking the vaccine. I also understand the stresses put on our medical facilities. In your

memo it was stated that, "Vaccinations are the best tool --- really the only tool if we want to keep the economy and schools open" shows a predisposition to a certain method of dealing with this pandemic. We are nearly 18 months into the pandemic. Treatment methods that are potentially effective such as Ivermectin can't be prescribed despite the benefits of using them. Reallocation of space within the hospital, different disinfectant methods, additional staffing could all be accomplished. Governor Inslee closed the state so that we could "flatten the curve" and allow our medical system to prepare for the increasing rates of COVID-19. As the health department, those preparations should have been accomplished this last year. Stating vaccinations are the only way, causes great concern I urge you to maintain our ability to care for those people who are unfortunate enough to get sick. I urge you to continue to allow individuals to choose what they put in their body and what medical procedures they undergo.

In addition, the consequences of not allowing people into indoor spaces without a vaccine brings forth other issues such as:

- 1) How do unvaccinated get dental care
- 2) High schoolers can't go to school if they choose not to be vaccinated
- 3) Unvaccinated can't get medical care without vaccination
- 4) How do unvaccinated get food and home goods

These things are simply unacceptable. In addition there is no room for moral or religious objections to the vaccine development methods. There are also those with natural immunity.

This is an overreach by the government and should not be allowed. Please find other ways to care for our sick, educate and encourage vaccination for the complacent or ignorant, but don't require it.

Thanks

Mark Paulus

Subject: Vax card requirements

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

I am wholly against proof of vaccination cards to enter facilities in Kitsap County. It is **divisive, unscientific, highly discriminatory**, 3 adjectives that perfectly define all aspects of King County, not Kitsap County.

Divisive: A vax card mandate would create 2 tiers of our local society. To do so further divides our country, and **this County**. Local level Boards and governments have a responsibility to promote community harmony, not divisive mandates separating individuals that are **experimental**. We are not guinea pigs, we are human beings. All of this for – what? The [most highly vaccinated countries](#) have recently experienced explosions in Covid cases. UK, Israel, etc.

Unscientific: A mandate such as this does not take in to account **natural immunity**, which gives better protection against Covid than a vaccine. See Israeli study (all we have) [here](#). Also, it is proven that persons vaxxed are quite capable of acquiring and spreading Covid. Virus is going to virus.

Discriminatory: The least vaccinated among the population are people of color, of which there are many thousands in Kitsap County. Vaccines are still a choice, and to void the choices of PoC (as well as others) is highly discriminatory. I would be shocked that Kitsap County would be a party to such a mandate. We are NOT King County – not yet, anyway.

The survival rate, overall, for Covid 19 is on average [98.2%](#). Let me emphasize this takes in to account all of the elderly and those with co-morbidities, who account for the vast majority of fatalities. This reality cannot be ignored. Rearranging our society, and in particular this county, for a fatality rate slightly higher than the seasonal flu, and where vax rates and high, flies in the face of common sense.

Please, Board, utilize your good common sense and reject proof of vaccination cards.

Subject: Vax Passports for Kitsap County

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

To whom it may concern,

I wish to strongly voice my objection to vaccine passports for Kitsap County restaurants for the following reasons:

1. Violation of citizens' rights to medical privacy
2. The negative economic impact to our local businesses just recovering from the lockdowns
3. Enforcement of the "passports" would place additional burdens on restaurant and bar owners.

If more people are, in fact getting vaccinated (even if not at the pace desired) and the mask mandates are back, shouldn't the problem be getting better? The fact this decision is coming up with no/minimal public response is shady.

Respectfully,

Kenneth Luzbetak

Subject: Statement For Kitsap Public Health Board Special Meeting

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Good morning Mr. Grellner and Commissioners,

Enclosed is my statement for the Kitsap Public Health Board Special Meeting. As a member of Kitsap County, I would like my thoughts and observations taken into account prior to your discussions at the meeting.

If the purpose of the meeting is truly about the health and safety of Kitsap County residents then this board meeting should not derail into a debate over vaccinated versus unvaccinated populations. Please allow me to explain.

The federal government has deemed that an “unvaccinated” person is someone that is not two or more weeks post their second COVID vaccine. This means that someone who had their second shot yesterday is still considered “unvaccinated” ([NIH page 5](#)). One could also assume that moving forward the term will include someone that hasn’t received a series of booster shots. It also doesn’t include those that have natural immunity from previously contracting COVID. An immunity that has been proven to be stronger and more effective than the vaccine through a year or more post-infection ([study published in the Journal of Internal Medicine](#)).

The vaccine is available to all who want it and are safely able to do so. The majority of the population has received it and we’ve reached “herd immunity” status though COVID lives on. The vaccine has been shown to reduce the severity of symptoms, however it does not prevent someone from contracting or spreading COVID. This is especially true with the Delta variant. This means that vaccinated or not every individual who hasn’t already contracted COVID can not only catch it but spread the COVID infection to others. Those that are vaccinated have milder symptoms and, in my personal opinion, are more likely to spread COVID because they have milder or no symptoms and don’t realize they actually have COVID and can transmit it. My opinion stems from my personal experience of both catching COVID from a vaccinated person who thought that they couldn’t catch nor transmit COVID so they went about their day not taking any precautions and not staying home when they were ill. It also stems from my observations from other coworkers and clients.

If everyone, vaccinated or not, can catch and spread the virus then the risk is not who will spread it but rather who will catch it and become ill. It’s our individual right to determine what risks we are willing to take with our own health. Prior to vaccines, there was roughly a 1% death rate due to COVID which is only slightly higher than the flu on an average year. Keep in mind the risk is significantly less for the young and significantly higher for the elderly and those with comorbidities. The overall average of all ages is 1% though. It’s a little too early to say but if the vaccines truly do what they say then that number should be on the decline.

During all of this, our small businesses have been disproportionately impacted by COVID shut-downs. Small businesses are the backbone of the US and especially Kitsap County. Forcing small businesses to verify the vaccination status of all employees and patrons puts an unnecessary burden on them. Even more so as many are short-staffed due to the labor shortage. Discriminating against small businesses by making them subject to these additional rules and regulations only

makes it harder for them to survive and thrive. If we're interested in helping those businesses and thereby citizens of Kitsap County not only survive but thrive then we need to shift our focus to finding ways to help them stay open, have more patrons, and find top-level talent that doesn't break the bank. Let's come together to support small businesses and end discrimination against them when big corporations are allowed to go on with limited restrictions and do what they want.

If the goal of this meeting is truly to keep our fellow Kitsap County citizens healthy and safe then let's work on proactive measures to help them be their healthiest selves. Let's work together to find easier and less expensive ways for them to exercise, eat healthy foods, and have easy access to their care providers. Let's encourage care providers to treat patients proactively to help them be their healthiest selves and to prevent them from getting ill. Then, if they do catch COVID or something else, let's give them the support and protection to treat patients early before they get so ill that they need to be hospitalized.

Again, as a Kitsap County resident, I ask you to:

- Not discriminate against the already disadvantaged small businesses.
- Support ways to increase citizen access to health and wellness activities and services.
- Advocate for medical providers to be able to treat patients using FDA-approved medications and services without fear of repercussion.

Thank you again for the opportunity to voice my concerns and suggestions.

Kind regards,
Heather Torres

Subject: Covid

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

I hope this letter of my concerns finds you. I have lived in Kitsap County most of my life, I have raised my child, and worked for the same restaurant for 21 years. Never did I imagine we as a society would be living in so much created fear. Hiding behind masks everywhere we go, afraid to speak to another human for the fear we might kill them with this deadly virus. Seeing the Main stream Media shove covid down the American peoples throats day in and day out. Creating panic at the bottom and HUGE profits at the top. So much misinformation being spewed everywhere. We can not deny people are dying, however we can deny they are solely dying of covid. They are dying WITH covid. There is a HUGE difference. Being in the Health field I don't have to tell you that 6 out of 10 adults in the US have a chronic disease, I'm sure you know what that entails, but I'll add a few examples just for fun. (Heart disease, cancer, chronic lung disease, diabetes, OBESITY 46% of Americans are obese, oral health, asthma, Alzheimers) I think you get it. So 4 out of 10 of Americans have 2 or MORE of these chronic Diseases. Im sure I don't need to tell you how unhealthy America is, and while yes covid did us no favors, It certainly wasn't what did us in. I'd now like to provide you with a few stats, just very basic math, remember I'm just a waitress.

Kitsap County deaths WITH covid / population and your chances of dying
172 covid deaths were reported, we have 272,787 (2020) chances of death are around
0.00063052858

Washington State reported 7,537 covid deaths, population 7,705,281(2020) chances of death
0.0009781603

The entire US reported 688,032 covid deaths, population 331,449,281 (2020) chances of death
0.00207582891

Now I don't know about you, but personally these numbers absolutely do not constitute what our Community and small businesses have been put through. Most certainly do NOT constitute mandatory experimental vaccines, in my opinion. Which brings me to my next point, If you do a little looking on your health department website you will find a lovely graph of hospitalizations

and numbers above the months informing the public of the deaths in said months. I'd like you to take another look at August & September of 2020 and compare it to August & September 2021, now if my memory serves me correct wasn't this vaccine supposed to stop deaths and hospitalizations, that's what was being sold. Now before you try to respond on the other lovely graph that shows hospitalization for vaccinated and unvaccinated I'd also like the comment on the * section next to the vaccinated and unvaccinated graph. It notes fully vaccinated= 14 days after last dose
unvaccinated= no history vaccination at time of specimen collection OR <14 days after initial dose, in this analysis people who are partially vaccinated are omitted..... Now to me that seems a little like withholding the entire truth. So if a person chooses to receive Pfizer or Moderna they technically have 5 WEEKS from their first shot until they are FULLY vaccinated.... Seems to me quite a bit can happen to a person's health in 5 weeks. So I'm not fully convinced that your fun graph of unvaccinated hospitalizations is very truthful or accurate. Yet again that's what's being sold.

My next point and I'll make it quick, I know you are busy.

I'd like to point out that never in my history 21 years of experience in the restaurant business have I EVER asked my tables to see their vaccination history, or asked them if they have any transmissible viruses they would like to share with me, not actually share with me, but that they have them. If you need some examples I have a few. (Tuberculosis, highly transmissible, in fact killed 10 million people in 2019 in the US, Norovirus, Influenza in 2019 490,000 were hospitalized even with a vaccine, Hand foot & Mouth, Pertussis, Hep B&C, HIV, mersa)

I could keep going, but I have a job to get to and soon I may not have that job, because people are not going to do well with " showing their papers " to dine in a restaurant. If any SMALL business survived the unnecessary shut down, they most likely will not survive this passport nonsense. I'm sure this email will fall on deaf ears, but if there is any hope left, I hope Kitsap County can agree that this is AMERICA and we have a right to our freedoms, and spare me the "you don't have the right or freedom to kill people " I say scroll back to the top of my email and reread those killer death stats.....

**** Additional comments AFTER watching the zoom meeting on Tuesday.**

It was mentioned in the zoom that 25% of your new hospitalizations are 40 and younger, however you didn't specify what they are being hospitalized for, if it's covid what other health issues do they have, I'll say it again 6 in 10 adults have a chronic disease, 4 in 10 have TWO or MORE..... Do they smoke, vape, drink, are on any medications either prescription or non prescription, and finally are they obese?

Also we were given fun facts of PROJECTED stats of reductions in King County with their not yet implemented mandate to " show Papers " to get into Bars, Gyms, and Restaurants. I'll refresh your memory if you have forgotten. It is PROJECTED that they will see a prevention of these numbers in the next 6 months.

*18-76k cases.

*420-1,760 hospitalizations.

63-260 deaths.

I'd like add that incase you were not aware, but people who are FULLY vaccinated can still spread and transmit covid, just because you say vaccinated aren't going to the hospital doesn't negate the fact they can still get and transmit covid.....So I'm not sure how these PROJECTED numbers will actually decrease in any of those scenarios.

My concerns about all of those PROJECTIONS is that we don't have actual facts to support it, Nor do we know any of the MASSIVE implications that businesses who are already struggling will face. Why would you and the community in Kitsap want to make such a irrational decision regarding such an important issue, with out any of the facts, remember King County doesn't actually start their mandate until October 25th.....

Last thing it was stated in the zoom that in October of 2020 Kitsap County performed one 30,000 Flu tests, now I have a few insiders in the local Medical field and I can tell you that was a bold lie.... There has been very minimal flu testing going on in any of the medical facilities in Kitsap or anywhere in the state since the beginning of covid. I looked up a few stats on flu from the Washington State Department of Health recently and I found a few things that were very concerning, and as someone like your self who practices medicine should concern you to. Where has the flu gone? Well one could speculate that if you stop testing for something it goes away... Maybe we should stop testing for covid and see how many cases we won't have.....

FLU SEASON DEATHS by year.

2012-2013 = 54

2013-2014= 80

2014-2015= 156

2015-2016= 67

2016-2017= 278

2017-2018= 296

2018-2019= 245

2019-2020-=145

Okay so here's where it gets fun. Per the DEPARTMENT OF HEALTH OF WASHINGTON, the latest week update is week 35 which is September 5th - September 11th.

ZERO lab confirmed influenza deaths have been REPORTED for the 2020-2021 Flu season.....

Also just for fun ZERO influenza like outbreaks have been Reported in 2020-2021 season to date.....

I'd also like to add did we ever in the past flu season tell some to cover their face with a mask? If so I don't remember. Nor do I remember going to the ER (having a son who played multiple sports we went a few times) nurses EVER wearing a mask or the doctors for that matter..... Kinda makes you think, well It does me anyway....

You also would have to agree as someone in the medical field who knows that something so simple as practicing good hygiene is one of the best ways to stop the spread of germs, bacteria and viruses, so is eating healthy organic non GMO food, getting adequate exercise, sleep and

fresh air oh and human interaction as well. Unfortunately many of those things I mentioned were taken from too many people when the lockdowns began, and have had significant negative impacts. Maybe in a few years when the covid dust settles we will see a fun little graph of how many more suicides, hard drug users, domestic violence, alcoholism, depression, and mental health issues those lockdowns actually did to humans.....

I'm going to email you this letter EVERY single day until the next meeting. If you'd like to respond please feel free. I'd Love to hear your thoughts.

Thank you for your time.
Have the day you deserve....

Heidi

Hello,

I am writing to extend my wish that Kitsap County not demand any type of health documentation to enter a business. The decision to refuse service comes from a business, and should be allowed to reside with the economy-builders. Additionally, this separates and divides the citizens of Kitsap County in multiple ways, for example many vaccinated individuals are less represented in minorities. The state of our economy and socioeconomic stability cannot afford to be held down, so I beseech you to instead continue to unite those who look to you for leadership.

Kitsap Public Health Board
Attention: Executive Secretary

September 30, 2021

Subject: No to required COVID vaccination and proof of vaccination

Dear Board Kitsap County Public Health Board:

I attended the September 28, 2021, Kitsap Public Health Board special meeting and want to convey my position of No to required COVID vaccination and proof of vaccination as you prepare for your October 5th meeting. I also want to comment on several things I heard during the meeting. First, Dr. Weiss presented one of the most important pieces of data; he said COVID cases are going down and that COVID patients in St. Michael Center this week are 42 – down from 65 the week before. Second, Dr. Morrow said two things in support of his position in support of government vaccine mandates that are reckless. He said the nation has compelled vaccination for a long time and referenced General Washington compelling his troops to be inoculated. This is a weak argument because that happened in 1777, ten years before we were a Constitutional republic, and what the nation can compel its men and women in uniform to do is strikingly different then what it can mandate its citizenry to do. Dr. Morrow lodged another statement saying the science speaks definitively about the efficacy of vaccines. His implication is that ergo, we should mandate their use. This too is a fallacy. Just because A may be true, that doesn't mean B ought to happen, or forego legal processes. Third, one board member (her name now escapes me) said surrounding counties are mandating vaccine proof thus Kitsap ought to as well and lead by example. This idea of following the rest or that everybody thinks a certain way and so we should too is poor reasoning as well. Broad acceptance of something doesn't mean it's justified or right; there was once broad acceptance of slavery. Lastly, there exists a compelling argument that Governor Inslee's mandate is not legal. Only the legislature can compel vaccinations under Washington Law. Proponents of mandates rely on Jacobson v. Massachusetts as proof positive that governments can mandate vaccines. It is accepted that state statutes can mandate vaccines; however, in Jacobson, the court held said there are limits to the state's police power and more importantly clearly said it is the legislature's authority to enact such statutes, this power does not belong to the executive.

In conclusion, there were several logical fallacies used in the meeting by those who appear to support requiring vaccine proof at businesses, and there is strong belief the executive branch has overstepped its authority and breached the separation of powers doctrine. A reasonable approach for Kitsap County is encouragement vs coercion.

Subject: Vote NO to Vaccine Passport!

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Hello!

It has come to my attention that the board will be voting on the implementation of so-called “vaccine passports” and the requirement for businesses to require proof of vaccination in Kitsap County.

I am completely and unequivocally against this notion! It is illegal for unlicensed, non-medical personnel to take medical history, which is what will be happening in our businesses if you require proof of a medication. Both HIPAA and ADA protect us from having to do that. Acting against these laws will not only put undue stress on small businesses, but potentially open you up for lawsuits by acting outside your licenses. It may crush our community and marginalize groups of people and further divide our community in a time where we need healing and restoration.

Additionally, this requirement is akin to requiring vaccination which is a private medical procedure where it's necessity makes no sense since cases in our county and state are currently “plummeting”. (Source: <https://www.kitsapsun.com/story/news/2021/09/27/gda-covid-19-state-2021-09-27-wa-pbks/118953386/>).

Please VOTE NO on vaccine passports and let our community start to heal!

