“EnviroStars helped provide us with the direction we needed to ensure our practices were environmentally sound”

Dr. Bruce Yoder

Congratulations to Drs. Yoder, Grieser, and Sullivan of Family Dental Associates for becoming a 4 star certified EnviroStar business. The EnviroStars program recognizes businesses for reducing and properly managing their hazardous waste.

The office has incorporated best management practices for storing hazardous products and wastes and they provide secondary containment to prevent possible spills or leaks. They have written procedures for handling various forms of amalgam waste, spent x-ray fixer, and lead foils. Amalgam wastes are collected, stored properly and brought to the moderate risk waste facility for disposal. The office uses steam sterilization instead of chemicals, which reduces the amount of hazardous waste being disposed. To further reduce waste the office only accepts a limited number of supplies from one vendor.

Family Dental Associates staff:
Front row Left to Right: Mendi, Pat & Kim.

Back row L to R: Mary Jane, Dr. Peter Grieser, Lori, Dr. Bruce Yoder, Karla, Darcy, Julie and Dr. Tracy Sullivan.

Fluorescent light bulbs, which contain mercury and lead are properly recycled and not placed in the regular garbage. All these activities contribute to protecting the environment. Family Dental also offers patient education regarding environmental issues.
