
Kingston Dental

25995 Barber Cutoff Rd.N.E. Kingston
(360) 297-2298

Kingston Dental specializes in family and cosmetic dentistry. They show their concern for the environment through participation in EnviroStars

Congratulations to Kingston Dental and Dr. Jeffrey L. Zygar for becoming a 4 star certified EnviroStar business. The EnviroStars program recognizes businesses for reducing and properly managing their hazardous waste.

The office has reduced their hazardous waste in a variety of ways. They use steam sterilization instead of chemicals, they clean their x-ray film processor with a non-aerosol spray cleaner that can be discharged into the sewer, and they use and store few, different products to avoid accumulating different wastes.

Glenda Stover, dental assistant, made arrangements to have the x-ray developer unit re-plumbed so the office could collect the user x-ray fixer and developer. These chemicals are now collected and sent for disposal through a licensed waste disposal vendor.

Kingston Dental does not use amalgam fillings however they do remove them. Dr. Zygar purchased an amalgam wastewater separation

unit to keep residual amalgam out of the wastewater. The office also uses secondary containers underneath hazardous waste as a spill prevention measure. There is also a written spill plan.

In addition to reducing hazardous waste the office also has a solid waste-recycling program. Recycled materials include paper, plastic and aluminum cans.