Kitsap County's COVID cases fall 24.8%; Washington cases plummet 14.2%

Subject: Loss of Business

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Dear Mr. Grellner,

While you are looking at the vaccine mandate for our county, I want to share with you how this is affecting small businesses in real time.

My mother-in-law and brother-in-law went to Port Townsend this morning. They had business to do but then planned on having breakfast at the little cafe they like.

Because this was in Pierce county, they were mandated to show their vaccination cards before getting to be seated. Both of them are fully vaccinated. My MIL had her card but my BIL didn't have his with him.

So, that cafe lost business this morning. I am sure my family wasn't the only ones they have turned away this week.

Please take into consideration the importance of privately owned, small businesses whose work is essential to their livelihood.

Thank you,

Karen Camp

Subject: Kitsap County Health District Meeting on 9/29/21 regarding Covid-19 Vax Mandates and Passports

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

September 29, 2021

Attention: Kitsap Public Health Board District;

This E-mail is concerning the matter of your Health Board meeting yesterday and issues concerning the impact of Covid-19 on the County, and future steps to partake in the future to deal with this issue.

Presently I live in Jefferson County, however I lived in Poulsbo for 7 years, from 2004-2011, and presently still shop and do business in Poulsbo and Kitsap County. I love Poulsbo and some of the other places in Kitsap County. I took the Bainbridge Ferry to and from work at Swedish Medical Center in Seattle for the 15.5 years working as a NICU nurse there.

Before retiring, I spent 34 years as an acute care PEDIATRICS/NICU RN in California and Washington.

During my years of hospital nursing I became aware of the increasing influence of the Pharmaceutical Industry and wealthy donors on the policies of organizations such as the FDA, CDC, and WHO, though it was never to the degree that has been exhibited during this Covid-19 epidemic.

The degree of politics surrounding this issue by politicians, the drug companies, and the media, has resulted in information suppression and difficulty in having civil conversations among people on both sides on this issue.

The CDC, WHO, and Health Departments are not infallible, and themselves have in the past presented mixed information on covid treatments, at times contradicting earlier statements. (eg. CDC and masking issues)

I appreciate the cautiousness that your board is exhibiting in coming to a decision regarding proof of vaccinations(vax passes) and vaccine mandates, something that DR.Berry , who happens to be Public Health Director of BOTH Jefferson and Clallam County appeared to not exercise, proclaiming her edicts publicly before even the Clallam County Health Board members could officially vote on them. It has raised much ire in BOTH counties, and yes increased resentment towards her, and the health boards.

In Jefferson County I talked to and read about more than one restaurant regarding how they were going to handle the situation- they were feeling broadsided by being hit by it on Labor Day weekend. They also voiced how much they had already been negatively impacted by the Covid epidemic, and worried about both the negative impact of the vax pass and mandatory vaccines on their business, and possible fines from the Health Department if they did not enforce the edicts.

Therefore I encourage your Health Board to continue to hold off on this decision, research more scientific data from other researchers such as the pioneer of mRNA technology Dr. Robert Malone, and allow more public input before coming to a decision that may be illegal due to being unconstitutional, and making medical decisions and policies that are inconsistent with the latest and evolving scientific findings on Covid -19 and vaccine efficacy.

The present proposed mandates violates sections 3&4 of the 14th Amendment to the US Constitution that protects a person from unreasonable search and seizures, and also violates the un-enumerated rights of the 9th amendment to the US Constitution that the US Supreme Court found includes the right to keep personal matters private, and the right to make personal decisions regarding one's health care and body.

In addition to the violations of these mandates in regards to the US Constitution, forcing someone to take an experimental drug is a violation of the Nuremberg Code-and this vaccine is STILL experimental, in spite of Pfizer's attempted sleight of hand maneuvers placing two different named drugs into the equation.

The final point is that recent findings bring into question the long term ability of these vaccines to maintain immunity against variants, and Israel and other places have found that it appears that natural immunity is better at providing long term immunity than vaccinating repeatedly for new variants. If this is the case then I feel keeping the vaccine voluntary, in addition to testing folks who claim to have had covid- 19 with serum T –Cell counts to verify immunity, and if their T-Cell counts are high enough, recognizing them having immunity to covid-19.

At present VAERS has reported well over 15,000 deaths attributed to the Covid-19 Vaccines, but each time this system has been audited it has been underutilized, which suggests the above number is in fact greater than the above number.

In the September 27th edition of the Kitsap Sun the newspaper ran an article stating that Kitsap County had reported 576 cases and 18 deaths in this latest week, and the prior week it had reported 766 cases and 13 deaths, resulting in a 24.8% drop in cases for Kitsap County and also a 14.2% drop in cases within Washington State.

If 66% of your county's population is already vaccinated and cases are already decreasing in the county and state, what is the scientific basis behind imposing more draconian measures?

I also recommend that the County look at outpatient treatments for Covid, and if as non-existent as most US hospitals, consider looking into acquiring permission to apply for a controlled study of Ivermectin as a treatment, which was recommended in the past by NIH and Dr. Robert Malone and others. This would be proactive, and show Kitsap County exhibiting leadership in dealing with this epidemic instead of reactively merely pushing more vaccines.

Thank you for your time and reading this letter.

Sincerely,

Janet Baker

Subject: Health Mandates for Kitsap County

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Mr. Grellner, if the COVID-19 vaccines prevented infection and transmission of the COVID-19 virus and succeeding variants, I would be on board with the constitutionally overreaching and liberty impairing mandates in order to pressure and persuade individuals to get them. But, the vaccines do not prevent the infection and transmission of the virus. They only reduce the severity of the infection of elderly and compromised individuals. Also, the Control groups were compromised during the trials of these vaccines rendering an honest evaluation of consequential side effects impossible. There are other well studied prevention and treatment protocols that perform the same without the gruesome side effects that have been realized by some of the vaccinated. Therefore, I strongly urge the Board not to implement any such Mandate!

Instead I would implore the citizenry to exercise the protocols originally brought out. And they are: Wear masks in confined and poorly ventilated indoor spaces; Keep a six foot distance from the public who are not in your own family; and to wash one's hands after returning from home: and most importantly, allow the citizenry the opportunity to utilize the FRONT LINE COVID-19 CRITICAL CARE ALLIANCE's protocol for prevention and treatment. Other nations are benefiting from their and similar protocols.

It's time to stand for medical integrity and not be coerced by unscrupulous influences.

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Good afternoon Mayor Wheeler,

I have a few things to talk about today.

First, many people are aware, as you should be also, that the vaccinated are not protected from this virus nor are they incapable of carrying and spreading the virus. Why are they not losing their jobs? This is discrimination.

Also, the CDC has the information clearly on their website that you're counted as unvaccinated until after two weeks after your second shot. It is clear that people who have had at least one shot are in the hospital being counted as unvaccinated. While more people get the shot, the unvaxxed are somehow being blamed for rises in hospitalizations.

So, I am requesting an audit of every hospital admission and/or death as to what their vaccination status was when they entered the hospital. The people need the facts. Not hearsay. I would like to think as our community representatives, you're being truthful and accountable for the information being put forth.

We all know that natural immunity doesn't make anyone any money. Why aren't we having this conversation? Why aren't our elected officials (looking directly at you) being more vocal about real science and doing more to promote the science of naturally acquired antibodies?

A person does not need a medical degree to understand this, so I'd advise you to not belittle your constituents who have this knowledge or are fully capable of understanding this kind of information. There's been a lot of condescending comments made by elected officials toward the people that they represent. I would suggest having real conversations with your constituents. Hence, it's time to bring back public meetings and no more Zoom meetings with no real-time public comments.

We are not just “crazy” people who you can talk down to and treat like second rate citizens. You can mandate masks all you want but requiring papers to prove you’re a healthy individual is the most asinine and over reaching decision this entire country could do.

If you support vaccine passports, we will vote you out. There are too many good, healthy, and hard working people who are trying to make a living and support their families but this insanity needs to stop. The people that you are paid to listen to and represent are suffering and the community will continue losing businesses while families lose everything and/or more people pack up and move out of this beautiful state.

Personally, I don’t care what anyones politics are, we need to come together and do better for everyone and the future of this country and the future of our children. They are suffering the most right now with so many mental, physical and emotional traumas. This is not natural. We will be raising an unhealthy generation. That is not even close to representing a build back better state of mind.

By increasing mandates and the constant dehumanizing of unvaccinated people, we are tearing away at the fabric of our free nation while further dividing us and in the end the virus will still be here.

As a reminder of the oath you took to be in the position you’re currently in,

Washington State Constitution:

Article 1, Section 1: All political power is inherent in the people, and governments derive their just powers from the consent of the governed, and are established to protect and maintain individual rights.

Article 1, Section 2:

The Constitution of the United States is the supreme law of the land.

I can only hope you make good decisions. Good day.

Good Day Mayor Wheeler,

It's been brought to my attention that there is a council meeting September 28th at 11am to discuss whether or not to implement vaccine passports.

First of all, there are no laws in the state of Washington that allow businesses to mandate vaccines. Therefore, if you vote (without public opinion) to implement these requirements, you will be illegally overstepping and there will be many lawsuits to come to this city and state.

Also, it is overdue to allow for these meetings to be public. No more zoom meetings that do not include the public in which you all serve.

You seem to forget that the U.S. Constitution is still the supreme law of the land. Until Governor Inslee calls for a special session to allow the legislature to create actual laws, there are a few rights of the people that are being trampled:

~U.S. Constitution Fourteenth Amendment.

~Civil Rights Title 2 sect 201.

~Civil Rights Title 7.

~Washington State Constitution

Article 1 Sect 1

~Washington State Constitution

Article 1 Sect 3

~Washington State Constitution

Article 1 Sect 4

~Washington State Constitution

Article 1 Sect 7

These are just a few of the peoples rights that are presently being denied.

Thank you.

Good afternoon Mayor Wheeler,

I hope you're enjoying your day. I want to remind you that you represent the people who work hard to make this city thrive and whom have been working nonstop throughout this entire "pandemic."

Our livelihoods are suddenly at stake, not because we choose to give up our jobs, but because an overreaching and authoritarian government chooses to deny real science by ignoring natural immunity and not being accepting of other available medical treatments.

Let me remind you that we are not anti vaccine, we are anti mandate. Every single citizen should be allowed their choice over their own health and medical procedures.

I will leave you with this quote from one of our founding fathers.

"Be it remembered, that Liberty must at all hazards be supported. We have a right to it, derived from our Maker. But if we have not, our fathers have earned and bought it for us at the expense of their ease, their estates, their pleasure, and their blood." ~ John Adams

Subject: Vaccine mandates

CAUTION: This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Good evening Mayor Wheeler,

I know this is a tough topic but this vaccine mandate is insane. What is going on is a true violation of our civil rights, our Constitutional rights and our medical privacy.

I know you understand that even in an emergency proclamation, the governor cannot make laws he can only suppress some. Since governor Inslee has already turned down a special session, the legislature is not able to gather to pass actual laws.

I hope you understand the amount of lawsuits that will come to the governors desk because of this and I would hope that you will stand with your constituents and do not allow these illegal mandates to come to Kitsap county.

Thank you,

Alyssa Wainwright

Subject: Denouncing Medical Apartheid

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Greetings Mr. Grellner,

I am writing you today to express my concerned outlook toward potential medical apartheid being implemented in Kitsap County. Throughout the course of the pandemic we have seen a series of progressive changes to our society, which I understand were intended to influence "public health" concerns. If the medical treatment had a 100% guarantee of voiding the infection and transmission of viral load, I would believe more so in mandating said treatment. Yet given the fact that one can still be infected and transmit viral load while inoculated, I believe we should stand with a person's free choice to make medical decisions for themselves, especially since breakthrough infections still occur among vaccinated individuals and the vaccines are still in clinical trial period until 2023.

I would find much comfort knowing that regardless of medical status, everyone will still be allowed to patronize the grocery store and support their families which is why I, as a Kitsap County constituent, request that you do not enact and enforce an apartheid (proof of vaccination mandate). Coercing people via restriction of societal access to receive a medical product which has not concluded the clinical trials is essentially issuing an ultimatum pushing them to partake in a pharmaceutical experiment which, as we know, is a violation of The Nuremberg Code of Ethics.

I also understand that this is a sensitive subject but it is evident in historical context using the German/Jewish, Dutch/South African and Black/White apartheid as an example of fixation suggests that apartheid was thought to be the right method in that time period but are retrospectively considered evil and discompassionate since it has come to surface that there was never actually anything "wrong" with the people being segregated against. I worry this is the case with apartheid in present day, and those which may come in the future.

I respectfully request that no demeaning articulated social mechanisms fall upon people who have chosen not to participate in the clinical trial of a drug that has proven to not demonstrate 100% effectiveness in the mission of disease prevention.

Thank you so much for your time,

Andrew Ungren, constituent of Kitsap County

Subject: Vote for Choice 1

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Mr. Grellner:

I am a resident of unincorporated Kitsap County. I am writing to implore you to vote for the first option of “no action” of the Kitsap Public Health District’s recommendations at your meeting on October 5th.

As many of you mentioned at your meeting on September 28th, our small businesses have suffered enough in the past 18 months. They have tirelessly accommodated to the endless onslaught of new rules and regulations put on them at all levels of government. Customers also have grown weary of the constantly changing mandates just to accomplish their everyday errands. I now call stores and restaurants just to see what they are requiring before I even leave the house. Business owners did not sign up to enforce laws/mandates on their customers. Asking them to do so, places an undue burden on an already tired workforce. Some of our youngest workers are teenagers, can you imagine asking a teenager to enforce your policies? If by your estimate, 70% of the county is vaccinated, can our businesses survive a 30% cut in revenue? Can Kitsap County survive a 30% cut in tax revenue?

Voting for any option other than “no action,” violates the health privacy of everyone and is discrimination. In recent history, in America, never have people been denied access to stores, restaurants, entertainment, or education because of their vaccination status or for health reasons. If they were, that establishment was called out for their discrimination and forced to accommodate. We currently are allowed to enter and move freely if we are not vaccinated against many more, some more deadly, viruses. Requiring customers to disclose their medical status is a gross violation of personal privacy. Personal health is no one’s business except to you and your doctor. That is why we have HIPAA laws.

One member at the September 28th meeting suggested testing. This is not a feasible option. With so many places requiring testing, it is extremely difficult to find at home tests and schedule testing at sites within the required time limits. Even President Biden, in one of his latest speeches, admits that there are not enough tests to meet the current demand.

As a military family, I think of the new families coming to our county. Seven years ago, I arrived here alone with my three children. If vaccine passports were mandated, how welcoming would our county seem to an unvaccinated dependent trying to make this their new home? Being a military dependent can be isolating enough, as a military community, we need to be doing everything we can to welcome and support them.

We all want to return to “normal.” The fastest way to do that is to vote for “no action.” Let business owners decide what is best for their company, employees, and customers. Let people (including city and county employees) make their health decisions in private with their personal doctor. This is “normal.”

Sincerely,

Jennifer Jones

Subject: Lasting immunity found after recovery from COVID-19 - National Institutes of Health

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Dear Keith,

Much of the information on natural immunity has been hidden. Even in the KCHD they act like the vaccine is better. But as you can see here they are wrong. You just to ask these questions:

Why do you have to wear a mask if you are vaccinated! Why do we need a booster if this vaccine was thoroughly tested?

Yes, it is still being tested! And you are all the unknowing test subjects.

Lately, I have bumped into some folks that say that you are not immune after having COVID.

I tell them what do you think herd immunity consists of?

It is shocking we knew this from the very beginning. Who is telling them this? It is misinformation.

I was always put off because they would post the cases daily and never say anything about them being immune! If they did we would have much less fear of this virus.

They did a study and the democrats actually thought 40% of those that got COVID died.

But they only get their science from the democrat talking points or MSM headlines.

So here is an article from NIH that says you are immune. Yes, that is the organization that Fauci works for.

You have seen Fauci asked about natural immunity and he says "they are looking into it".

He knows this. But they have been very careful to hide it from the public. "The only solution is the vaccine!"

You can see here that if you had COVID you are immune. They still try to make it not as profound, but they do not deny it.

Interestingly the author hopes that the vaccine has the same responses as the naturally immune.

“Several months ago, our studies showed that natural infection induced a strong response, and this study now shows that the responses last,” Weiskopf says. “We are hopeful that a similar pattern of responses lasting over time will also emerge for the vaccine-induced responses.”

Lasting immunity found after recovery from COVID-19

As a resident of Kitsap county, I wanted to thank Commissioner Wolfe and Commisioner Gelder for your stance for small businesses in the Kitsap Public Health Board Special Meeting on Sept 28. I watched the meeting and was pleased to hear that you don't agree with mandates on small businesses. I also agreed with Mayor Erickson and Mayor Putaansuu. I believe it was Robert Gelder that suggested letting small businesses make their own choice and marketing themselves as a "vaccine only facility" if they wanted to, a great idea.

I completely agree that this should be a jurisdictional decision. The members of the Health Board are elected officials meant to represent their own districts and that needs to be remembered by all. I do not get to vote for representation on Bainbridge Island and, while Kirsten Hytopoulos can speak for the residents of Bainbridge, she cannot speak for all of Kitsap county.

I live in Port Orchard and am represented by Charlotte Garrido. I'm hoping that you, Commissioner Garrido, are following the train of thought that supports small business rather than make things more difficult for them.

It was pointed out in the meeting that COVID is not the only issue causing long wait times for ambulances and emergency care, mental health issues are also a large part. Why not reopen Harrison in Bremerton as a mental health only emergency facility and place more mental health professionals than ER nurses and doctors there? It would give a separate location for mental health care and take the burden off of the two remaining hospitals in the area. Let's say we have three full salt shakers. When we try to pour the contents into two shakers, we will of course have a bottleneck and then overflow. That's what we've done by eliminating a care facility in Kitsap county.

