

KITSAP COUNTY BOARD OF HEALTH ORDINANCE 2008-01

ONSITE SEWAGE SYSTEM AND GENERAL SEWAGE SANITATION REGULATIONS

Policy #13: Pre-Treatment Requirements for Dripline Dispersal Components

Effective Date: November 1, 2008

Purpose: The purpose of this policy is to establish a minimum treatment performance level for dripline irrigation dispersal components.

Policy: Because of the apparent sensitivity and limitations of dripline irrigation dispersal components due to a combination of their small size, small orifices, and the typical waste strength of sewage, it shall be the policy of the Health Officer that dripline irrigation dispersal components be preceded by a treatment component tank or vessel that has been approved to meet Treatment Performance Level B, or better.
