

Kitsap Respiratory Illness Report

Annual Report through Week 20 (May 20), 2018

The annual report shows the trend over the past four seasons for influenza A and B, respiratory syncytial virus (RSV) and influenza-like illness (ILI). Due to the seasonal nature of influenza viruses, it is normal to see peaks each season. For reporting purposes, each season is CDC weeks 30-29.

Influenza Laboratory Testing, Positive Reports by Type, 2014 to 2018

Respiratory Syncytial Virus (RSV) Laboratory Testing, Positive Reports, 2014 to 2018

Influenza Deaths, 2015 to 2018

Long-Term Care Facilities Impacted by Flu, 2015 to 2018

Syndromic Surveillance: Emergency Room Visits for Influenza-like Illness (ILI), 2014 to 2018[^]

[^]ILI = chief complaints that include: influenza OR [fever and (cough or sore throat)].

NOTE: All data are preliminary and subject to change if more data become available.