There has to be a way that building can be utilized to take some stress off of the healthcare system.

Fact sheets were mentioned more than once but there are so many conflicting "facts" from even the top scientists and doctors in the country. To be honest, I don't think many of us believe 100% in anyone any more. Opinions are flying and sorting through things to find common sense is a challenge. But, it is our right to make our own decisions based on all of the facts available, not the facts that are chosen to be presented by any given entity.

I heard numerous complaints about how many emails you all had, I hope they will all be read and taken into account before any decision is made. And I hope you remember that you represent, your decisions are to be made according to the will of your constituents.

I look forward to watching the meeting on October 5 and look forward to seeing the small businesses in Kitsap county get good representation by people who understand that running a business is difficult in the best of circumstances and these people have been put through enough. As Dr. Gib Morrow once said, public health is "about making it easy for people to do the right thing in terms of THEIR OWN HEALTH" and I sincerely hope we will be left in charge of OUR OWN HEALTH decisions. I also look forward to hearing from representatives who realize that mandates are not what America is about, freedom is.

Sincerely,
Kelly Donalson

Please vote no and do NOT support vaccine mandates, as well as vaccination identification cards. We have the right to choose! A person has the right to choose what they put into their body. It is a personal decision. Allowing the government to mandate vaccinations has created two classes of citizens, and in affect created division in our society. This is constitutionally wrong! If passed we will be boycotting your county, businesses and spreading the word for others to do the same.

Subject: Kitsap Public Health Board Meeting of Sept. 28,2021

[CAUTION]: This email originated from outside Kitsap Public Health District. Do not click links or open attachments unless you are expecting this email. If you are unsure please contact IT.

I watched the subject meeting with interest. It was encouraging to see that the elected officials were generally opposed to businesses having to police vaccine mandates as part of doing business as it places an undo burden on these businesses. It is hard enough for these businesses to stay afloat without the problems this additional burden would cause.

There were several other areas of the conversation that caught my attention. One was the wait times for EMS personnel to transfer custody of patients to hospital staff. As I stated in my email of 28 Sept. 2021, I believe people that self report to the hospitals and doctor's offices, with COVID 19 symptoms, are being told to go home for two weeks and see if their symptoms improve or not. No effort is given to early treatment of the illness. I not only have heard this from friends and acquaintances, it happened to a family member. Fortunately, he was young and healthy and his own immune system was able to overcome the virus. I have seen numerous reports which indicate early treatment will prevent the virus from getting a foothold and turning into something worse. There is a Dr. Zelenko, in New York, who has such a protocol that has shown to be effective. Why aren't we pursuing such an early treatment approach to dealing with this virus?

My point in this is, your charts did not indicate how many, if any, of the people that EMS transported had had a prior self reporting visit either to the ER or their physician's office prior to EMS being called. Knowing this would be helpful as it may provide an avenue for fewer emergency calls, if individuals were to receive early at home treatment, thus avoiding altogether the need for an emergency room visit to the hospital.

During the meeting you also talked, and showed statistics, on the effectiveness of the vaccine and discussed ways to educate the public better so they would get it. I know of several situations, involving friends and acquaintances that have had adverse reactions to the vaccine. One involved a person in the medical field who, as a part of her work requirement, got the vaccine. Two hours later she was in the ER receiving treatment due to an adverse reaction. I know of another person who had received the vaccine and two days later was dead. And finally, I know of a young pregnant woman who received the vaccine and within two weeks her child was still born. I could be wrong here but, I'm guessing your charts and statistics are of little consolation to these people, their families and their friends. So, when you put together your education material, you should consider these situations and understand that word of these situations gets out and people become as afraid of the vaccine as they are of the virus and elect not to get the vaccine.

My last point involves natural immunity verses artificially induced immunity resulting from the vaccine and the long term effect of both. The Israeli study shows that natural immunity is far more effective at guarding against being reinfected by the virus or its variants. Other studies have also shown natural immunity to be more effective than that gained from the vaccine though to a lessor degree. I'm no scientist, but, these results make sense to me. A simple "proof" of this is that for those who have received the vaccine, the medical community is now saying they should also get the booster. I believe the idea of a booster is a rabbit hole we should not run down because when this booster becomes ineffective, another booster will be needed and then another, and another etc. It would be better to let people develop natural

immunities to the virus and its variants. This said, I do believe that elderly people and people having compromised immune systems should receive the vaccine and boosters as deemed appropriate by the patient and their personal physician. However, these decisions should be between the patient and their doctor, not driven by public policy.

Respectfully,

Bruce Van Woudenberg

To: Keith Grellner
Subject: Sept 28 Zoom PH meeting

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

I am Clifford E Hagman, resident of Port Orchard, Kitsap County. I am a retired healthcare professional and medical (hospital) social worker of 18 years, formerly licensed in Iowa. It has come to my attention that Kitsap County Health Department is considering options for requiring Covid19 vaccines, and proof of vaccination in order to enter any business establishment in the county. These options are being considered in light of a crisis in health care availability, specifically at our local hospitals.

I understand there is no easy answer to the crisis we are facing with Corona Virus Sars2 and the manifestation of Covid19 and its variants. However, absolutely every effort should be made to explore other available solutions to our healthcare crisis before EVER removing the rights of people to freely go about their business of living, and enjoying the independence that is inherently ours. Four of the five options listed on your agenda for Sept 28, 2021 limit those rights. I am opposed to these restrictive and mandated options, and hope that the county will search for alternatives that will not impact individual freedoms, choice, and access to essential services.

Having stated my concern, if you care to read on, I will explain my position.

- 1 - An underlying principle of healthcare is informed consent. Mandates for vaccination violate that principle on multiple levels.
- 2 - The term "vaccine" in this case is a misnomer, and misleading to the public. It does not lead to immunity as a traditional vaccine does. This is evidenced by the high number of vaccinated persons who are ill with Covid19 or a variant. Research illustrates that both vaxed and unvaxed persons can spread the virus(es). Thus, the mask mandates.
- 3 - The vaccine has resulted in frequent and severe side effects that are often more compromising than the virus itself. (Ref NIH/CDC data in VAERS). Many of these adverse reactions appear to be life-long and life-limiting in themselves. These are risks that are not being taken into account when vaccines are mandated, nor is the long-range impact on the health care system being considered.
- 4 - The vaccines currently in use still fall under the EUA declaration. Thus, if administered without consent, or coerced, or mandated, liability may be cast upon the mandating authority if a person is "coerced" to receive it under threat of deprivation of essential goods and services.
- 5 - Discrimination. Research shows and has long been known that a person recovered from a viral illness has natural immunity as durable as vaccinated persons. In fact, natural immunity is the standard that vaccines must live up to. This vaccine does not. There is no provision in your option list for persons with natural immunity as a result of a Covid episode. It conveys the attitude "just vaccinate them all and be done with it!" I don't believe this is the type of healthcare you or I want to endorse. It would be like

saying, "Many people will get cancer and die from it, so just chemo and radiate them all!"

6 - There ARE proven, effective, and researched treatment modalities for Covid19 patients that result in rapid recovery, fewer days in the hospital, and almost zero deaths. Consideration of these modalities would directly address the crisis in our healthcare system, provide better outcomes for our patients, and maintain our rights and freedoms. The powers that be, and you are following with best intentions, do not endorse these. Please step out of the box and demonstrate courage to stand for your people in Kitsap. I believe that is your ultimate goal. You owe it to your public to learn about these remedies and use your position in healthcare to defend health and freedom in our county.

In any respect, I stand opposed to Covid vaccine mandates.

Lives depend on you considering all options to preserve health, and freedoms. I hope you use your Zoom meeting time to explore beyond your agenda options.

Thank you,

Cliff Hagman

399 Golden Pond St

Port Orchard, WA

641-420-2092

cliffhagman@gmail.com

Addendum;

On Monday afternoon Sept 27, 2021 I authored and emailed the above letter to you and others at Kitsap Public Health regarding the options to be considered during the Zoom meeting Tuesday. It appears you may not have received it.

At this time I offer the affidavit below as an addendum to the original letter above to underscore the serious nature of mandating Covid-19 vaccines. Although the military has its own concerns, what you ultimately decide to require for Covid management in the civilian community also impacts them.

The Sept 28 meeting agenda clearly stated the premise that the overload on our healthcare system was the basis for considering the five options in the letter. Again I would request, please look seriously at other viable treatment options for pre-covid prevention and early treatment in the community setting other than just vaccinations to address this healthcare facility crisis. They DO exist and are very effective per multiple reports of M.D.s and by research.

Over 4,000 physicians world-wide now agree that the guidance given by our national and world healthcare leaders may be considered criminal in view of mounting evidence. Please be courageous to look beyond the present path dominated by vaccine requirements and mandates.

Sincerely,

Clifford E Hagman

For the meat of the matter of this affidavit, skip to paragraphs 16-39.

AFFIDAVIT OF LTC. THERESA LONG M.D. IN SUPPORT OF A MOTION FOR A PRELIMINARY INJUNCTION ORDER

I, Lieutenant Colonel **Theresa Long**, MD, MPH, FS being duly sworn, depose and state as follows:

1. I make this affidavit, as a whistle blower under the Military Whistleblower Protection Act, Title 10 U.S.C. § 1034, in support of the above referenced MOTION as expert testimony in support thereof.

2. The expert opinions expressed here are my own and arrived at from my persons, professional and educational experiences taken in context, where appropriate, by scientific data, publications, treatises, opinions, documents, reports and other information relevant to the subject matter and are not necessarily those of the Army or Department of Defense.

Experience & Credentials

3. I am competent to testify to the facts and matters set forth herein. A true and accurate copy of my *curriculum vitae* is attached

hereto as **Exhibit A**.

4. After receiving a bachelor's degree from the University of Texas Austin, completed my medical degree from the University of Texas Health Science Center at Houston Medical School in 2008. I served as a Field Surgeon for ten years and went on to complete a residency in Aerospace and Occupational Medicine at the United States Army School of Aviation Medicine, Fort Rucker, AL. I hold a Master's in Public Health, and I have been trained by the Combat Readiness Center at Ft. Rucker as an Aviation Safety Officer. Additionally, I have trained in the Medical Management of Chemical and Biological Casualties at Fort Detrick and USAMIIRD.

5. I am board-certified in flight Aerospace Medicine and board eligible in Occupational Medicine.

6. I am currently serving as the Brigade Surgeon for the 1st Aviation Brigade Ft. Rucker, Alabama and am responsible for certifying the health, mental and physical ability, and readiness for all nearly 4,000 individuals on flight status on this post.

7. My appended *curriculum vitae* further demonstrates my academic and scientific achievements by me over the past thirteen years.

8. Prior to the outset of the pandemic, I received specialized military training from Infectious Disease doctors from the Army, Navy and Air Force on emerging infectious disease threats, FEMA training, Emergency preparedness training, Medical effects of Ionizing Radiation, OSHA, Aerospace Toxicology, Epidemiology, Biostatistics, medical research and disaster planning. More recently I have functioned as a medical and scientific advisor to an Aviation training Brigade seeking to identify risk mitigation strategies, and bio statistical analysis of SARS- Cov-2 ("Covid 19") infections in both vaccinated and unvaccinated Soldiers. In so doing, I have identified, diagnosed and treated Covid 19 pathogenic infections. I have observed vaccine adverse events following the administration of EUA vaccines and followed the success of Soldiers who obtained various Covid 19 therapies outside the military. The majority of service members within the DOD population are young and in good physical condition. Military aviators are a subset of the military population that must meet the most stringent medical standards to be on flight status. The population of student pilots I take care of are primarily in their 20s-30s, males and in excellent physical condition. The risk of serious illness or death in this population from SARS-CoV-2 is minimal, with a survival rate of 99.997%.

9. In observing, studying and analyzing all the available data, information, samples, experiences, histories and results of these treatments and inoculations provided, I have formulated a professional opinion, which requires me to report those findings to superiors in the chain of command and colleagues in the military. I have done so with mixed results in terms of acceptance, rejection and threats of punishment for so sharing.

10. The application of risk management is critical to the safety and success in both medicine and aviation. Aerospace Medicine is a specialty devoted to safety of flight by the aeromedical dispositioning and treatment of flight crew members, as accomplished by the consistent and careful application of risk mitigation and management strategies. ATP 5-19, 1-3. Risk Management (RM)1 outlines a disciplined approach to express a risk level in terms readily understood at all echelons.

11. 1-6. States, "A risk decision is a commander, leader, or individual's determination to accept or not accept. The risk(s) associated with an action he or she will take or will direct others to take. RM is only effective when specific information about hazards and risks is passed to the appropriate level of command for a risk decision. Subordinates must pass specific risk information up the chain of command."

12. "When the specific information about hazards and risks is passed to the appropriate level of command for a risk decision. Subordinates must pass specific risk information up the chain of command. Conversely, the higher command must provide subordinates making risk decisions or implementing controls with the established risk tolerance—the level of risk the responsible commander is willing to accept. RM application must be inclusive; those executing an operation and those directing it participate in an integrated process".

13. 1-7. States, "In the context of RM, a control is an action taken to eliminate a hazard or to reduce its risk. Commanders establish local policies and regulations if appropriate".

14. The five steps of Risk management include 1. Identify the hazards, 2. Assess the hazards, 3. Develop controls and make risk decisions, 4. Implement controls, 5. Supervise and evaluate.

15. It is therefore my responsibility and that of every leader to apply the steps of risk management to the current pandemic and countermeasures used. **The CDC and the FDA are civilian agencies that do not have the mission of National Defense that the DOD has.** Guidance and recommendations made by these civilian agencies must be filtered through strategic perspective of national defense and the potential risks recommendations may have on the health of the entire fighting force. Ensuring that the health of the fighting force is not compromised is a strategic imperative, for which **every** military physician is responsible to of the entire fighting force. Ensuring that the health of the fighting force is not compromised is a strategic imperative, for which **every** military physician is responsible to ensure.

16. **Step 1: Identify the hazards:** As defined by FM 1-02.1 Operational Terms, pg. 1- 48, hazard is a condition with the potential to cause injury, illness, or death of personnel; damage to or loss of equipment or property; or mission degradation.
17. **Step 2: Assess the Hazards:** There are numerous therapeutic agents that have been proven to significantly reduce infection and therefore provide protection from the harmful effects of SARs-CoV-2.
18. Literature has demonstrated that natural immunity is durable, completed, and superior to vaccination immunity to SARs-CoV-2. mRNA vaccines produced by Pfizer and Moderna both have been linked to myocarditis, especially in young males between 16-24 years old.² The majority of young new Army aviators are in their early twenties. We know there is a risk of myocarditis with **each** mRNA vaccination. We additionally now know that vaccination does not necessarily prevent infection or transmission of SARs-CoV-2. Therefore individuals fully vaccinated with mRNA vaccines have at least two independent risk factors for myocarditis after vaccination. Additional booster shots add more risk. It is impossible to perform a risk/benefit analysis on the use of mRNA as counter measures to SARs-CoV-2 without further data... Use of mRNA vaccines in our fighting force, presents a risk of undetermined magnitude, in a population in which **less than 20 active-duty personnel out of 1.4 million, died of the underlying SARs- CoV-2.**
19. Aircrew Training Program (ATP) 5-19, 1-8. **Accept No Unnecessary Risk**, states, “An unnecessary risk is any risk that, if taken, **will not contribute meaningfully to mission accomplishment or will needlessly endanger lives or resources.** Army leaders accept only a level of risk in which the potential benefit outweighs the potential loss.
20. Research shows that most individuals with myocarditis do not have any symptoms. Complications of myocarditis include dilated cardiomyopathy, arrhythmias, sudden cardiac death and carries a mortality rate of 20% at one year and 50% at 5 years. According to the National Center for Biotechnology Information, U.S. National Library of Medicine, “despite optimal medical management, overall mortality has not changed in the last 30 years”.
21. **Step 3: Develop controls and make risk decisions:** Because vaccination with mRNA increase the risk of myocarditis, a comprehensive screening program should be implemented immediately to identify individuals who have been affected and attempt to mitigate immediate risks and long-term disability.
22. **Step 4: Implement Controls:** Send out clear guidance to all DOD healthcare professionals on risks of-vaccination myocarditis. Compulsory SARs-CoV-2 mRNA vaccination program should be immediately suspended until research can be done to determine the true magnitude of risk of myocarditis in individuals who have been vaccinated. We must evaluate and immediately implement alternatives to mRNA vaccines, to include Ivermectin (FDA approved 1996), Remdesivir (FDA approved 2020), Hydroxychloroquine (FDA approved 1955), Regeneron (FDA EU approved 2020). Review VAERS data for deaths from COVID for age-matched data and data from active duty COVID deaths within the DOD to perform a risk/benefit analysis.
23. **Step 5: Supervise and evaluate:** We must establish a screening program to identify those at increased risk of myocarditis, i.e. those that have, received mRNA vaccinations with Comirnaty, BioNTech or Moderna, or have any of the following symptoms chest pain, shortness of breath or palpitations They should have screening tested performed in accordance with the CDC recommendations prior to return to flight duties. Per the CDC guidelines the initial evaluation of individuals identified according to the above criteria include ECG, troponin level, inflammatory markers such as the C-reactive protein and erythrocyte sedimentation rate. It should be noted that the gold standard for diagnosis of myocarditis is end myocardial biopsy (EMB).
24. The shots carry mRNA that causes the recipient to create trillions of spike proteins. This is a problem for five reasons. First, it turns out that the spike proteins are not remaining locally in the (shoulder) injection site but have been found circulating in the blood and in virtually all organs of the body. Second, the spike proteins themselves have been shown to be pathogenic (disease causing) attaching to endothelial, pulmonary and other cells, forming clots and attacking heart cells. Third, the spike proteins and their lipid nanoparticles cross the blood brain barrier, with unknown long-term effects on the brain and high concern for chronic neurodegenerative disorders. Fourth, these spike proteins interact in many signaling pathways which may trigger tumor formation, cancer, and other serious diseases. Fifth, according to Pfizer’s Japanese distribution study of LNP accumulation, unexpected sequestering in reproductive organs and spleen raise very serious long-term concerns. As aircrew Training Program (ATP) 5-19, 1-8 states we shall: **Accept No Unnecessary Risk.** “An unnecessary risk is any risk that, if taken, **will not contribute meaningfully to mission accomplishment or will needlessly endanger lives or resources.** Army leaders accept only a level of risk in which the potential benefit outweighs the potential loss. From a risk management assessment perspective, with no long-term safety data regarding these five issues, this is an unacceptable risk management risk.
25. The labels for Comirnaty and BioNTech clearly state that the vaccination should not be given to individuals that are allergic to ingredients. One of the listed primary ingredients of these injectables is Polyethylene glycol (“PEG”) which is close in molecular makeup and in the same family of synthetic polymers as Propylene Glycol, a common ingredient in antifreeze. Others seem to agree my point per recent scientific studies that caused a group of 57 doctors and scientists to call for an immediate halt to the vaccination program. The concern with this ingredient, is that Polyethylene glycol (PEG) is that it is an adjuvant which causes an immune

response without carrying any vaccine at all. We believe 72% of the population already has PEG antibodies. That bodily response to PEG, ranges from severe anaphylactic response requiring hospitalization or death, to life-long allergies and anti-drug antibodies (ADAs) which could stop other medications from working in your body. Another primary ingredient of the Lipid Nanoparticle delivery system is “ALC 0315” (two attachments, parts highlighted) in the Pfizer shots. The fourth attachment is the toxicity report on ALC-0315, which comprises between 30-50% of the total ingredients. The Safety Data Sheet, (attached as Exhibit B) for this primary ingredient states that it is Category 2 under the OSHA HCS regulations (21 CFR 1910) and includes several concerning warnings, including but not limited to:

