Congratulations to Dr. Morell and his staff for becoming a 4 star certified EnviroStar business. The EnviroStars program recognizes businesses for reducing and properly managing their hazardous waste.

The office has incorporated best management practices for storing hazardous products and wastes and they provide secondary containment to prevent possible spills or leaks. A spill kit was also purchased for the office to have readily available in the unlikely event of a spill.

Dr. Morell does not place amalgam fillings however he does remove them. As a result he decided to install an amalgam separator to keep small amounts of amalgam from entering the waste water. The office uses steam sterilization instead of chemicals, which reduces the amount of

*Dr. Morell, MaryBeth, Erica, Sheena and Rachel*

hazardous waste being disposed.

To further reduce waste the office only accepts a limited number of supplies from vendors, and purchases as few different products as possible to avoid accumulating many different wastes.

All these activities contribute to protecting the environment.