1. Seek medical attention if it comes into contact with your skin
2. If inhaled and If breathing is difficult, give cardiopulmonary resuscitation
3. Evacuate if there is an environmental spill
4. the chemical, physical, and toxicological properties have not been completely investigated
5. Caution: Product has not been fully validated for medical applications. For research use only

26. As such, due to the risk associated with the spike proteins themselves, due to the risks associated with the lipid nanoparticles (ALC 0315) and adjuvants such as PEG, I believe it is reasonable to conclude that these shots pose a serious risk to many humans due to direct adverse effect or allergic reaction, and therefore should not take vaccinations with either Comirnaty or BioNtech. Again, I have identified an agent that possess a significant hazard to Soldiers, which would fall under DA Pam 385-61 Toxic Safety Standards cited in 2-11.

27. My assessment is that ALC 0315 is a known toxin with little study, specifically it is still lacking toxicity, carcinogenic, and teratogenic studies and is specifically restricted to “research only” and effectively has no prior use history, with the SDS designation of (GHS02), listed as H315 and H319, in other words, hazardous if inhaled, ingested or in contact with skin and a health hazard with the designation (P313). A review of the SDS outlines that it is not for human or veterinary use.

28. I have not taken significant time to delineate the risks of other Covid 19 Vaccines other than the Safety Data Sheet of Moderna’s key ingredient, SM-102 (attached as Exhibit C). Suffice it to say that SM-102 is significantly more dangerous than the Pfizer ALC 0315 and it appears that the DOD is not actively acquiring or distributing this IND/EUA. If the DOD were to undertake use of the Moderna vaccine, one can expect a much higher Serious Adverse Event and fatality rate given that SM-102 carries an express warning “Skull and Crossbones” characterized under the GHS06 and GHS08. In other words, this Moderna ingredient is deadly.

29. Given that these Covid 19 Vaccines were both Investigational New Drugs and Emergency Use Authorization vaccines, I have taken considerable time to understand potential risks, hazards and dangers these and any new drug or Investigational New Drug will may have on the health, safety and operational readiness or ability of pilots under my care and at this post. I have sought to research military records and track systems for recording events and Serious Adverse Events and fatalities associated with vaccines, new vaccines and Emergency Use, investigational vaccines in computer data systems recommended by the General Accounting Office in 2002 and ordered to be developed and implemented by the Secretary of Defense in 2003.

30. A weekly MEDSITREP report fails to report the CDC data from VAERS or internal data regarding vaccine adverse events. Despite recommendation made by the Government Accountability Office in the GAO’s survey of Guard and Reserve Pilots and Aircrew GAO-02-445, published Sep 20,2002, in which it was recommended that the Secretary of Defense should direct the establishment of an active surveillance program (unlike the passive VAERS) to identify and monitor adverse events, was not implemented. I have been unable to locate, access or asses any data, data base or internal system to track, store, evaluate or research the effects of vaccines on our military members or pilots.

31. I have also reviewed scientific data and peer reviewed studies that discuss, analyze results and conclude that natural immunity is at least as good if not far superior to any Covid Vaccine available at this time. I have also reviewed Dr. Peter McCullough’s affidavit in support of and in relation to the Complaint filed in this case and have reviewed its supporting data. An additional peer-reviewed study not referenced in Dr. McCullough’s materials also supports the same conclusions drawn and reports that natural immunity provides a 13-fold better protection against Covid 19 infections than any currently available Covid 19 Vaccine⁶. More recently, in a meeting of the FDA Advisory Committee on September 17 of this year, fourteen of seventeen members voted against the authorization of any Covid booster vaccines in the juvenile age group having noted that the vaccine program has breached the defining test under the EUA statute as to whether the experimental treatment benefits outweigh the risks; in fact, they found the shots are far more dangerous than helpful in this age group and some voiced concerns that this would apply generally to all age groups.⁷

32. I am also aware of the Secretary of Defense Austin’s order in relation to Covid Vaccine mandates made this week. In an information paper, it was stated that, “Unit personnel should use only as much force as necessary to assist medical personnel with immunizations.” The use of force to administer a medical treatment or therapy against the will of a mentally competent individual constitutes medical battery and universally violates medical ethics. Currently, I am not aware of the Comirnaty available within the DOD. Emergency Use Authorized vaccines, despite the attempt to characterize some of them as approved despite such approved

versions not being available and regardless of a military member's prior immunity to Covid 19; even where it may be demonstrated with a recent antibody test.

33. Finally, I have reviewed a recent study entitled *"US COVID-19 Vaccines Proven to Cause More Harm than Good Based on Pivotal Clinical Trial Data Analyzed Using the Proper Scientific Endpoint, All Cause Severe Morbidity,"* by J. Bart Classen, MD and published in *Trends in Internal Medicine*; August 25, 2021. Attached as Exhibit D.

34. I have also seen policies, memoranda and guidance as it relates to exemptions for vaccinations as fully detailed in Army Regulation 40-562, which purport to eliminate any exemption for prior immunity by our military personnel.

Opinion

35. I have reviewed the Motion for a Preliminary Injunction which discusses the issue of prior immunity benefits outweighing the risks of using experimental Covid 19 Vaccines, together with proposed exhibits and materials cited therein. In opinion on this subject matter, I am also drawing my own conclusions that will be put into practice in my current role as an Army flight surgeon knowing full well the horrific repercussions this decision may befall me in terms of my career, my relationships and life as an Army doctor.

36. I personally observed the most physically fit female Soldier I have seen in over 20 years in the Army, go from Collegiate level athlete training for Ranger School, to being physically debilitated with cardiac problems, newly diagnosed pituitary brain tumor, thyroid dysfunction within weeks of getting vaccinated. Several military physicians have shared with me their firsthand experience with a significant increase in the number of young Soldiers with migraines, menstrual irregularities, cancer, suspected myocarditis and reporting cardiac symptoms after vaccination. Numerous Soldiers and DOD civilians have told me of how they were sick, bed-ridden, debilitated, and unable to work for days to weeks after vaccination. I have also recently reviewed three flight crew members' medical records, all of which presented with both significant and aggressive systemic health issues. Today I received word of one fatality and two ICU cases on Fort Hood; the deceased was an Army pilot who could have been flying at the time. All three pulmonary embolism events happened within 48 hours of their vaccination. I cannot attribute this result to anything other than the Covid 19 vaccines as the source of these events. Each person was in top physical condition before the inoculation, and each suffered the event within 2 days post vaccination. Correlation by itself does not equal causation, however, significant causal patterns do exist that raise correlation into a probable cause; and the burden to prove otherwise falls on the authorities such as the CDC, FDA, and pharmaceutical manufacturers. I find the illnesses, injuries and fatalities observed to be the proximate and causal effect of the Covid 19 vaccinations.

38. I can report of knowing over fifteen military physicians and healthcare providers who have shared experiences of having their safety concerns ignored and being ostracized for expressing or reporting safety concerns as they relate to COVID vaccinations. The politicization of SARs-CoV-2, treatments and vaccination strategies have completely compromised long-standing safety mechanisms, open and honest dialogue, and the trust of our service members in their health system and healthcare providers.

39. The subject matter of this Motion for a Preliminary Injunction and its devastating effects on members of the military compel me to conclude and conduct accordingly as follows:

1. a) None of the ordered Emergency Use Covid 19 vaccines can or will provide better immunity than an infection-recovered person;
2. b) All three of the EUA Covid 19 vaccines (Comirnaty is not available), in the age group and fitness level of my patients, are more risky, harmful and dangerous than having no vaccine at all, whether a person is Covid recovered or facing a Covid 19 infection;
3. c) Direct evidence exists and suggests that all persons who have received a Covid 19 Vaccine are damaged in their cardiovascular system in an irreparable and irrevocable manner;
4. d) Due to the Spike protein production that is engineered into the user's genome, each such recipient of the Covid 19 Vaccines already has micro clots in their cardiovascular system that present a danger to their health and safety;
5. e) That such micro clots over time will become bigger clots by the very nature of the shape and composition of the Spike proteins being produced and said proteins are found throughout the user's body, including the brain;
5. f) That at the initial stage this damage can only be discovered by a biopsy or Magnetic Resonance Image ("MRI") scan;
6. g) That due to the fact that there is no functional myocardial screening currently being conducted, it is my professional opinion that substantial foreseen risks currently exist, which require proper screening of all flight crews.
7. h) That, by virtue of their occupations, said flight crews present extraordinary risks to themselves and others given the equipment they operate, munitions carried thereon and areas of operation in close proximity to populated areas.
8. i) That, without any current screening procedures in place, including any Aero Message (flight surgeon notice) relating to this demonstrable and identifiable risk, I must and will therefore ground all active flight personnel who received the vaccinations until such time as the causation of these serious systemic health risks can be more fully and adequately assessed.

9. j) That, based on the DOD's own protocols and studies, the only two valuable methodologies to adequately assess this risk are through MRI imaging or cardio biopsy which must be performed.
10. k) That, in accordance with the foregoing, I hereby recommend to the Secretary of Defense that all pilots, crew and flight personnel in the military service who required hospitalization from injection or received any Covid 19 vaccination be grounded similarly for further dispositive assessment.
11. l) That this Court should grant an immediate injunction to stop the further harm to all military personnel to protect the health and safety of our active duty, reservists and National Guard troops.

40. I am competent to opine on the medical and flight readiness aspects of these allegations based upon my above-referenced education and professional medical, aviation and military experience and the basis of my opinions are formed as a result of my education, practice, training and experience.

41 As an Aerospace Medicine Specialist, and flight surgeon responsible for the lives of our Army pilots, I confirm and attest to the accuracy and truthfulness of my foregoing statements, analysis and attachments or references hereto:

Performed a cross-sectional study on Intervertebral Disc Disease Among Army Aviators and Air Crew

08/2002 – 05/2003

University of Texas at Austin, Texas

Research Assistant, Dr. Dee Silverthorn

Performed academic research in effort to update medical facts and the latest research information for the publication of the fourth edition of Human Physiology

09/2000 – 11/2000

Neuropharmacology Research, Texas

Lab Tech, Dr. Silverthorn

Acquisition of rat cerebellums for research in gene sequencing. The focus of the project was to determine the DNA sequence of the receptor in the developing fetal brain that binds to ethanol and induces apoptosis leading to fetal alcohol syndrome.

Publications/Presentations/Poster Sessions Presentations/Posters

Poster: Intervertebral Disc Disease Among Army Aviators and Air Crew, presented during the 2021 American Occupational Healthcare Conference.

Long, Theresa M., Sorensen, Christian, Victoria Zumberge. (2003, May). Sodium dependent transport of Chlorophenol red uptake by Malpighian tubules of acheta domesticus. Poster presented at: University of Texas at Houston; Austin, TX.

Volunteer Experience

08/ 2005 – 09/2005

University of Texas – Houston, Health Science Ctr, Texas

Medical Student -Provided medical aid and support for Acute Care and triage of Hurricane Katrina evacuees.

Work Experience

06/2021- Present

1st Aviation Brigade TOMS Surgeon

Serve as the Medical Advisor to the 1st Aviation Brigade Commander regarding health and fitness of over 3600 officers, warrant

officers and Soldiers. The Brigade is comprised of three aviation training battalions, responsible for initial entry rotary wing/ fixed wing flight training, advanced aircraft training. as well as Specific duties include ensuring safety of flight in Army Aviation operations by functioning as Flight Surgeon, while ensuring the health and fitness of military police, firefighters and military working dogs that support Ft. Rucker. Tasked with conducting epidemiological and biostatistical analysis of injuries and illnesses (SARs CoV-2) and medical trends that occur during training and identify and implement strategies to mitigate delays or lost training time.

05/2018-06/2021

Aerospace and Occupational Medicine Resident

Graduate Medical Education training in Aerospace and Occupational Medicine while obtaining a Master's in Public Health. Specialty training included the Flight surgeon course, The Instructor/Trainer course, Space Cadre Course, Medical Effects of Ionizing Radiation, Medical Management of Chemical and Biological Casualties course at USAMIIRD, Ft. Detrick, NASA, 7th Special Forces, Aviation Safety Officer Course, Global Medicine Symposium, OSHA, Dept of Transportation, Textron Bell Helicopters, Brigade Healthcare Course, Preventative Medicine Senior Leaders Course, Joint Enroute Critical Care Course, Army Aeromedical Activity, research on Intervertebral Disc Disease.

05/2015-05/2018

Department of Rehabilitation Services

General Medical Officer

Assigned to Carl R. Darnall Army Medical Center Physical Medicine clinic with special duties Function as General Medical Officer, to mitigate the number of high risk patients get referred off-post to Pain management and PM&R clinics. Functioned as the Performance Improvement officer for PM&R, the Chiropractic Clinic OIC, and the MEB/IDES Subject Matter Expert to IPMC multi-disciplinary team. Significantly increased access to care to the Physical Medicine clinic. Was instrumental in leading the hospital transition for the Chiropractic clinic, contributing to the subsequent successful Joint Commission inspection. Increased access to care in the Chiropractic clinic by 500%.

9/2013- 5/2015

Department of Pediatrics/ Department of Deployment & Operational Medicine

General Medical Officer

Assigned to the Carl R. Darnall Army Medical center Pediatric Clinic with special duties within the Department of Deployment & Operational Medicine. Provided acute and routine medical care for newborn to age 18 and collaborated with Lactation Team Leader to develop research matrix to ensure effective use of resources to meet Perinatal Core Measures PC-05 for Joint Commission Accreditation. Demonstrated initiative by providing emergency medical care to one of the victims of the April 2, 2014 FT Hood shooting.

10/2012-9/2013

Department of Deployment Medicine/ Emergency Medicine

General Medical Officer

Assigned to the Department of Deployment & Operational Medicine at Carl R Darnall Army Medical Center (CRDAMC) with specific duties directed by the CRDAMC DCCS. Supported soldier deployment/redeployment from combat, while also performing clinical rotations within the Emergency and Internal Medicine Departments to increase access to care for acutely ill patients. Improved productivity of the SMRC by conducting ETS, Chapter, Special Forces, Airborne, Ranger, SERE, and OCS/WOCS physicals. Ensured DODM success with 90% CRDAMC staff compliance of their annual PHA's. Selected to become an ACLS instructor.

06/2012-10/01/2012

Department of the Army Inspector General Agency

Disability Medicine Subject Matter Expert (SME) – Temporary Dept of the Army Inspector General

Assistant Inspector General on Medical Disability (Subject Matter Expert)

Selected above my peers, from across the Army AMEDD as one of three medical NARSUM Subject Matter Experts to function as a temporary assistant Inspector General, in a SECARMY directed inspection of the MEB/IDES system. Planned, coordinated, and conducted inspections of agencies/commands and to gather required data and perspectives relevant to the inspection topic. Developed inspection concepts, objectives, methodologies while coordinating inspection site requirements with major Army Commands ASCC, DRUs, Installations and Components. Identified trends, analyzed root causes to systemic problems and proposed solutions to the IG, Army Chief of Staff and Secretary of the Army for service-wide implementation.

06/2011-06/2012

Carl R. Darnall Army Medical Center

Integrated Disability Evaluation System

Increased patient access to care by conducting 203 acute care appointments in four months. Increased productivity by 25% by completing 202 NARSUMs, 12 TDRLs, 42 Psychiatric addendums in nine months with only a single case returned from the PEB. Performed duties of MEB chief and QA physician in their absence by performing QA on seven NARSUMS, and reviewing 13 cases for initial intake. Functioned as IDES Physician Training officer, applying PDA training to develop a comprehensive training program for new MEB/IDES NARSUM physicians.

11/2010-05/2011

Carl R. Darnall Army Medical Center, Hospital Operations, Clinical Plans and Medical Operations Officer

Served as Clinical Plans and Medical Operations Officer for Hospital Operation (HOD), responsible for the synchronization of external and internal MEDCEN operations supporting over 3,000 MEDCEN employee as well as the DoD's largest military installation and surrounding civilian population; assisted in development and execution of medical plans supporting Installation,

Garrison, MEDCEN and Civilian AT/FP and MASCAL events

06/2005 – 07/2005

United States Army, Texas, Officer Basic Course – Class 1st Sergeant

Supervised 306 medical, dental, and veterinarian HPSP scholarship recipients for Officer Basic training. 10/2002 – 08/2003

United States Army – Texas National Guard, Texas Flight Medic –EMT/BCLS Instructor Training

10/2001 – 10/2002

United States Army Reserve, Texas, Instructor/Trainer

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Dear Health Board,

I listened to your zoom meeting on September 28. I took four pages of notes. Please have the courtesy to hear me.

The one big thing I got from the meeting is that you want to “lead by example.” What does that mean? Does it mean going along with the political agenda of the governor and getting everyone vaccinated regardless of personal circumstances (one size fits all medicine) or stepping out of the box and actually doing something that benefits the community? Firing healthcare workers, firefighters, teachers, state workers, law enforcement is not solving the problem, it is only creating more problems. Leading by example is using common sense and logic not government control and forcing people to comply.

One size fits all does not work. Expecting businesses to demand vaccine passports is going to create more problems not only for the businesses but for the general public. I think one of you mentioned this. This does not make sense and is very unconstitutional. (no, that is not crazy) Not everyone can or should take this vaccine. (I think 95% compliance was mentioned.) We are not robots. We are individuals and our country was built on individual freedom not government control. Why are you forcing this vaccine on people? My doctor told me that the vaccine does not prevent covid, but it will help with hospitalizations. Forcing people to get this vaccine is political and not healthcare. (Who is making the most money from pushing this? Big Pharma. Who do they donate heavily to? The democrat party. Check those “stats”.)

Not once did I hear anyone talk about natural immunity or early treatment. There are treatments out there that work but are not being given in our state. The monoclonal antibody treatment is just newly available in Kitsap and I know that hydroxychloroquine is illegal to prescribe in WA state except for limited uses. There are other natural treatments available also. Other states have been using treatment in the early stages of Covid and are having great result keeping people out of the hospital. Why are we not doing that here? That is political not healthcare.

I know for a fact that your stats are not accurate. I know someone who is vaccinated who tested positive x2. (no symptoms) Those positive results will be thrown into the pot for bigger numbers. Since he has tested positive, and is vaccinated, the health department says he can go where he needs to go, but his doctor appointments have been canceled because he had a positive test. What is he supposed to do? I am sure this is not an isolated incident. Vaccinated people are testing positive and/or are getting and spreading the virus. This is a fact. Ignoring this is political not healthcare.

I am a covid survivor. When I came down with symptoms, Thursday, I called my clinic and got tested. The NEXT DAY, Friday, I was called with a positive result. (I know people who waited 4 days for their test results.) Not once did they offer treatment. Go home and monitor yourself. I am a senior and have COPD. It was the long weekend. My Dr. called

me on Tuesday and told me about the Monoclonal antibody treatment and I received treatment on Wednesday. This treatment should be given 24-48 hours from the onset of symptoms. Now I cannot have a vaccine for 90 days. If you demand passports, I will not be able to do things for myself, like grocery shop or anything else I would do. This is political, not healthcare. I now have natural antibodies. See paragraph above.

Why are the ER's and hospitals overwhelmed? Are they overwhelmed because they are short staffed because they haven't hired enough personnel to meet the need? Are they overwhelmed because there is that much sickness and if so why haven't they hired more personnel to meet the need? Are they overwhelmed because they have closed off wards? Are they overwhelmed because people without insurance are using the ER for general practice medicine? What is the real cause of this "overwhelmed?" Are they overwhelmed because workers are getting sick or burned out and if that is the case why are they firing personnel because they don't want to take the vaccine? These healthcare workers have worked through this "pandemic" and now their jobs are being threatened. Last year they were heroes and now they are villains! Where is the logic in that? This is political not healthcare. What is the real problem, not the politically correct problem? Seems like you are creating a shortage when there doesn't need to be one. WHY? Why are ambulance wait times so long? Are all the people arriving by ambulance Covid patients. I know they aren't. So what is the problem? The ER is overwhelmed? Why? See above.

You stated that many of the people who died "from covid" were in Hospice or in nursing homes. Well they were going to die anyway. Their deaths are being counted as "covid" when, in fact, they were dying of something else. How many people are actually dying from covid pneumonia? How many people are having serious reactions to the vaccine or have died from the vaccine? This is a "stat" that is not even brought into play. Your stats are political, not healthcare.

I am not going to even address the fear factor and the psychological affect this has had on individuals and families as well as our society and culture. Irrational fear is splitting families and pitting one group against another creating serious division, hatred and insecurity.

So your "lead my example" philosophy leans toward political correctness not healthcare. You talk about "educating" people. I think people can educate themselves. There is plenty of information pro and con. When you talk about educating people you are speaking of making sure they agree with you. That is not a free society. That is not education, that is indoctrination (not crazy). Your Zoom meeting created more questions than answers for me and others. What I saw and heard was people who are unsure how to deal with the "health crisis", who want to be politically correct, and don't really care about healthcare. You pick and choose your "experts" who fit your agenda. I appreciate those on the board who stood up for common sense and open businesses. Stop firing healthcare workers. You are creating a crisis. Stop demanding people comply when maybe their healthcare needs don't fit the narrative. Maybe there are other solutions than just getting everyone vaccinated and demanding passports.

Being open minded to "out of the box" solutions is what is needed here. Being closed minded and only going with the narrative is political not healthcare. Big government and forced compliance is something that we saw in Germany in the 1930's and 1940's. I believe we fought a war about that and freedom won. We are Americans first. We value innovation, freedom, liberty. Not forced compliance and government control. This is about a serious virus, true, but it is also deeper than that. It is interfering with our belief system, our values and our constitution. This is not a one size fits all problem. Please think outside the box and lead by example in coming up with solutions that actually work and don't create more problems even if that means stepping away from the politically correct way. Thank you for listening to me.

Subject: Oct 5th meeting re Mandates

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

As a private citizen and a small business owner I can assure you that any mandate requiring proof of vaccination to enter a business will be the final nail in the coffin of many of Kitsap's small businesses. We struggle, we scrimp, we try our best to keep the doors open on a daily basis. A mandate like this will be the end of us. Early on we sat with closed doors and watched the giants like Home Depot, Lowes, & Walmart filled with customers. We tried to keep our people on the payroll, cutting our own pay. We struggled to reduce overhead and just hang on. We saw our sales channeled to Amazon and online giants because we couldn't open our doors. The struggle continues as we try to keep our shelves stocked with goods and now ... once again we see that we're expendable. If Kitsap Co passes a mandate requiring proof of vaccine I'll be forced to close my doors. 27 years in business, paying my taxes, employing Kitsap residents, serving the needs of the community. Gone.

I implore you..... do not go this route. Vaccines don't stop the spread anyway. You'd be killing us for show, not for any logical reason.

Attention Mr Grellner

It is important that we continue to protect those most vulnerable. In this case those that cannot be vaccinated.

People who have been vaccinated are still getting Covid and being hospitalized so it is not the only solution. Do we really want to put more obstacles in their already difficult path by preventing them from entering stores for necessities like food and clothes?!

We are wearing Masks and Sanitizing, Social Distancing and doing the best we can to protect others. This mandate goes too far!

Instead of denying our freedom as US citizens, you should investigate the country of India and its ivermectin trials and then issue self help kits to us. A lot cheaper than hospitalization and remdesivir treatment.

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

On the Kitsap Public Health District website, I am grateful to see that this entity's mission is to "prevent disease and protect and promote the health of all persons in Kitsap County." In addition to this, a guiding principle is that "we make data-driven decisions, and use and develop science-based practices to produce the best possible outcomes."

Science has produced data showing that vaccines for Covid do not prevent either infection or transmission of the disease. Even in settings where everyone is vaccinated, new infections have occurred. And in populations with high rates of vaccination, such as Israel, Covid cases have skyrocketed. Data also show that these vaccines have produced hundreds of thousands of adverse reactions.

Science has also shown that effective means of preventing and treating Covid exist using Ivermectin or Hydroxychloroquine. Many studies exist. I have seen them. However, the government and pharmaceutical industry have quite effectively squelched these safe means of dealing with the disease.

Since you hold the position of Health District Administrator and make data-driven decisions to prevent disease and promote health, I know I can count on you to make sure no vaccine mandate of any sort exists in Kitsap County. An unvaccinated person has just as high a chance of contracting Covid through a vaccinated person as a vaccinated person has through an unvaccinated person, so mandates make no sense and certainly do nothing to produce the best possible outcome.

Thank you for supporting our Constitutional liberty to make our own health decisions.

Keith - There is no shortage of anti-vaccination videos that explain the negative effects of the Covid vaccines. Provided below are just two videos from front-line nurses who personally witness what these vaccines do to the body. I encourage you to share these videos with the Covid panel members so they can see both sides of the issue before making a decision that affects all Kitsap County residents. Carefully consider what you yourself are injecting in your own body. With every shot, you decrease your chances of seeing a retirement and enjoying your grandkids.

Subject: KITSAP COUNTY HEALTH DEPARTMENT MANDATED COVID VACCINE PROPOSAL

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Keith - I watched the podcast yesterday and noticed all the panelists agreed that vaccinations are required to stem the number of Covid infections. Only two participants questioned the need for a mandate to have the unvaccinated vaccinated to patronize Kitsap businesses. Two issues concern me. The first, which I mentioned in a previous email is that any mandate should not include grocery stores, gas stations, medical and dental offices. To include those businesses is to issue a death sentence to the unvaccinated. The second issue concerns the lack of a front-line nurse on the panel. Nationwide, there are thousands of nurses who witness the negative effects of the vaccine and know first-hand the majority of Covid cases involve vaccinated patients rather than the unvaccinated. Those nurses are so concerned that they are willingly choosing to give up their jobs to save the lives of strangers. Who would perform such a Christian-like act except for a martyr? I recommend and ask you to solicit the panel chairperson to include at least one nurse (preferable two) who oppose the Covid vaccines so that their voices can be heard, and a more balanced panel can objectively consider both sides of the discussion before a decision affecting all county residents is made. Thank you for your consideration. Dave

Subject: Kitsap County Health Board - Recommendation

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Kitsap County and City Officials,

Regarding the discussion on Health Board vaccination requirements recommendations for Kitsap County, my family's opinion is as follows:

- Vaccinations are readily available to any who choose to get them. Whether because of natural immunity through previous exposure to the virus or by personal choice not to receive the vaccines, there should be NO government mandated vaccinations.
- Small businesses have been crushed by executive fiat for long enough. There should be no requirements for businesses to require vaccines for their employees nor requirements for proof of vaccines for their customers.
- Vaccine passports for businesses or public areas creates and imposes a medical apartheid on the citizens of Kitsap County that is a violation of the constitution and basic human societal rights.
- Vaccine requirements are government over-reach especially for a vaccine that was rushed into production before adequate time has been available to study and evaluate any possible long term effects. There is an alarmingly high incidence of reported serious reactions to the vaccines.
- COVID 19, although sometimes serious to those with comorbidities and the elderly is now readily treatable with therapeutics and has a 98.2% percent national survival rate (according to AP); and almost never requires hospitalization for healthy young people and children.
- We further urge the elimination of mask mandates for employees as well as the general public in businesses and all public areas both indoor and outdoor.
- Numerous studies reveal that mask mandates do not help slow the spread of COVID-19 and have other risks and consequences both physical and social. Masks have become a political tool as shown by the number of states that do not require them and the resulting non-proliferation of the virus.

Summary: We are not opposed to vaccinations and feel mask wearing is a personal choice. As Americans, we must accept that there is some risk to living in a free society and living in general. We cannot continue to allow the enormous damage and disruptions that shutdowns/mandates have caused to society. We must get on with the business of living.

Thank you,
D. Vogel

Dear Keith Grellner

I hope Health Board Admin, I hope you hear my voice as I oppose the "proof-of-vaccine" requirement to access businesses in Kitsap County, or any county for that matter.

As a Teacher I worked remotely during the "pandemic" in March 2020 at a very busy grocery store, Safeway. My mother, 55, ran and operated the store and both her and I never contracted Covid. We eat healthy and maintain healthy lifestyles and believe in divine power to allow natural healing of our immune system.

My father, 55, worked at a Safeway during the entire "pandemic", and has never contracted covid.

My husband developed asthma in March 2020 yet still worked at the same grocery store stocking shelves without protection, without masks, and with minimal hand washing, just lots of water and healthy eating.

He is now an EMT serving King County working 96 hours a week some weeks. He has never contracted covid.

During the start of the pandemic it was rare that he saw a covid patient. **Now, the only covid patients he sees are ones who are having adverse reactions to the Vaccine.**

My friend, Army Ranger, was forced to get the vaccine and now has a fluttering heart, chest pain, and nerve damage.

I urge you to look at the studies done by other doctors and professionals other than the CDC, Fauci, and the health department as they are seeming to be false prophets in the eyes of the people.

I am now back to work at public school. All I see are troubled minds, yet I refuse to be troubled.

I have been in the heart of the "*pandemic*" since serving my time at my local Safeway keeping shelves stocked.

I can speak for my entire family when we say that we will not be getting the Vaccine due to our extremely healthy conditions.

I absolutely oppose and want to know any way I can hear more about people who are like minded like myself because I know there are a lot of us.

Thanks,
Kaytlynn Stevenson

Subject: READ THE DATA, CDC STUDY

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Please review this CDC study of an outbreak in Barnstable Massachusetts, July 2021 that shows that vaccinated people are just as likely to transmit the virus to others and be hospitalized!

-In this study of an outbreak of 469 people, 74% of the positive cases were FULLY VACCINATED!

-Five people were hospitalized for Covid, four of them were FULLY VACCINATED!

-Vaccinated and unvaccinated people were found to have similar viral loads in their nose and throat, meaning that they are EQUALLY LIKELY TO TRANSMIT THE VIRUS to others.

<https://www.cdc.gov/mmwr/volumes/70/wr/mm7031e2.htm>

While there may be some "crazy" ideas on the internet, there is also a tremendous amount of legitimate information showing that the vaccinated can also spread the virus. There is no justification for segregating the population, ever. Please respect your constituents.

Please respond. Thank you.

I am urging you to consider rational thought around demanding people to show vaccination proof or negative test results to enter your buildings.

First, it violates HIPAA. straight up. Our medical conditions are private info, protected by law... now under assault by ideas like this. What are laws if they mean nothing?

Secondly, since you take these rights away from the people in the building working, they will be vaccinated AND wearing masks. If you believe in either, then the employees are fine.. right? No need to take others rights away as well.

Lastly, this only further divides your community. The shaming, the tattling, the finger pointing.... That you would enable.

Citizens can take care of themselves, and so can your buildings' employees. You do you, and you are protected... right? So leave the public alone.

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Dear Keith,

I am writing as a tax-paying Kitsap County resident of 28 years, to implore you to uphold the law and your constituents' freedom in meetings regarding vaccine mandates, including the October 5th meeting. To mandate vaccinations in order to gain/hold employment, and buy/sell in non-essential businesses or otherwise, would be in violation of the Constitution of WA State, the Constitution of the United States, the Rule of Law, and the Nuremberg Code.

I, along with many concerned citizens in our county, are asking you to oppose the Kitsap County Health Department from imposing vaccine mandates on any business in Kitsap County. The health of our local economy is paramount, and to impose a proof of vaccine upon non-essential (aka small businesses) would be the death of our economy. Many small business owners have told me that financially they cannot withstand another discrimination (lockdown, proof of vaccine, etc) that gives large box stores and online mega-businesses the advantage.

Requiring proof of vaccination is in violation of constitutional rights of privacy of medical and personal beliefs. It will create an even deeper segregation and disharmony in our fragile communities that are already suffering from division. As the statistics show, the mental health of our youth has suffered tremendously during this pandemic, and creating more hate and division through passport mandates will incur tragic consequences. Your constituents hold you accountable to promote peace and unity, rather than division and isolation.

Under WA law RCW.49.60.030, citizens have the right to be free from discrimination because of race, creed, color, national origin, citizenship or immigration status, sex, honorably discharged veteran or military status, sexual orientation, or the presence of any sensory, mental, or physical disability, etc in areas including but not limited to employment and commerce. There are many who are not COVID-vaccinated due to a physical or religious reason, and to discriminate against these people would be in violation of WA State law. The United States of America is famous for the freedoms offered to every person, and for the future of our children we must fight to maintain these freedoms regardless of our own personal convictions.

For the sake of our economy, community, and democracy for future generations, it is critical that law is upheld, tyranny does not rule, and freedom to conduct our lives without discrimination prevails.

Thank you and may God give you wisdom and strength to uphold the law.

Nancy Baker

Subject: Oppose Medical Apartheid and Segregation

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

I am writing today out of concern that you are considering imposing proof-of-vaccination requirements to access local businesses. Such punitive and tyrannical measures would not only be ineffective in increasing vaccination rates, they would in fact result in medical apartheid and segregation, depress our local economy and hamper businesses that are already struggling, and most importantly, further divide and inflame our community.

Coercive mandates are contrary to science. Empirical evidence now shows that the vaccines are leaky and the vaccinated are just as prone not only to contract the Delta variant but to spread it. There is also increasing evidence, as predicted by eminent scientists, that mass vaccination of people who do not need protection is driving variant production and dangerous antibody dependent enhancement (ADE). Moreover, many have already been exposed to SARS-CoV-2 and have robust natural immunity. It is particularly dangerous for them, as for the young, to take these injections.

Such heavy handed coercion is unethical and is a violation of civil rights, the Nuremberg Code, medical privacy, discrimination against religious conviction, is interference in private business practices, and is wholly Un-American. I strongly encourage you to consider the consequences of such discriminatory policy and reject imposing such inflammatory and divisive policy by bureaucratic fiat.

Sincerely,
Tasha Seren

I am writing to oppose allowing Kitsap County Health Department to impose vaccine mandates on any business in Kitsap County.

My family has had very serious health issues for over 6 years, and through it all I have become a medical researcher, of sorts. Because of my dedication to uncovering the truth, finding root causes to our health issues, and unwavering research, we are on the mend. Due to my background, I have thoroughly researched the available Covid shots and have grave concerns about my family getting them. What others do not seem to understand is that people who are questioning these shots may not be “anti-vaxxers”, they just have grave concerns about the efficacy and safety of these shots. There are plenty of other people who are gravely concerned as well; leading doctors, PhD’s, scientists, even the PhD who invented mRNA technology, but their voices are being silenced. Since this “pandemic” began, the citizens of the U.S. have had our free speech violated in volumes, seen our freedoms of choice being taken away daily, and it has gotten to the point that we are no longer allowed to have freedom over our own medical interventions. We are not a selfish people by nature, but we loudly question a vaccine with thousands of VAERS reported deaths, permanent disabilities, and side effects. We question why such an “effective” shot should be shoved down our throats, why we are being offered donuts, money, lottery winnings to get a vaccine?! That is just crazy. The local news media does NOT cover any questions that concerned citizens have regarding these shots. They do not cover any DISSENTING viewpoints, even though they may come from reputable doctors, nurses, PhD’s, or scientists. They do not report the unbiased story to the public and allow us to make up our own minds. They shove a one-sided narrative down our throats and expect us to follow mandates constantly enacted by an out-of-control Governor and a legislature who either blocks attempts to stop him, or is completely ignored by him. I am asking you to read through my research and then ask yourself why this is not being discussed nor presented to the public.

The inventor of mRNA Vaccine Technology, Dr. Robert Malone, MD, MS, Physician Scientist, states in a one-hour interview with Dr. Bret Weinstein and Steve Kirsch,¹ that the current injections for COVID-19 are gene therapy. They are not the standard vaccines we are all used to; that contain either “dead” or “live” virus. He also states that, though he IS a vaccinologist, he has some grave concerns over these injections: A [biodistribution study](#) by Dr. Bryan Bridle indicates that nanoparticles from the vaccine did not stay in the deltoid muscle where they were injected as the vaccine’s developers claimed would happen, but circulated throughout the body and accumulated in large concentrations in organs and tissues, including the spleen, bone marrow, liver, adrenal glands and — in “quite high concentrations” — in the ovaries.² he expresses concern over proper animal studies, and the [theory](#), by Geert Vanden Bosschek Ph.D, that mass vaccination with these shots could produce ever more transmissible and potentially deadly variants.³ According to Dr. Malone,

even if we had complete uptake in vaccines and complete masking, CDC data makes it clear that at best we can slow the spread of Delta but we can't stop it. Malone, who believes death and disability still warrant vaccinations in high-risk populations, subscribes to Vanden Bossche's theory that continued mass vaccination campaigns will enable new, more infectious viral variants.¹

Dr. Peter McCullough, a board certified doctor in internal medicine, cardiovascular diseases and clinical lipidology, testified before the Senate, and in a recent podcast, stated: "There are clearly sources of information to suggest that once we start vaccination and we get more than 25% of the population vaccinated, we will allow one of the variants that's in the background to emerge because it's resistant to the vaccine..... Just like an antibiotic, once we get to a certain percentage of coverage with an antibiotic, we'll allow a resistant bacteria to move forward." McCullough explained: "If we were to go back in time six months ago, we had about 14 strains or more in the United States — all relatively small proportions. We had UK, Brazilian and there was always some Delta, by the way — it was always in the background. And there was a paper by Niessen and colleagues from Boston and Rochester Minnesota, a great paper — over a million sequenced samples. They looked at vaccination rates all over, and the variant proportions, and they concluded that with more than 25% of the population vaccinated, you'll encourage a dominant strain to move forward....We've in a sense created now a super-dominant strain, we've encouraged a super-dominant strain," though McCullough noted science showed the Delta variant is milder."⁴

As I recall, the public was constantly fed the rationale that this pandemic would end and "life would get back to normal" after a vaccine. However, two new studies from the Centers for Disease Control and Prevention show fully vaccinated Americans' immunity to Covid-19 is waning as the more-transmissible Delta variant continues to spread across the country.⁵ On top of this news, a groundbreaking [preprint paper](#) by Oxford University Clinical Research published in the Lancet on August 10th, shows alarming findings....vaccinated individuals carry 251 times the load of COVID-19 viruses in their nostrils compared to the unvaccinated.⁶

All the above is showing that the transmission of COVID-19 is actually worsened by mass vaccination, which is basically what Governor Inslee is forcing upon Washingtonians.

Another point of grave concern should be the number of breakthrough cases and the number of disabling side effects or deaths following COVID-19 shots. Side effects, disabilities, and deaths following COVID-19 "vaccinations" have pretty much all but been ignored, or downplayed. Last I looked, deaths following COVID-19 vaccination were over 13,000. Historically, events reported to VAERS system constitute approximately 10% of cases, though I have heard the percentage to be as low as [1% of cases](#).⁷ Do the math...this is very alarming! Compare that to the 1976 swine flu, where after approximately 50 deaths following vaccination, that campaign was immediately aborted.⁸

As of June 11, 2021, the U.S. Vaccine Adverse Events Reporting System (VAERS) had posted 358,379 adverse events, including 5,993 deaths and 29,871 serious injuries. In the 12- to 17-year-old age group, there were 271 serious injuries and seven deaths. Among pregnant women, there were 2,136 adverse events, including 707 miscarriages or premature births.

Be that as it may, the reported rate of death from COVID-19 shots now exceeds the reported death rate of more than 70 vaccines combined over the past 30 years, and it's about 500 times deadlier than the seasonal flu vaccine, which historically has been the most hazardous.⁹

In Washington State, from January 17 – July 31, 2021 there were 5879 reports of possible COVID-19 cases that met the breakthrough case criteria.¹⁰

And now we are dealing with the approval of the Pfizer “vaccine”, which, Dr. Malone [notes with considerable incredulity](#) ¹¹: The FDA bypassed/disregarded the normal advisory committee and public comment process for this license. See p2 “We did not refer your application to the Vaccines and Related Biological Products Advisory Committee because our review of information submitted in your BLA, including the clinical study design and trial results, *did not raise concerns or controversial issues that would have benefited from an advisory committee discussion.*” ¹²

One of the main PCR tests that has been in use to VERIFY COVID NUMBERS has been recalled by the FDA. Yet it was distributed from November 2nd to March 22, 2021:

SARS-CoV-2 Antigen Rapid Qualitative Test (also distributed under the names Innova COVID-19 Self-Test Kit (3T Configuration), Innova SARS-CoV-2-Antigen Rapid Qualitative Test (7T Configuration), and Innova SARS-CoV-2-Antigen Rapid Qualitative Test (25T Configuration))

Lot codes:

25T (25 tests per box) - U2101750, U2101751, X2006004, X2008001, X2008010, X2009002, X2009004, X2009013, X2009016, X2010004, X2010010, X2011005, X2011006, X2011007, X2011008, X2011009, X2011012, X2011013, X2011015, X2011016, X2011017, X2011025, X2011051, X2011052, X2012001, X2012002, X2012004, X2012005, X2012008, X2101002, X2101004, X2101014, X2101031, X2101038

3T (3 tests per box) - U2102003, X2012310

7T (7 tests per box) - U2101748, U2102001, U2102002, X2012711, X2103792

Manufacturing Dates: September 1, 2020 to March 3, 2021

Distribution Dates: November 2, 2020 to March 22, 2021

Devices Recalled in the U.S.: At least 77,339

Date Initiated by Firm: March 24, 2021¹³

So, how many inaccurate COVID numbers did we get from this test over the five months it was used?

Even more shocking is that since March or April of *last year*, 2020, “doctors began communicating — with cautious optimism — their experiences using interventions with years or decades of safe use behind them, including the promising repurposing of well-known drugs (for example, hydroxychloroquine, the inhaled steroid budesonide and ivermectin) as well as positive results from judicious use of supplements and therapies such as vitamin C, vitamin D, vitamin B1 (thiamine), zinc, iodine and nebulized hydrogen peroxide. They also noted that some of these interventions functioned equally well as prophylaxis.

For example, a new review of randomized controlled trial evidence for ivermectin and COVID-19, published by Kory and co-authors in the American Journal of Therapeutics, points to “large, statistically significant reductions” in deaths as well as improvements in clinical recovery. The results, say these authors, clearly indicate that “an oral agent effective in all phases of COVID-19 has been identified.”

According to Kory, government agencies that refuse to recommend ivermectin as a treatment option “are not keeping up with the data,” which “have done nothing but deepen and become more consistent.” ^{14,15}

So, in conclusion, I have come to realize that I need to stand up and fight for my freedoms on a local level. Because you are all elected officials, you also need to stand up and be the voice of the people in a big way. Maybe you already have, and could update me on your progress. I am very concerned about the children in our valley, about our Governor’s continuous mandates and tyranny, and would like to see something done immediately.

To whom it May Concern:

First of I want to thank the people who have stepped up to be leaders of this community. It is a hard job and I respect your efforts. I do not envy the hard decisions you have had to make and continue to. Thank you for your service! Unfortunately, on such a controversial subject, I am also writing to share my opinion and ask a few specific questions.

For what it is worth I think vaccination passes for covid 19 should be illegal and considering this as a possibility to bully the population into getting vaccines is wrong. Yes it is your job to protect your population. It is not in your rights however to take away the rights of our citizens.

After the BLM movement how can such blatant discrimination be considered? And after all the progress that was made with HIPPA laws how can medical privacy be denied? I know people are scared. I know you have a job to do. However these things should not allow our leaders to disregard our freedoms. Especially our freedom of choice to our bodies. Just because in WA a good percentage of people embrace the herd mentality does not mean the people who embrace my body my choice are wrong or even ignorant. You have a very difficult problem to solve. Please consider doing it ethically and not as tyrants or dictators.

My one voice votes no for vaccination passes. Questions:
1. Do I even get a vote in this matter?

2. Will there be any numbers or science to back 3. up how vaccination passes will lessen covid cases? Proper social distancing is observed in restaurants and grocery stores.
4. I am unclear to the logic of Vac passes. I can only see it as a means to coerce a population to do what the government wants.
5. Do you all really read these emails?
6. When will a decision be made on this matter?

To be clear I am not anti-vax at all. I am anti vax Pass.

Thank you for your time,

Please, please consider an alternative...a compromise at least...

Subject: Proof-of-vaccine

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Keith Grellner,
Kitsap Public Health Dept.

There are several reasons to take a second look at your requirement to mandate shots & require a proof-of-vaccine document in your county.

First, there are still many questions regarding the vaccine & now there is proof of the many side effects & even deaths related to them. Please do further checking before making your decision to mandate the vaccine & show proof-of-vaccine. Be well informed and examine various sources before making such a drastic regulation that is a life changer to many individuals, families, community; therefore affecting our State. Here are a few well-known experts in their fields to investigate: Dr. Peter McCullough, Dr. Sherri Tenpenny, Dr. Simone Gold. Please, be informed!

Second, your vaccine mandate imposed on business stands against our state as well as federal constitution. Individual rights of freedom are being violated. You are restricting business locally, interstate, as well as intrastate. It affects revenues generated from the city level to the State level.

Sincerely,

Kathy Watson
440 Leudinghaus Rd.

Subject: Re: Upcoming meeting on covid

[CAUTION]: This email originated from outside Kitsap Public Health District. Do not click links or open attachments unless you are expecting this email. If you are unsure please contact IT.

Thank you Keith,

It seems obvious what the path forward should be to me, based on what I was able to catch of this meeting:

Prepare. That's got to be the goal!

Forget about putting efforts into mandates that may, or may not help with either covid spread or vaccination and hospitalization rates. Let's instead focus resources on facilitating quality care no matter what may come. Let's actually encourage public healthfulness! Creativity is necessary.

We're in a pandemic. No amount of coercion or fact sheets on disinformation is going to change that- the views and opinions are entrenched. The distrust has been made solid. The vaccine is already being thoroughly promoted in every way, spending resources in that is redundant.

So what will do the most good should be at the forefront!

I would like to suggest some ideas for the focus of our finite resources:

~The public should be made better aware of early outpatient treatment options (shame and division of being "the unvaccinated" may be keeping people from seeking treatments that could keep them from needing to be hospitalized)

~Public should be made aware of best practices for managing covid at home, perhaps even with home health-kits available at city halls and other sites.

~Treat the public as capable and intelligent. Training could be provided on oximeters, and even home oxygen if appropriate. (I know many health workers who've administered oxygen in their own homes.) Teach when coming to a hospital is truly necessary. Spreading fear and anxiety means that people will go to hospitals out of fear rather than need.

~Do not fire good people who are willing to work based on vaccination status, when we know anyone can spread the virus (again this is deepening distrust, fomenting division, and increasing pressure on already understaffed teams)

~ Get set up for higher patient capacities, higher need of ems, higher need of substitute teachers and bus drivers , etc that keep us moving forward. Let's get people involved!

We have good, capable people in this country ready for real action! Let's capitalize on that. We have formats to glean from like volunteer fire and police.

All my best to you as you tackle this complex issue.

Thanks,

Olivia

don't fire your unvaccinated staff and increase the staffing issues we face! Set up and ADVERTISE early treatment centers/ tents. Get people help before their cases worsen to needing hospitalization. Even offering home oxygen if needed as I've seen some of my friends in healthcare take advantage of! People can do this stuff at home given instructions and relieve the hospitals of the less serious cases. Stop treating the community like they are stupid, or even like coercive measures will work!

> Continuing to blame the unvaccinated when the vaccinated spread the virus too is simply another avenue to sow distrust in the public.

> I believe that encouraging vaccination for restaurants only unnecessarily damages further the incomes of our small businesses and puts further burden on them to police these issues- another injustice as big chains will not face these restrictions, and low income earners and spenders are put disproportionately "protected".

> Implementing antibody testing as Israel does (they give green passes to recovered individuals) as an alternative could potentially regain some lost public trust as many see the absence of the consideration of naturally acquired immunity as a huge oversight and injustice on those who've already fought to gain antibodies the hard way.

>

> These over reaching, unscientific mandates are furthering the distrust of some people who truly should be taking the vaccine.

>

> Thanks,

>

Mr. Grellner -

Writing in opposition to the expansion of vaccination status restrictions in Kitsap County.

Additionally, the lack of transparency on behalf of KPH regarding open public discussion as well as the topic for the aligned meeting gives the appearance that KPH is only concerned with implementing policy without true citizen input or consent.

Our small businesses have suffered enough as have the employees and patrons. People should have the right to determine their own best course of healthcare without overreaching government mandates.

It would be far better for the health of the county as a whole if KPH focused on wellness education. It is evident that people who have paid close attention to health issues over time have fended much more successfully than those with co-morbidity issues that are in their control to address (which of course not all are).

Thank you,

Ray Schloss

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

I am fundamentally opposed to vaccine mandates. Regardless of your trust in them. This is not a country that demands any percentage of our population inject themselves with something foreign in order to participate in society. Our freewill was bestowed upon us by our Lord God. You don't have to believe that personally but you need to understand that plenty of people do. You will not change those people. You need to acknowledge the Constitution and these mandates do not enforce the Constitution. Besides that, you need to recognize the autonomous rights of other human beings. I for one will never discriminate against my fellow man based on their color, creed, sexual orientation, medical status or any other difference between us. If you do, then you stand with everything UnAmerican and you have no moral ground to stand on. The public will remember who stood for the people and who stood for the "system".

And on a final note, brown and black people tend to be the largest population who are hesitant to vaccinate. So by segregating and discriminating against the unvaccinated, you are making a racist action against your brothers and sisters of color. This will not be tolerated by decent society.

I stand with the many others who oppose any vaccine mandate for employers, business owners or any other entity. No one should have to choose between an injection and living life free. Not in this country. God bless America us

Dear Kitsap County Officials,

I have had the pleasure of working with several of you professionally and have the most respect for each of you and your positions you each hold. Today I email you as a concerned Kitsap County Resident for myself and for those who do not feel comfortable speaking up to be heard.

There is a vote to be made if not today, then in the very near future. A very important vote that will dictate the future of every woman, man, and child of Kitsap County. My family, my children, friends, and colleagues and each of yours.

I am not a woman who is against vaccinations however I am against being forced against my will, along with many others in the fine County most of us call home. Kitsap County deserves freedom and the right of personal choice.

COVID happens regardless of vaccination status. For those who have already contracted the virus, they have antibodies to heal from it, so why force them a vaccination their healthy body does not need? A vaccination that has so many side effects.. have any of you visited the website that tracks registered reactions to the Vaccination? No, please, take a peek for yourself. The link is listed below for your viewing, if you choose.

<https://openvaers.com/covid-data>

Terrifying, isn't it? Terrifying if you have the vaccination and if not - for all of us on all sides!

Please do not choose to force us. Please TAKE NO ACTION AND ALLOW THE CURRENT SITUATION PLAY OUT.

If you choose to make vaccinations mandatory for all employees, all students, all business, stripping all from their right of freedom, then what..what will happen to the workforce? The Schools, small businesses? What will happen to Kitsap County? How many children will get kicked out of school? What will housing look like? How many of your staff who respect you and your positions will be forced at your hand to make a choice they might not feel comfortable with or goes against their personal or religious choice? How many of them will loose their jobs and all they have worked towards in life to protect their personal choice?

With all due respect, please consider my plea when considering your vote.

Concerned Kitsap County Resident,
Tara Owensby

Subject: No VaX Mandate

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

To whom it may concern,

I strongly believe that government has no right nor reason to mandate vaccines in Kitsap County. Based on the "Science", this barely qualifies as an emergency. In terms of public safety, since the vax does not prevent the illness or the spread of the illness, they can't claim they are doing it stop the spread. Almost all people will recover from this, if they even get sick in the first place. However, I personally know 3 people in Kitsap county who have recieved the vaccine and had problems. One was hospitalized with cardiac problems. One developed asthma. One had severe optical degradation, he can only see blurry shapes after recieving the shots. If someone wants to get weigh the pros and cons of the vaccine, that is up to them to decide what risks they are willing accept. But the government has no right to make that decision for them. Not to mention it will create either shadow, unregulated economies, and/or crime will dramatically increase, especially after they nuetered the police. - Josh

To all concerned:

Any mandate to require proof of vaccination is a direct violation of my constitutional rights as described in section one of the 14th amendment and the bill of rights. Any action on your behalf that violates these core tenants will NOT be obeyed and all parties involved in these violations will be held liable in a court of law.

Excerpts for your reference:

“No State shall make or enforce any law which shall abridge the privileges or immunities of citizens of the United States.”

“nor shall any State deprive any person of life, liberty or property, without due process of law,”

This clause guarantees a wide array of rights against infringement by the states, including those enumerated in the Bill of Rights (freedom of speech, free exercise of religion, right to bear arms, etc.) as well as the right to privacy and other fundamental rights not mentioned elsewhere in the Constitution.

Finally, the

“equal protection clause” (“nor deny to any person within its jurisdiction the equal protection of the laws”

You have been notified.

Statement of Informed Consent and Medical Sovereignty

September 28, 2021

To: Gib Morrow Health Officer, Kirsten Hytopoulos Deputy Mayor At Large Bainbridge Island, Becky Erickson Mayor of Poulsbo, Charlotte Garrido Kitsap County Commissioner District 2, Robert Gelder Kitsap County Commissioner District 1, Greg Wheeler Mayor of Bremerton, Rob Putaansuu Mayor of Port Orchard, Ed Wolfe Kitsap County Commissioner District 3, Keith Grellner RS Administrator

From: Meghan Carpenito

Re: Statement Regarding Informed Consent and Medical Sovereignty

1. Meghan Carpenito is against medical experimentation without verifiable and full informed consent on all potential side effects of said treatment with an unconditional free will choice to refuse the medical experiment on untested or unsafe medical interventions, such as a faulty use of a PCR test or government illegal mandates regarding the COVID-19 experimental vaccine.
2. I assert that no government individual, agency or other corporate representatives have been granted authority over the "PEOPLE'S" private health decisions and we maintain our sovereign control over our bodies in unconditional terms, regardless of a so called "State of Emergency".
3. I assert it is against State, Federal and International Laws that exist regardless of a declared State of Emergency (particularly, unlawfully prolonged ones), to mandate the FDA's (Food and Drug Administration) EUA (Emergency Use Authorization) for COVID-19 "vaccines" or any product or procedures, whether EUA or not, without full informed consent of all ingredients and potential side effects; and to institute illegal mandates such as vaccine passports for access to schools, workplaces, restaurants, etc., is completely unconstitutional and scientifically unsound.
4. I assert that to allow and worse, to facilitate the coercing, shaming, bribing or otherwise forcing citizens into being a test subject in any experiment without full informed consent in order to keep their employment, attend schools, or participate within their communities, is to participate in crimes against humanity.

5. I assert that until such time as the United States of America and its Constitution and the Bill of Rights are dissolved, all citizens as “We the People,” citizens, are protected by that Constitution and Bill of Rights along with the Federal and State Health statutes that are codified in the Nuremberg Code. Violations of the Nuremberg code and Bill of Rights is against all the “We the People’s” inherent and Constitutional Rights.
6. I assert that none of the 10 codes of Medical Ethics in the Nuremberg document are being honored in these experimental COVID-19 vaccines...None. And without full disclosure as to the ingredients of these gene therapies (i.e., mRNA vaccines), and due to secret proprietary ingredients maintained by the pharmaceutical corporations in question, the basic requirement of informed consent is not possible. See the following link: <http://www.cirp.org/library/ethics/nuremberg>
7. I assert that “We the People” have the right by law to refuse any products including all EUA drugs technologies, vaccines, EUA tests, masks or medical procedures, EUA investigational products, population genomics programs, EUA healthcare data tracking and surveillance platforms. A lawful application of the terms of a lawful Emergency Use Authorization includes the right to informed consent and the option to refuse. The FDA can only issue an EUA if there are no other cures, treatments or prophylactics available. The FDA has therefore breached this regulation, when it issued the EUA, as they were informed prior to that issuance of alternative and successful treatments such as Ivermectin, Hydroxychloroquine, Zinc, vitamins B, D and C. So, for the FDA to continue asserting that “COVID vaccines” are the only way to “get back to normal” is entirely fraudulent!
8. I assert if any individual representing any business/corporation that chooses to enforce any illegal mandates such as a medical procedure (the PCR test) or medical therapy (the COVID-19 vaccine) on healthy employees, vendors, or sales representatives by strongly suggesting these tests and treatments are necessary, should be offered on an absolutely voluntary basis without any recriminations whatsoever. Otherwise, these corporate individuals may be held liable for any damages, injuries or loss of employment due to refusing the illegal mandates. For employers to threaten employees, vendors or sales representatives to adhere to unlawful dictates is to participate directly in harm being carried out on employees, vendors and sales representatives, and as such these employers may be liable for damages of said harm.
9. I assert that the First Amendment to the United States Constitution prevents the government from making laws which regulate or abridge the freedom religion, the freedom of speech, the freedom of the press, the freedom of assembly, or the right to petition the government for redress of grievances. Since our “We the People” freedoms have obviously been profoundly and unlawfully eroded during this alleged “pandemic” because of unjustified and disastrous lockdown mandates. “We the People”, having all political power, never granted authority to any one, whether a lawmaker, government official, law enforcement official, employer, doctor or nurse to force any medical intervention upon us through their opinions, policies, programs or mandates being falsely presented as law. On the contrary, “We the People,” maintain adherence to the laws that were in place before this virus or any of its variants emerged.
10. I recognize other foreign and domestic agendas at play that are repugnant to the Constitution and Statutes designed to protect us and so we firmly denounce them and their influence on our Representatives. We demand an immediate investigation into the fraudulent nature of this, “pandemic” and the unsustainable claim of a “State of Emergency.”
11. I affirm that “We the People” are not feeling protected, but suffocated by arbitrary restrictions based on inaccurate data and unsubstantiated fears. This coupled with unprecedented levels of censorship and fake news based on misleading and ever-changing data, reveals a “public servants” lack of comprehension and

memory regarding the oaths “public servants” took to uphold the Constitution of the United States of America. Due to this breach of duty to protect our First Amendment Rights and Trust, the Affiants demand that each of you rectify this breach immediately, regardless of any State of Emergency, whether or not such a state, in fact exists.

12. I demand that you prove that there is in fact, justification for a State of Emergency based on an actually isolated virus called Sars Cov2 or any variant thereof. Claiming justification for the “Emergency Powers and EUA,” that are based on the rising “Case Numbers” from the Drosten’s PCR test, a version of Nobel Prize laureate Dr. Kary Mullis’ invention of the PCR test, it will not hold up in court, legally or medically, having been proven to be inaccurate and fraudulent in citing rising case numbers. The Affiants also demand that you provide full disclosure of new laws (not mandates) that grant you authority to exercise this force against your constituents, as no laws exist at this time.

13. I demand you respond to we the people and hear our demands. If you fail to respond to us, within the week, you will have acknowledged trespassing against the Constitutional and God-given Rights of the People that you have sworn to protect as well as participating in the crimes mentioned herein. You further agree, that if you do not respond showing Constitutional Provisions authorizing the before mentioned breaches within seven business days, you will have agreed to the facts herein, that no court shall re-examine this matter as you will have thereby agreed to accept the above-mentioned terms of truth and law. This letter authored by a Citizen of the United States of America and residents in Washington State, in Kitsap County, stands as a Notice of Liability and will be used as evidence of wrongdoing, if needed. In the meantime, the Citizens also demand that you cease and desist coercing the “We the People” into surrendering their right to opt out of PCR testing and dangerous mRNA experiments, gene therapies, vaccines or any medical mandates whatsoever.

The Citizen presents this statement, on 28th day of September in the year Two Thousand Twenty-one by Meghan Carpenito.

Subject: No to proof of Vaccine

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

As a Kitsap resident of 23 years I am happy to call this county my home. My wife and I are fully vaccinated and have been for some time. We do not feel threatened by the unvaccinated. We do not need protection from them. The unvaccinated have made their choice and whatever reason, medical, religious or philosophical, have decided not to get the vaccine. If we are punishing them for their choice, why don't we just lock them up in their homes or internment camps or round them up and force vaccinate them, because that is the next logical step, after requiring proof of vaccine for entry.

According to CDC Data Covid has a 1.6% death rate for ALL age groups. Of these 1.6%, 94.7% of them are over 50 years of age. Mathematically then the death rate for those under 50 is 0.008% of the cases. Why are we forcing 100% of the population, who have a greater chance of dying or being hospitalized in a multitude of other ways, to get vaccinated in opposition to their choice and not letting them choose how to treat their own bodies?

How can we do this as a free society? Would it be possible for those over 50, those who compose the greatest health risk, to be asked to stay home? Is there any other way to protect the most vulnerable?

Why are those with natural immunity, which has been shown to have a robust and longer term efficacy NOT considered? According to the Cleveland Clinic and UW and many other studies which I can produce if you would like, but I am sure you are aware of, those who have already had the disease are immune from it and from the variants. Why do these people who will, according to the science, never get Covid again, forced to take a vaccine with more known adverse events than all the other vaccines produced?

One thing that I do not understand is why when 71% of the US population has been vaccinated (at least one dose) is Covid surging as never before? It seemed last year, BEFORE the vaccine when ALL hospitalizations were non vaccinated, were there fewer cases? I do not understand this. We were told that herd immunity was 70% by medical experts. We are at this point. Why are we now shooting for 95%? What studies indicated that 70% was the magic number to get to? What new studies now show that 95% is the new magic number? I have not heard Fauci produce these studies. I am sure you have since you are the health experts of the county. I would love to see these so I can help support your positions which remove the freedom of movement from the community.

The country of Israel has a 90% vaccination rate and now has a surge of covid, why is this? All of this is very confusing and I am looking to you as health experts to explain it to me, give me the science that explains why 95% vaccination rate is better than the 90% that Israel has.

Lastly, even as a fully vaccinated individual, I will not be entering businesses that require proof of vaccination as it is none of their business. I will go to Mason county and they can get my tax dollars.

I am appalled that Kitsap County would even consider a proof of vaccine mandate on business. Our freedoms are being stripped from us and it is a gross human rights violation to mandate medical procedures and discriminate against people for private medical choices. Please do not support this. Sincerely, Emily Hageman

Subject: Covid Response For Kitsap

[CAUTION]: This email originated from outside Kitsap Public Health District. Do not click links or open attachments unless you are expecting this email. If you are unsure please contact IT.

Hello and thank you for your service to our community!

Has a lifetime resident of Kitsap county hi as well as everyone else have never experienced a situation like what our nation and world is facing. What makes us unique as Americans is that we are a free people. Free to make decisions for our own lives and pursuit of happiness.

It is my opinion and the opinion of many in our region that government in its various forms has been consistently overstepping the boundaries of our personal freedoms with mandates, lockdowns and restrictions.

As you discuss the solutions for dealing with the supposed uptick in Covid cases I believe the wisest and most honorable position would be that of: Take no action and allow the current situation to play out.

Once you begin to discipline those who are vaccine hesitant or even anti-VAX this becomes a problem that is very un-American and constitutional.

Please consider the lives of those and the divisions that may be caused by pursuing disciplinary actions against those who are not ready to take a vaccine. This goes beyond putting the pressure on people to take a medicine that they are not 100% confident in its safety. This turns into peoples emotional and relational well-being in society all the way down to the family unit where there are disagreements. Thank you for taking the time to hear my concerns.

Respectfully, Scott Alcorn

Subject: Opinion on vaccine mandates in Kitsap

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Hi Mr. Grellner,

As an outspoken proponent of individualized health, I am very disappointed in proposed vaccine mandates of any sort that are to be considered at today's public health board meeting. **Some people may need to get the COVID vaccine many times, others may never need to get it (natural immunity).** By lumping everyone together we disregard individuality and may cause harm.

1.) Older people have less robust immune systems; they may need multiple boosters. Boosters should be given when antibody testing shows inadequate immunity. Younger people may get an asymptomatic infection, mount a strong immune response, and never need the vaccine, to begin with. A one-size-fits-all approach is unscientific.

Action item: Offer free antibody testing to people in order to inform NEED for vaccination. PMID: [34453893](https://pubmed.ncbi.nlm.nih.gov/34453893/)

2.) Mandates turn people away from getting the vaccine, but a nuanced approach increases people's faith in the government and authorities. **People who are skeptical that this vaccine is a conspiracy between Bill Gates and the Illuminati to reduce the world's population will become more skeptical after it is mandated.** People who were on the fence will not get it after it is mandated. I have had many people come to me with concerns about the vaccine in my private and professional life. What changes their minds is having someone they trust explain to them that the vaccine can't cause COVID, has only ~5000 deaths reported out of 184 million fully vaccinated (VAERS), doesn't alter your DNA, and is effective at reducing at least the severe risk of disease.

3.) Incentivize people

Here's a different idea for getting stragglers vaccinated. **Let's get famous people trained to administer the shot.** Many people in the "I haven't gotten around to it" category would get the shot if their favorite celebrity was giving it out.

4.) The vaccine isn't perfect

I am vaccinated (2 doses of Pfizer) and just recovered from COVID-19. 2 doses of Pfizer did not prevent me from getting sick. Yes, perhaps it did prevent me from getting more sick, for which I am thankful, but I also experienced a crazy fever which nearly caused me to pass out and a week-long dry cough in response to the second dose of the Pfizer vaccine.

5.) Make testing more readily available

Knowing whether you have had COVID is very useful information for the public health department and individuals. My husband and I had so much trouble trying to find COVID testing during the past 2 weeks in Kitsap county. This needs to be improved.

Please do consider these points. We do appreciate the complexity of this situation and respect the decisions that have to be made.

Thank you for hearing your community,
Emily Brown Reeves PhD. CNS.

Subject: KITSAP PUBLIC HEALTH BOARD SPECIAL MEETING - Covid-19

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Attn: Executive Secretary,

I just learned about this meeting taking place. Although fully vaccinated myself, I strongly believe that in America a person should have the right to participate in society without the government mandating certain medical procedures. That includes forced vaccinations to participate in society. This is the foundational argument for Roe vs. Wade. My body, my choice.

Also, natural immunity from covid-19 should be taken into consideration. Our government leaders promised us that we would reach herd immunity by a combination of those vaccinated and those that obtained natural immunity by surviving a Covid-19 infection. A recent large-scale study in Israel reported that natural immunity is many times more effective in preventing the D-Variant infection than the vaccination.

We already have mandatory mask requirements that are working in this County - infection rates are down, and the D-Variant spike is expected to be over by Thanksgiving.

We also now have available, in Kitsap County, an effective treatment for Covid-19 - mono-clonal antibody shots - that are 70% effective in preventing hospitalizations.

Requiring citizens to be vaccinated in order to patronize businesses is unnecessary, too late, and goes against the very foundation of our free society.

Please vote no to vaccination passports.

Respectfully,

Steven Cochran

Re: "Stop Shopping Vaccine Mandates in Kitsap County"

Dear Sirs and Madams,

I support Kitsap County Health District and Kitsap County Health Board proposed option number 1, "Take no action and allow the current situation play out."

Vaccine mandates ignore the following:

- a). Many people, including myself, have survived Covid-19 and have roughly 27 times the immunity of people who have not been vaccinated based on Israeli medical studies. To date, I am unaware of a single documented case of Covid-19 transmission from a person with natural immunity to another person.
- b). The term "Vaccine," according to the dictionary, requires immunity be produced. CDC has determined that "vaccinated" people can both acquire Covid-19 and can pass it to others. Therefore, "vaccinated" people are not immune and pose a far greater risk to the community than those people with natural immunity acquired from having survived Covid-19. The term "vaccine" should not be applied to the current injections.
- c). Government mandating people be "vaccinated" prior to exercising their 4th Amendment to the U.S. Constitution rights of association and travel violates both the Nuremberg Code and the U.S. Constitution. Any

restriction to public places in order to shop results in a massive destruction of small business and infuses vast wealth into companies like Amazon.

d). Public Health globally has a long history of dealing with viral infections, including measles, mumps and many others. In many instances this have been termed “childhood diseases.” Historically, children were intentionally exposed to these diseases at an early age in order to acquire lifetime natural immunity. The only instance where of which I am aware that a disease can be re-acquired is malaria.

e). In the central belt of Africa, where malaria is prevalent, Ivermectin is routinely administered on a weekly basis, often referred to as “There Sunday pill.” In the areas where Ivermectin is routinely administered, there have been routinely administered, deaths from Covid-19 are extremely rare. Countries in the north and south of Africa, where malaria is rare and Ivermectin is not a common prophylactic medicine, Covid-19 deaths have experienced extreme spikes. Please see: <https://nogreport.com/2021/09/03/shocking-conclusions-from-africa-study-expose-why-big-pharmas-puppets-are-suppressing-ivermectin-data/>.

Hello Mr Grellner,

We live in Kitsap and we've heard the idea circulated that vaccine passports may be required to enter businesses. A little background, I lived in a Communist country for 17 years and utterly disdain authoritarianism in every possible way. If this goes through, this is just another level of authoritarianism passed down from the elites in charge and is utterly reprehensible.

I would like to ask that you would do the right thing and serve your citizens and their interest in allow us to make medical and safety decisions for ourselves. Allow businesses to do what they do best and make those choices without overbearing government influence.

We want our freedoms back. The smaller our local and federal government is, the better for the people. I have nothing against you but the true meaning of meekness is "sheathed sword, having power but restraining from ever having to use it unless absolutely necessary." This so-called pandemic does not Necessitate the actions that have been taken for the last year and a half, we are not at risk of imminent death just lurking around every corner. It's about damn time that the government steps back and gives us our lives back without interfering.

I ask that you would do the right thing and represent your constituents. Do not give any ground to authoritarianism in the name of "safety".

Thank you.

Sincerely, Jeremy

Good Day,

This email is in the disapproval for the public, indoor venues open to the public for proof of vaccine. I have had covid and I shouldn't be forced to get the vaccine as I now have the antibodies for this virus. Not only that there is proof that even vaccinated folks are still getting covid and spreading it. This is unconstitutional and should not be required. A year ago when the outbreak actually happened none of this was in place and the hospital were empty and if people were dying of covid it is because they were given the wrong medication. This has been proven over and over again. You just feel you need to comply with the rest of the state, which is absurd to me. Where have all of your critical thinking skills gone? California and Michigan have decided not to enforce vaccine papers. You should to. Inslee is a narcissistic person who feels he is completely in control. This is absolutely ridiculous as well as the medical employees quitting because they chose not to get vaccination. By proposing this rule you are tying a lot of peoples hands as well as people who have major disabilities and don't want to get vaccinated. This is just like what the Nazi's did to the Jews and I just can't believe you are wanting to do this. This is not for the health of the people what so ever. Because if it was then my medication would be free and it is not. None of this has been for the health of the people. Medical personal, firefighters, police have all quit because of what the State of WA is doing to its people. I find this absolutely ridiculous as last year all these people were front line and none of them died. I also feel the reason that Inslee and the politicians are doing this is for money. Money and greed will get you no where and will only hurt the people in the end. Have you looked into all the suicides that have happened over the past year because of the rules and regulations the state has put into place. I have proof that this covid virus is 99.9% survivable with a person who has autoimmune disease. Please change your minds on this issue. Thank you

Strength shows not only in the ability to persist, but the ability to start over.....

Subject: Oppose Vaccine Mandates and Passports in Kitsap County

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Kitsap County Health Board,

My name is Aaron Davison. I moved to Kitsap County in 1994 in the summer between my 6th and 7th grade years in school. I am a proud survivor of Marcus Whitman Junior High School, and a graduate of South Kitsap High School (Class of 2000). I have been in and around this community for most of my life. I currently live near Long Lake. I oppose, in the strongest terms possible, any sort of vaccine mandates, or vaccine passports in Kitsap County.

No matter your position on vaccines, I believe everyone should oppose a government requirement to require vaccination, or show proof of a COVID vaccination in Kitsap County under any circumstances. These kinds of decisions should be made by individuals, not the government. This is not the proper role of government and will create different classes of citizens within our county who will have access to different services, jobs, and benefits. I can think of very few things which are more un-American than dividing up citizens this way.

I urge you to oppose this kind of action against the people of Kitsap County.

Sincerely,
Aaron Davison

In reviewing some of your own policies, I've copy pasted your "Non-Discrimination" policy. Vaccine passports will surely violate this policy and be grounds for legal action against KPHD, if not on the basis of race (we don't know the Kitsap data regarding if this mandate would have a greater negative on some groups), certainly on the basis of creed.

Perhaps there are better ways to address the health concerns of the county than this type of mandate.

On Sat, Sep 25, 2021 at 12:58 PM Dan & Marcie Hamilton <danandmarcie@gmail.com> wrote:

I just finished listening to your previous zoom meeting and see that in your upcoming meeting you will not be taking comments. Is that the norm for your board meetings? The board is taking what I'm assuming is an unprecedented step in considering mandating a vaccine that is still in its experimental trial stage. I hope you will address the following questions before making such a decision.

1. You said that "science deserves our respect". I couldn't agree more which has had me baffled why given some significant studies most notably out of Israel on the superior effectiveness of natural immunity vs. vaccine immunity appear to be completely ignored. I didn't hear anything from the board about natural immunity being an exception to the vaccine mandate. Could you please explain why? Do you refute the findings of the Israeli study?

https://www.timesofisrael.com/study-covid-recovery-gave-israelis-longer-lasting-delta-defense-than-vaccines/?fbclid=IwAR07pOUbaa_02d9eD7XceUQtPoNylpgF-1hbl8fJ1MiR41A0WCAPu09aYVQ

2. You said, "masking is proven", so why are mask mandates not enough?

3. What has KPHB given to those testing positive for covid to reduce the chances of hospitalization? My personal experience is that you are sent home with no recommendations even as to how to support your own immune response, though there is a great deal of proven science on the subject. The only guidance given is to quarantine and come to the hospital if you have trouble breathing. How is this helpful in reducing hospitalizations? Even El Salvador sends home a health packet of vitamins and medicines not only for the person testing positive for covid but also for all those living in the home with them. It seems this lack of response here should be addressed first.

4. It seems like we first heard of the delta variant as it swept through parts of India. I recently saw the data from India. While they had a huge upswing in cases it dropped swiftly. What intervention did they use that was so effective? It wasn't a vaccine mandate.

5. Has KPHB been contact tracing from the beginning? If so, where is the data? I remember hearing early on (though not sure if it was local or national) that most cases of covid were coming from the home/relatives rather than from restaurants, stores, etc. Is that correct? What about in our county? I heard someone in the last meeting mention a teacher in some other state spreading covid in her class. I'm assuming that was cited because it has not been an issue here. Please correct me if I'm wrong.

6. Looking at statistics for our county, will "vaccine passports" have a greater negative impact on people of color in loss of jobs and/or loss of access to restaurants or other venues that are part of your proposed mandate? Are a greater percentage of people of color unvaccinated here in Kitsap Co. as is the case in New York City. Here's the definition I found for systemic racism: (I do not think you are basing any decision with race in mind, but your mandates may have a greater negative effect on some populations and that needs to be considered)

policies and practices that exist throughout a whole society or organization, and that result in and support a continued unfair advantage to some people and unfair or harmful treatment of others based on race

7. As we continue to see more and more break through cases of fully vaccinated individuals testing positive and potentially spreading covid (The ladies on The View who were about to interview the vice-president as a very recent public example), how can we possibly consider vaccine mandates to be the answer?

8. Finally, you voiced concern about a health issue being politicized and yet the following was voiced by your board members. "you shouldn't work for the government if you don't want them mandating what you do" I'm pretty sure even you would agree that there are lines that even our government shouldn't cross. What if they decided all government employees can only have one child or less because they lose too many work days for caring for sick kids. Some people think that mandating a vaccine is a crossing of that line, especially when many of those about to lose their jobs already have natural immunity. Someone else on the board voiced that not getting vaccinated was "unpatriotic" which makes it feel as if board members are the ones politicizing things.

Can you please send us any kitsap county specific data you have regarding vaccination rates by age & ethnic groups, contact tracing data that shows where people are being exposed in our county since the start of covid as well as what measures you took to reduce hospitalizations by providing preventative care, immune response support, or other interventions, and who are the board members that have a medical degree and/or experience in immunology, or covid care. Also, do any of the cities or does the county receive state or federal funds based on vaccination rates?

Thank you,

Dan & Marcie Hamilton
Seabeck, WA

Subject: KITSAP PUBLIC HEALTH BOARD SPEICAL MEETING AGENDA

[CAUTION]: This email originated from outside Kitsap Public Health District. Do not click links or open attachments unless you are expecting this email. If you are unsure please contact IT.

Mr. Grellner,

I wish to submit my thoughts regarding the agenda for the Kitsap Public Health Board special meeting.

I am concerned about the health of my fellow Kitsap residents but not to the extent that I wish to see broad Covid mandates requiring mandatory vaccinations implemented. I strongly believe one's health decisions are just that, one's own decisions and that government, even well intended government, should not be mandating invasive actions such as vaccine injections.

I have reviewed the Kitsap covid tracker website frequently and what stands out to me is that this virus remains primarily a mortal threat to older individuals. To my knowledge the site does not track underlying conditions but I believe these also are a major contributor to the severity of the infection. Assuming these previous suppositions to be true, singling out older adults, people with underlying conditions and people who interact directly with older adults for education regarding the benefits of vaccination seems like the best path. With regard public policy to thwart this virus, I believe a more subtle and persuasive plan is needed.

Clearly people over the age of 60 are more vulnerable to and more likely to be hospitalized by covid. Thus, I feel any public governmental policy should be directed towards encouraging that group to get vaccinated. Also, since it appears those most at risk of death from infection are those over the age of 80, the need for a focused approach to an older category of residents seems correct. If senior living facilities and nursing homes are the epicenters of local outbreaks, then focus one's attention there.

Regarding acute Emergency Room bed space shortage due to the "boarding" of older patients who live at senior facilities, why not dedicate another wing/area of the hospital to that use? With all of the money flowing in from the federal government I find it hard to believe that funding is not available to retrofit or create triage centers for that use. I laude that the Kitsap Health Department is not following in the steps of the deposed Governor of NY.

Covid obviously remains a concern to both the vaccinated and unvaccinated. Vaccination is not a guarantee of not succumbing to the illness as it appears the delta variant can infect even the vaccinated. What appears to be the best protection from the variant is actual self-produced antibodies as a consequence of recovering from covid. Younger people who catch covid and subsequently recover should be able to return to their normal lives w/o a mandated vaccine. Younger people who elect to not receive the vaccine should be allowed to make that choice without risking loss or employment since the "science" seems to indicate that the vast majority of younger patients make full recoveries.

In conclusion, I am opposed to any action on the part of the Board of Health mandating vaccines for the general public. I am in favor of a more directed approach targeting those most at risk for hospitalization or at worst death with education and persuasive, non-threatening discussion regarding the benefits of vaccinations.

Sincerely,
Jackie Chipman
Bainbridge Island

Keith – I hope planned requirements to require local businesses to not serve unvaccinated patrons do NOT include grocery stores, gas stations, medical and dental offices. By so doing you risk the lives of those who choose not to be vaccinated. What is gained by killing those you suspect are infecting the vaccinated? If someone is already vaccinated, why should they be concerned about the status of others if supposedly they are protected? From what I've seen the majority of Covid cases are among the vaccinated. I recommend you interview front-line nurses (who are willing to tell the truth without fear of reprisal) to verify the truth.

To Charlotte Garrido,

I'm very concerned by the increasing discrimination directed toward people who do not want to take the COVID-19 vaccine. Shouldn't people be able to make their own medical choices without being excluded from college campuses, fired from government employment, and more? Please oppose all attempts to force or pressure medical procedures on Kitsap residents. Please protect our medical freedoms.

Respectfully,
Michael Hastings

The Health Board should not adopt any medical mandates like those that have backfired in New York City and caused personnel shortages in medical and nursing facilities. The widespread division of medical professionals itself should at least tell us that we do not yet know enough to be making sweeping decisions of such great consequence to our businesses, our communities and our personal health. Every community needs to take responsibility to tune out loud, panicked voices and openly discuss proper perspectives and answers themselves.

Chris Ifland, Kitsap County resident.

Mr. Grellner,

It is my understanding that the Kitsap County Health Board is meeting today (very soon, in fact) to discuss possible mandates for the county that would require proof of vaccination or other such strict measures. This madness must stop. These efforts strip away freedoms in a vain attempt to control a virus that cannot be controlled. At what cost? Businesses are already struggling, many were already destroyed last year from lockdowns. Forcing them to require proof of vaccination for customers, or forcing them to require it for employees will only inflict further damage on businesses that help people in Kitsap county support themselves and their families.

The public is well aware of the risks. The majority of adults have been vaccinated. We cannot trade freedom for "safety". Benjamin Franklin put it in these terms: "Those who would give up essential Liberty, to purchase a little temporary Safety, deserve neither Liberty nor Safety."

Sincerely,

Andrew St.Hilaire

Subject: Proof of vaccination

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

To all concerned:

Any mandate to require proof of vaccination is a direct violation of my constitutional rights as described in section one of the 14th amendment and the bill of rights. Any action on your behalf that violates these core tenants will NOT be obeyed and all parties involved in these violations will be held liable in a court of law.

Excerpts for your reference:

“No State shall make or enforce any law which shall abridge the privileges or immunities of citizens of the United States.”

“nor shall any State deprive any person of life, liberty or property, without due process of law,”

This clause guarantees a wide array of rights against infringement by the states, including those enumerated in the Bill of Rights (freedom of speech, free exercise of religion, right to bear arms, etc.) as well as the right to privacy and other fundamental rights not mentioned elsewhere in the Constitution.

Finally, the

“equal protection clause” (“nor deny to any person within its jurisdiction the equal protection of the laws”

You have been notified.

Subject: NO MANDATORY VACCINES

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Mr. Grellner,

It has been brought to my attention that Kitsap County will be considering whether to impose a "proof-of-vaccine" requirement to access businesses within the county - this is UNCONSTITUTIONAL. Aside from this being unconstitutional, it is an absolute lie to say that the vaccine is the best tool available to fight COVID cases that are "overrunning" our hospitals. Science is showing us that those who are vaccinated are still contracting and transmitting the virus to others. If the claim is to protect those who are immunocompromised, this is clearly not an effective way.

I was immunocompromised when I contracted COVID. I was in my third trimester of pregnancy when I was admitted to the ER for a fractured tibia, upon which I tested positive. The fracture was so severe that surgery was necessary. Third trimester, fractured tibia, surgery and absolutely zero complications from COVID. Our beautiful baby girl was born two months later, in November of 2020, absolutely healthy and thriving.

What science IS showing is that those who have natural immunity have a stronger and longer lasting immunity to COVID than those who are vaccinated, my parents are proof of this. They had the same exposure to COVID that I had during my pregnancy over a year ago. Just recently they were exposed again to COVID by my father's brother, who they were caring for, he had a mental disability. My parents, who are in their 60s, were his primary caretakers and lived in the same home, did not contract COVID as proven with negative test results.

It is my understanding that there is a plan to discuss recommended action for moving forward, one option being to take no action and let the situation play out. Please, look at the science! Science shows us that natural immunity is the answer, not a vaccine that has been pushed through FDA approval and is ineffective in protecting those choosing to take the vaccine or from them spreading the virus to others.

Please do not impose a vaccine mandate in Kitsap County.

Praying for guidance and wisdom in your decisions moving forward. Thank you for your time.

Elyse Newcomb

Subject: No to additional requirements to COVID in Kitsap County

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

It's my hope that the Kitsap Public Health Board will follow the science and decide that requiring additional vaccine requirements in Kitsap County is unnecessary.

The top employers in the area already require vaccines

- Department of Defense
- All Contractors who work at/for department of defense
- Olympic College (staff and students)
- Hospitals
- School Districts
- All other state and federal agencies
- All businesses that employ 100+ employees

What percentage of Kitsap County needs to get vaccinated for it to be enough?

Small businesses will be impacted by this the most. Especially restaurants. I don't know if you've tried to eat out lately, but I eat out at local restaurants at least 3 times a week, and I can tell you that restaurants are already struggling to hire enough staff. Adding additional requirements for employment and then requiring those establishments to have to hire more people to track the vaccination status of their employees and patrons is excessive.

We can assume that if the majority of employers already require vaccinations, then the majority of people who are patronizing local businesses are vaccinated.

I think that the Health Board should wait until the State and Federal mandates are in effect and see if further measures are needed.

From what I read, there doesn't seem to be any clear benchmarks locally or nationally regarding vaccines. I hope that our county will decide that additional mandates, additional stress on business owners, additional red tape, etc is superfluous.

The CDC is very clear that vaccinated individuals can still spread and contract COVID. Does requiring vaccines to enter businesses REALLY make people safer? or does it just make them FEEL safer? or is it about MAKING people do something they don't want to do (get vaccinated)?

What is the Health Board's objective? Safety? Feelings? Control?

I urge you to let the mandates requirements that are already in place to be sufficient. Assume that the federal government chose to make their requirements for businesses over 100+ employees for a reason and don't make more restrictive recommendations.

Sincerely,

Christine Meyer

Subject: DO NOT MAKE A VACCINE PASSPORT MANDATE IN KITSAP COUNTY !!

[CAUTION]: This email originated from outside Kitsap Public Health District. Do not click links or open attachments unless you are expecting this email. If you are unsure please contact IT.

Dear Sir Or Madam:

My name is David Meyering. I am a resident of Kitsap county.

I am a decorated combat veteran of eight tours in Vietnam and I am outraged that the liberties that I risked my life for are so wantonly brushed aside by well-paid

comfortable bureaucrats for transparently political reasons. Not all of you mind, but the shoe will fit some of you I'm sure.

How did my beloved country become Hobbes' " Leviathan " so swiftly?

I have a right to live my life freely without the permission of another or a "Covid Passport" without which I can't work, or shop or enter a restaurant! Hutzpah!!!

And all this depends on a decision by county health department that has not encouraged the use of well-proven prophylactic medicines such as ivermectin that has slashed deaths in India,

or the use of Regen-Cov which I and my wife recently took when we came down with COVID symptoms and tested positive, and virtually recovered the next day! Try to get it in this county -

good luck!

By the way - the damn shot doesn't work either...look at Israel, the only truthful nation out there is 80% vaccinated and is the most CoVid infected in the world.

DO NOT VIOLATE THE CONSTITUTION YOU ARE SWORN TO DEFEND BY REQUIRING ANY CITIZEN TO CARRY ANY KIND OF VACCINE PASSPORT AND PAY ATTENTION TO REAL SCIENCE !!

I am praying for you all.

David Meyering
